

Joshing QA walkthrough — 2026-09-27

Exploratory test of production (joshing-11.vercel.app) at phone width, with a short desktop pass.

Run by Claude (Claude Code, /qa-walkthrough) · Sunday 27 Sep 2026, 08:03–13:20 ET · Accounts: A = Duo Prova (+1 555-222-2222, kept), B = Tre Prova (+1 555-333-3333, created today, deleted at end), C = Quat Prova (+1 555-444-4444, created today, deleted at end) · Build: main at 8977af64 (includes #1721, the fixes from yesterday's report) · Viewport: 393×744 CSS px Chrome tab (resize has no effect on this machine); desktop pass in a 1280 px same-origin frame · All times are Eastern (ET).

1 · SUMMARY

NO CRITICAL PROBLEMS · MOST OF YESTERDAY'S FIXES HOLD

Joshing worked end to end on production today: two fresh sign-ups from one invite link, two first rounds in the morning and three rounds after the 1 PM rollover, every friend step from request to block to unblock, invite links in every state, and account deletion. Nothing lost data or broke a flow. Of yesterday's 1 critical and 14 should-fix items, 11 are confirmed fixed (hide-question, skip wording, spoiled skips, fake tour activity, catch-up loop, "People you invited", dead buttons, squeezed search card, stale friend screens, resend code, feed rows after unfriend).

Four should-fix problems remain, each checked against the code:

- **S1** — Home and Lately show different counts for the same friend's set ("4 of 4" vs "0 of 4"). *Fixed on branch fix/qa-2026-09-27.*
- **S2** — A topic the player said "Not now" to is shown as "in rotation", though the game never asks it. *Fixed on the branch.*
- **S3** — New topics are filed in the wrong category ("Australian Geography" → History). *Fixed on the branch for new topics; old rows untouched.*
- **S4** — The "SECOND LOOK · LAST SEEN ..." date is wrong: "SEPTEMBER 25" for a question seen this morning, "JUNE 23" for a player who joined June 24. Found after 1 PM; *fixed on the branch.*

Principles held up well: no streaks or leaderboards, wrong answers are framed kindly, and levels are told apart by text headings, not just colour. The softest spots are a weekly-reflection slide that names a "top contributor" (Q3), the "Three in a row" line (Q4), and one strict grading call ("a thorn bush" for "a hawthorn bush") that the player could overturn with "Argue your point".

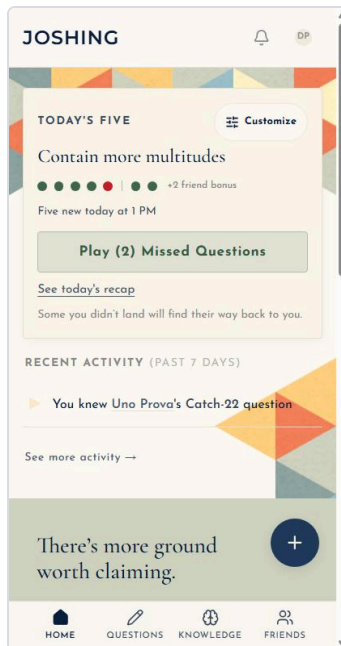

Accounts now: A (Duo Prova, 555-222-2222) kept. B (Tre Prova) deleted 13:17; C (Quat Prova) deleted 13:17. Both numbers now get the invite-only message again.

2 · STARTING STATE AND BASELINE

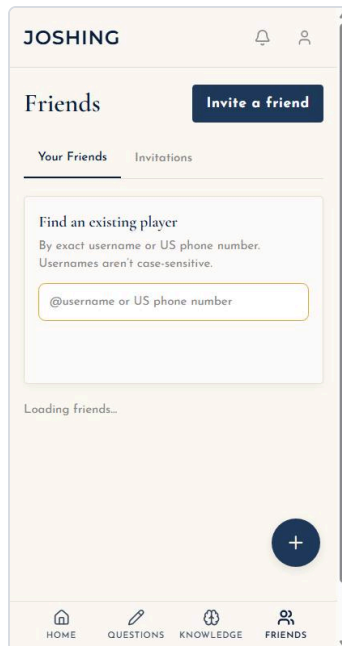

As found (08:03–08:09)

- **Which accounts existed:** only A. B (555-333-3333) and C (555-444-4444) did not exist (read-only database check at 08:04), so both were signed up fresh from A's invite link — extra sign-up coverage.

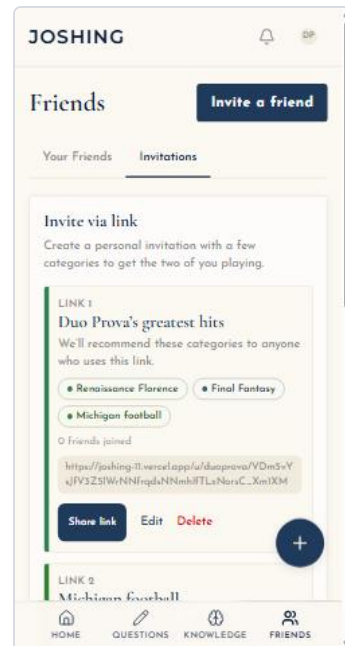

- **A's friends:** Craig T Testing and Uno Prova. **Pending requests:** none either way. **Blocked:** “You haven't blocked anyone.”
- **A's invite links:** three (the maximum): Link 1 “Duo Prova's greatest hits”, Link 2 “Michigan football”, Link 3 “Renaissance Florence & Great Lakes shipwrecks”, each “0 friends joined”. **People you invited:** “No one yet. People who join through your notes or links show up here.”
- **A's round:** the round that opened Sat 26 Sep at 1 PM was finished (4 right, 1 wrong, 2 bonus), with “Play (2) Missed Questions” and “Five new today at 1 PM”.
- **A's privacy settings:** Knowledge base Public, Questions Public, Friends list Friends; contact matching OFF; “Suggest me through mutual friends” OFF; stranger discovery ON; SMS reminders OFF; no email; no hidden questions.

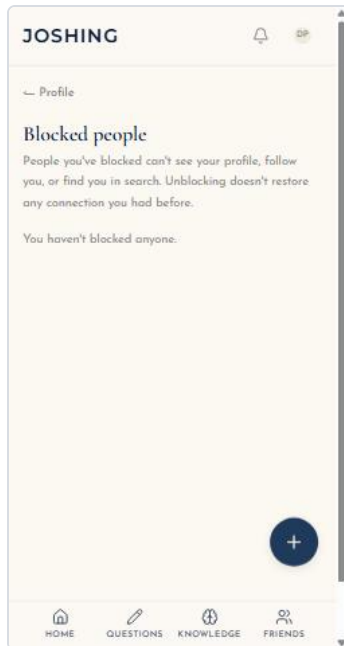

SS-01 · 08:05 ET · A · / · As found: home, Today's Five done (4 green, 1 red, +2 bonus), "Play (2) Missed Questions"

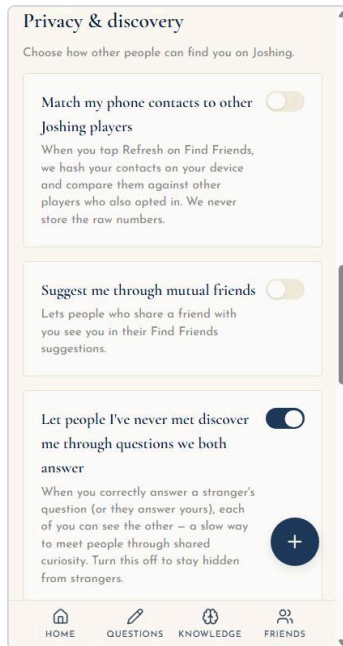

SS-02 · 08:05 ET · A · /friends · As found: Friends tab while loading

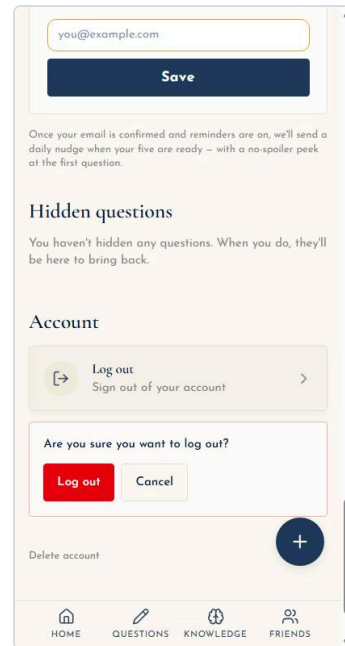

SS-03 · 08:07 ET · A · /friends? Invitations · As found: 3 invite links (max), all "0 friends joined"; People you invited: "No one yet."

SS-04 · 08:08 ET · A · /blocked · As found: "You haven't blocked anyone."

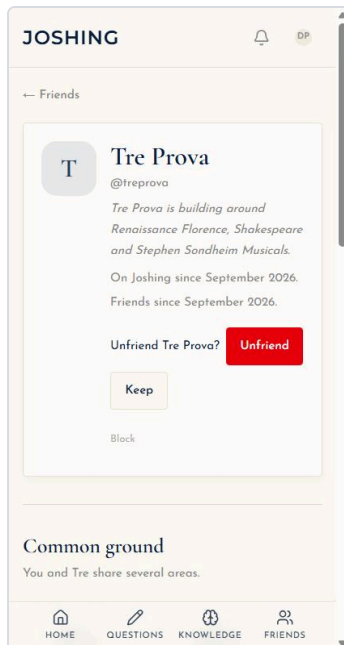

SS-05 · 08:09 ET · A · /users/(A) · As found: privacy toggles (contacts off, mutual-friend suggestions off, stranger discovery on)

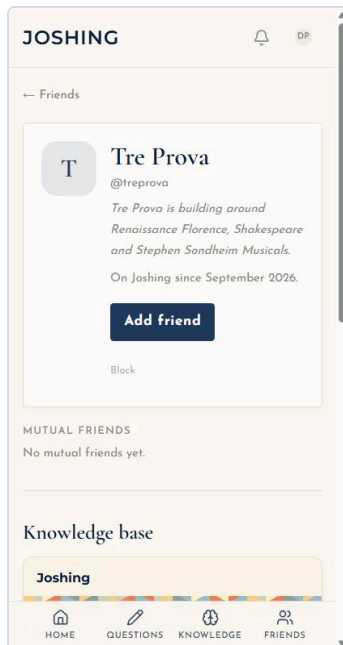

SS-06 · 08:08 ET · A · /users/(A) · Log out asks "Are you sure you want to log out?" inline

Baseline (08:31)

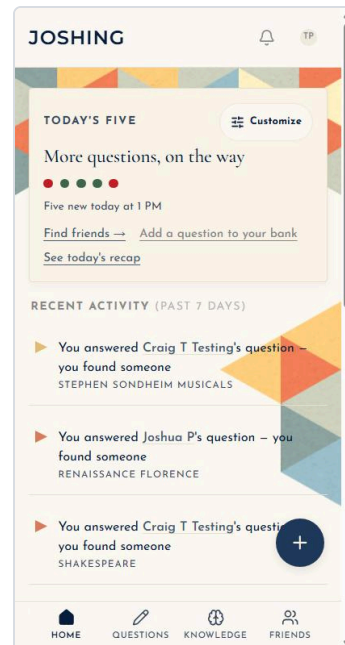

Because B joined through A's link, A and B started out as friends. At 08:31 A pressed **Unfriend** on B's profile. A read-only database check then showed no follow, request or block rows between A and B in either direction, so the baseline held: **not friends, not blocked, no pending requests**. Nothing refused to reset.

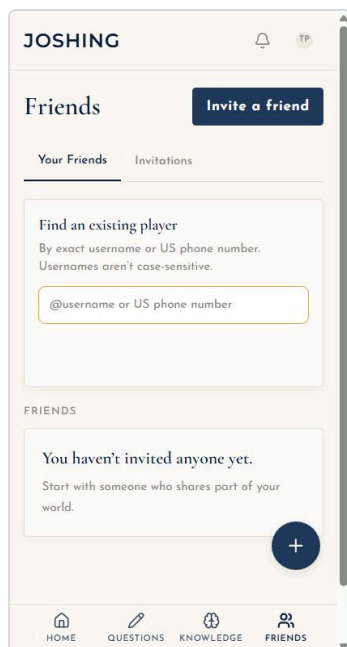

SS-44 · 08:30 ET · A · /users/(B) · Unfriend confirm "Unfriend Tre Prova?"

SS-45 · 08:31 ET · A · /users/(B) · BASELINE (A side): "Add friend", "Unfriended.", "No mutual friends yet."

SS-46 · 08:31 ET · B · / · BASELINE (B side): home dots without bonus; feed "You answered Craig T Testing's question — you found someone"

SS-48 · 08:32 ET · B · /friends ·
 BASELINE (B side): no friends — "You haven't invited anyone yet."

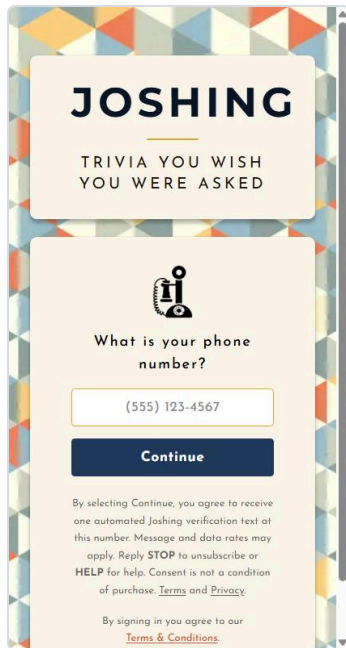

3 · AREA 1 — ONBOARDING & SIGN-IN

What worked

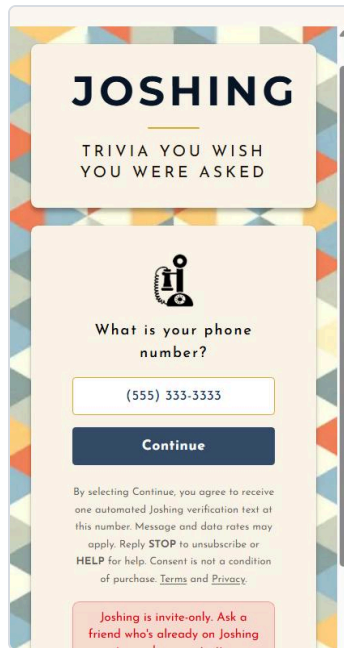

- **Invite-only message** (08:09, B's number before B existed): "Joshing is invite-only. Ask a friend who's already on Joshing to send you an invite." It is now announced to screen readers (`role="alert"`) and the page scrolls so it sits fully inside the 744 px window (bottom edge at 744 px — just at the fold). **Improved since yesterday (S10).**
- **Code screen** now has "Send a new code" as well as "Change number". Wrong code "123456" → "Code invalid or expired". Resend → "New code sent." and the box clears; pressing again at once → "Give it a few seconds, then try again." **Fixed (S10).**
- Numbers show as "(555) 222-2222", and "Change number" refills "(555) 444-4444". **Fixed (N8).**
- **Invite link while signed out** (08:13): "Duo invited you to Joshing, a trivia game built for you. Verify your phone number and you and Duo will be friends."
- **Profile step:** pressing "Enter Joshing" with an empty name says "Enter your display name." Typing "Tre Prova" fills the username "treprova". Placeholder is now "Alex Rivera". **Fixed (N18).**
- **Topics step:** the disabled button explains itself — "2 selected · pick at least 1 more" / "Pick at least 3 to start". Comma lists work ("Shakespeare, Greek mythology" → two chips). Removing a chip offers "Undo". Typing "Sondheim musicals" in the invite-link sheet suggested the existing "Stephen Sondheim Musicals".
- **C's number** 555-444-4444 accepted "000000", so no C tests had to be skipped.

Required vs skippable

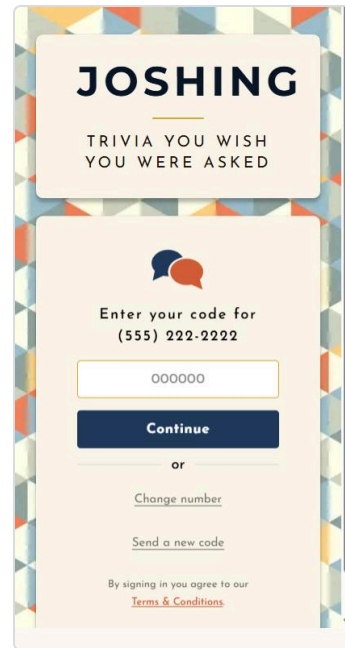

Required: display name, a valid username, at least 3 topics. Skippable: the reminder ask ("I'll check back on my own"). There is still no avatar step (the profile shows an initial).

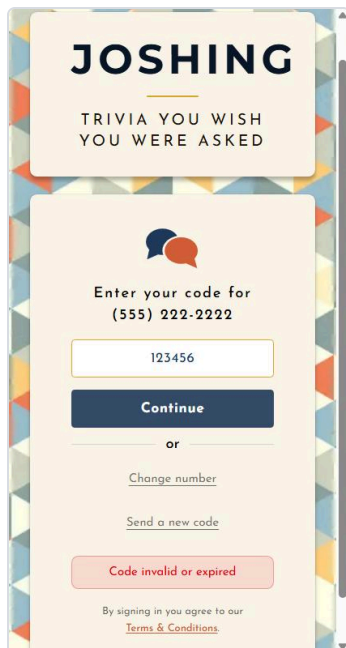

SS-07 · 08:08 ET · — · /login · Logged-out login screen

SS-08 · 08:09 ET · (B number) · /login · 5553333333 → "Joshing is invite-only..." shown in role=alert, bottom edge at the fold (744/744 px)

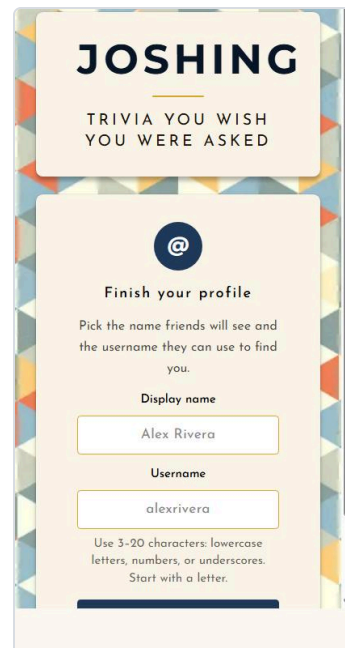

SS-09 · 08:10 ET · A · /login · Code screen now has "Send a new code"; number shown as "(555) 222-2222"

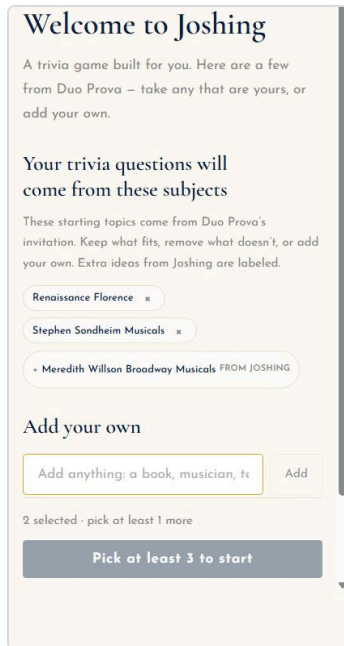

SS-10 · 08:10 ET · A · /login · Wrong code 123456 → "Code invalid or expired"

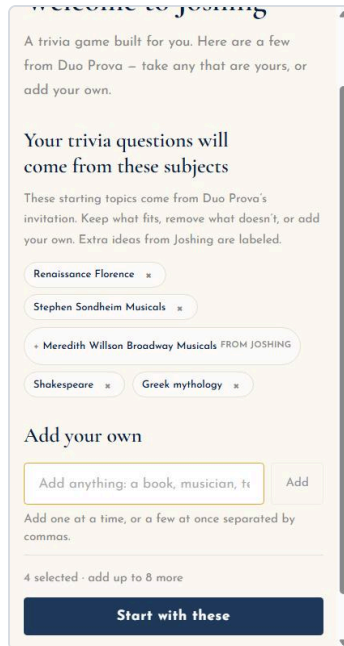

SS-15 · 08:13 ET · logged out · /u/duopropa/32AY... → /login?invite... · "Duo invited you to Joshing... Verify your phone number and you and Duo will be friends."

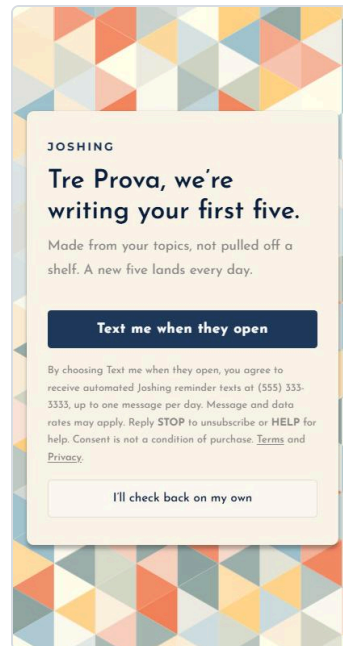

SS-16 · 08:14 ET · B (new) · /login · "Finish your profile" (placeholder now "Alex Rivera")

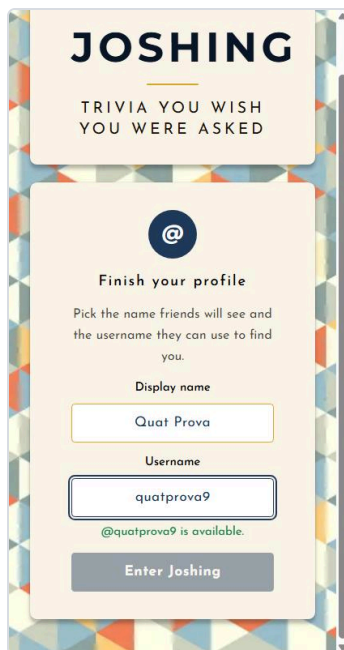

SS-17 · 08:14 ET · B · /onboarding · Invite topics prefilled; disabled button reads "Pick at least 3 to start"

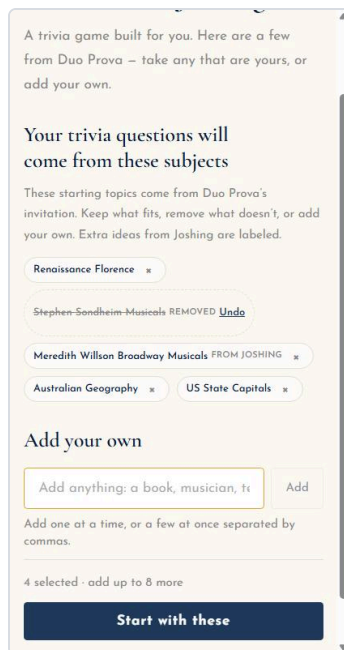

SS-18 · 08:14 ET · B · /onboarding · 4 selected after adding "Shakespeare, Greek mythology"

SS-19 · 08:15 ET · B · /onboarding · "Tre Prova, we're writing your first five." reminder ask

SS-34 · 08:23 ET · C (new) · /login · Username "Quat!Prova 9" silently becomes "quatprova9"; "@quatprova9 is available."

SS-35 · 08:24 ET · C · /onboarding · Removed/undo chip; "Australian Geography", "US State Capitals" added (re-cased)

Problems

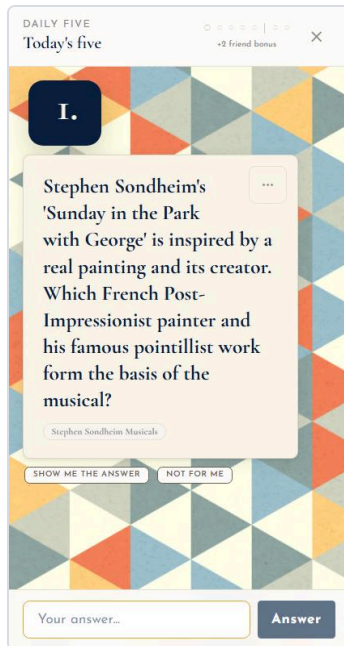

- Bad characters in a username are still dropped without a word: "Quat!Prova 9" became "quatprova9" (see N16).
- No message says a friendship was made when you join through a link; B and C only learn it later from a feed row (a nice-to-have; see Suggestions).

4 · AREA 2 — GAMEPLAY

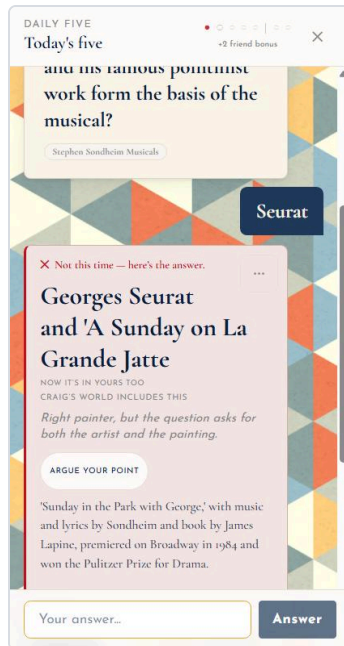

Grading (exact questions, answers and verdicts)

TIME · ACCOUNT	QUESTION (SHORT)	ANSWER TYPED	VERDICT	TEST
08:16 · B	Sondheim's <i>Sunday in the Park with George</i> : which painter and which painting?	"Seurat"	× "Not this time" — "Right painter, but the question asks for both the artist and the painting."	Partly right (2-part)
08:16 · B	"The undiscovered country..." — which play?	"Hamlet"	✓ "LOCKED IN."	Clearly correct
08:17 · B	Florentine museum meaning "the offices"	"Uffizi"	✓ "The Uffizi"	Typo
08:17 · B	Whose 1494 invasion drove out the Medici?	"the King of France"	✓ "Charles VIII of France"	Ambiguous
08:17 · B	Sondheim's two-word label for <i>Sweeney Todd</i>	"rock opera"	× "You'll know this one next time." Musical thriller	Clearly wrong
08:21 · B (catch-up)	Same Seurat question	"Seurat, A Sunday Afternoon on the Island of La Grande Jatte"	✓, "+3 POINTS - CATCH-UP - 0.25X POINTS"	Full answer
08:22 · B (catch-up)	Same <i>Sweeney Todd</i> question	"operetta"	×, "+0 POINTS - CATCH-UP - 0.25X POINTS"	Wrong again
08:26 · C	"76 trombones... how many cornets?"	"110"	✓	Clearly correct
08:27 · C	<i>Music Man</i> : "starts with T and rhymes with P"	"a pool table"	✓	Correct
08:27 · C	River the Darling joins	"Muray"	✓ "The Murray River"	Typo
08:27 · C (bonus)	Ford car that put America on wheels	"Model T"	✓	Bonus

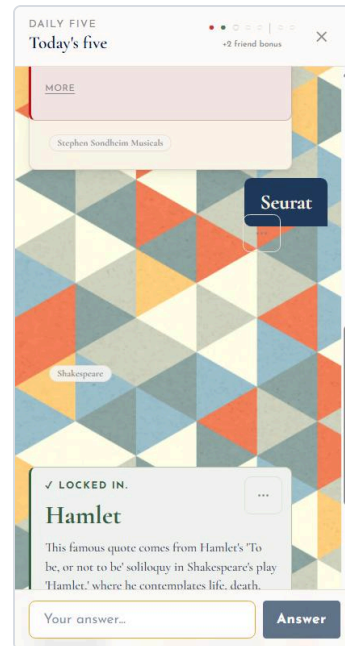

Grading leaned toward the player on the typo and the ambiguous answer. The partly-right answer was marked wrong, which is on the accepted list; the feedback line explained why, kindly.

SS-20 · 08:15 ET · B · /daily · First Daily Five, Q1 (two-part Sondheim/Seurat question)

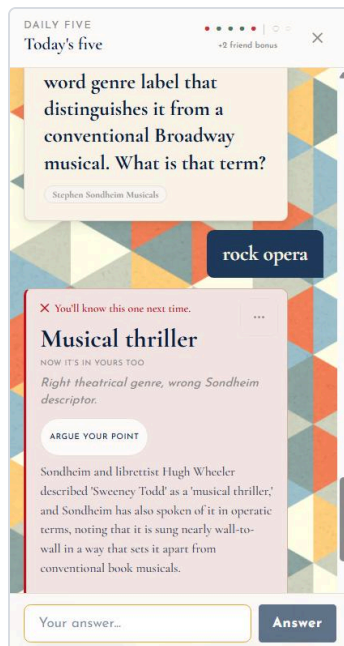

SS-21 · 08:16 ET · B · /daily · Partly-right "Seurat" → "Not this time"; card says "CRAIG'S WORLD INCLUDES THIS" (B is not friends with Craig)

SS-22 · 08:16 ET · B · /daily · "Hamlet" → "LOCKED IN."

SS-23 · 08:17 ET · B · /daily · Ambiguous "the King of France" → correct (Charles VIII of France)

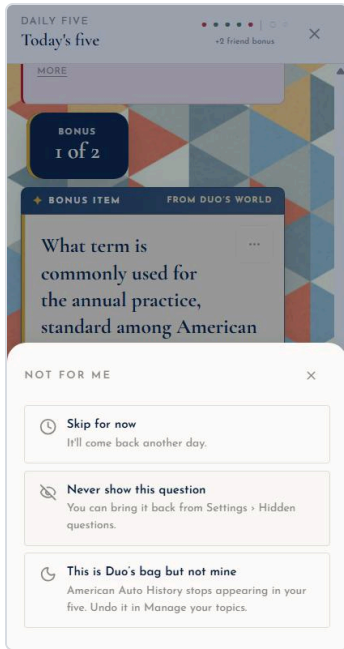

SS-24 · 08:17 ET · B · /daily · Wrong "rock opera" → "You'll know this one next time." Musical thriller

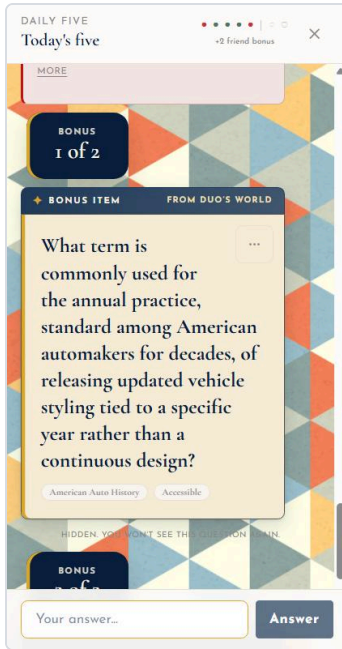

Skip, "Not for me", "Show me the answer" and the dots

- **Never show this question** (B, bonus 1, 08:18) → "HIDDEN. YOU WON'T SEE THIS QUESTION AGAIN." No error. **Fixed (C1).**
- **Skip for now** (B, bonus 2, 08:19) → "SKIPPED. WE'LL BRING IT BACK LATER." — the right message. **Fixed (S1).** No dead buttons were left on the card. **Fixed (S7).**
- **Skip for now on a main question** (C, Q3, 08:26): the third dot stays empty and the round moves on; the recap says "Saved for Catch up".

- **This is Duo's bag but not mine** (C, bonus 2, 08:28) → “RESTING CHESS OPENINGS. YOU WON'T SEE THESE IN YOUR FIVE.” The database shows {"Chess Openings": "resting"} for C.
- **Show me the answer** (C, Q1, 08:25) → “THE ANSWER The Uffizi”, first dot red (intended).
- **Bonuses are additive:** the five main dots never changed when a bonus was answered, hidden or skipped; only the two bonus dots after the divider filled (C: ● ● ○ ● ● | ● ○).
- **Bonus order:** B — 1 American Auto History, 2 Chess Openings; C — 1 American Auto History, 2 Chess Openings. Both labelled “FROM DUO'S WORLD”, both written by Maid Acasa.

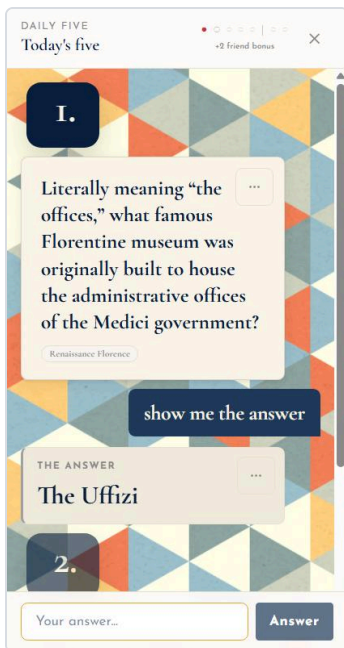

SS-25 · 08:18 ET · B · /daily · NOT FOR ME sheet on bonus 1 "FROM DUO'S WORLD"

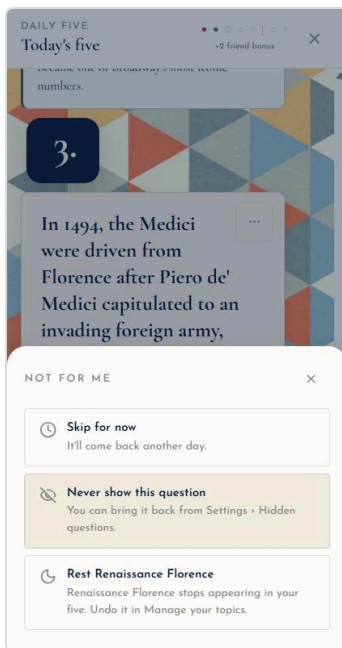

SS-26 · 08:18 ET · B · /daily · Never show → "HIDDEN. YOU WON'T SEE THIS QUESTION AGAIN." (was a 500 yesterday)

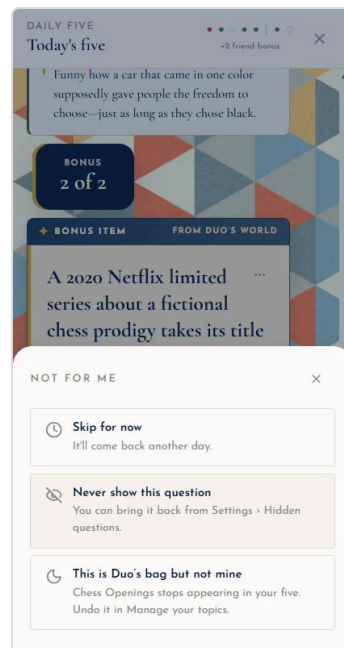

SS-27 · 08:19 ET · B · /daily · Skip for now → "SKIPPED. WE'LL BRING IT BACK LATER."; end card "Solid. / Three in a row at one point."; no dead buttons

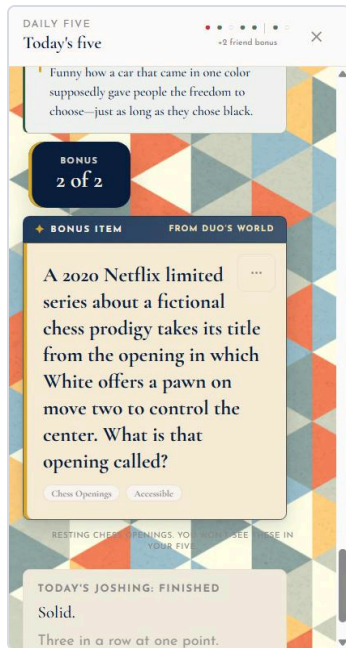

SS-36 · 08:25 ET · C · /daily · "show me the answer" → THE ANSWER The Uffizi; first dot red

SS-37 · 08:26 ET · C · /daily · Main-question NOT FOR ME sheet: Skip for now / Never show / Rest Renaissance Florence

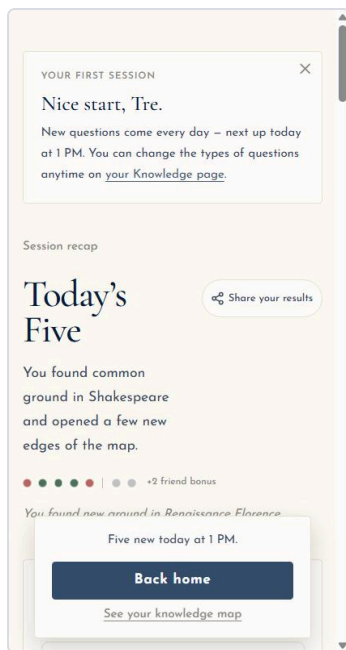

SS-38 · 08:27 ET · C · /daily · Bonus NOT FOR ME: "This is Duo's bag but not mine — Chess Openings stops appearing in your five."

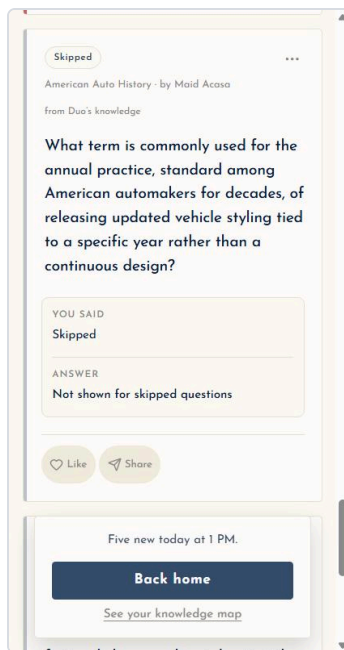

SS-39 · 08:28 ET · C · /daily ·
"RESTING CHESS OPENINGS..."; end
"Solid. / Three in a row at one point."

Home vs round vs recap

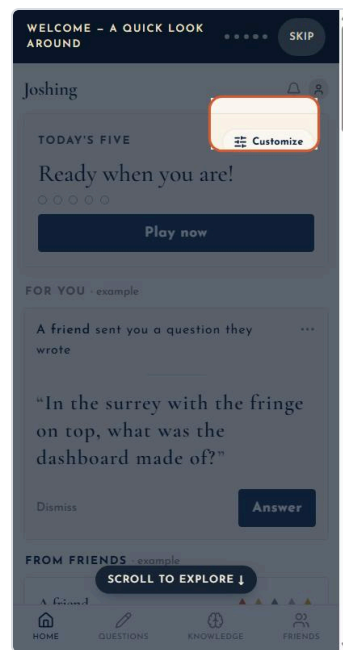

For B at 08:19–08:20 the round header, the recap and the home card all showed the same five dots (red, green, green, green, red) and the same two grey bonus dots, and all three said “Five new today at 1 PM”. The recap no longer shows answers for skipped questions: “ANSWER Not shown for skipped questions”. **Fixed (S2).**

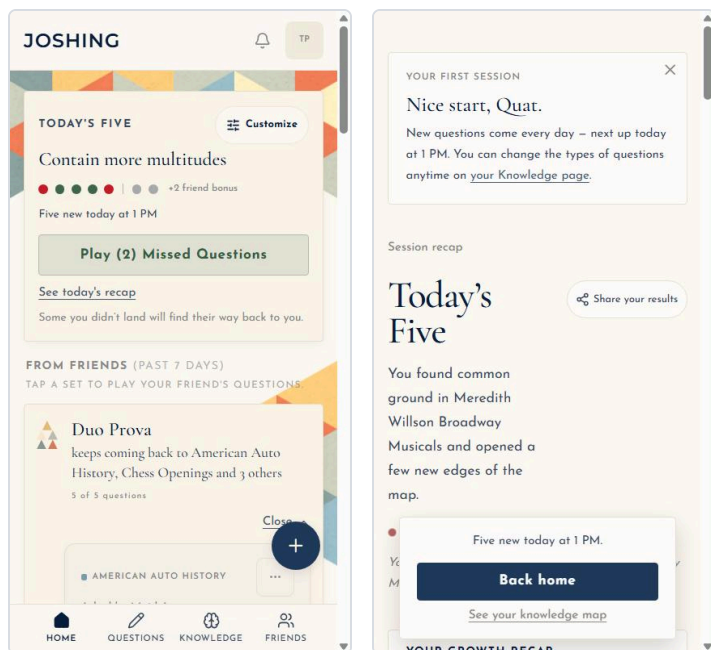

SS-28 · 08:19 ET · B · /daily/summary ·
First-session recap "Nice start, Tre." + dots

SS-29 · 08:20 ET · B · /daily/summary ·
Hidden bonus card labelled "Skipped" /
"Not shown for skipped questions" with a
Share button

SS-30 · 08:20 ET · B · / · Welcome tour:
example cards now say "A friend" +
"example"; highlight box above
Customize

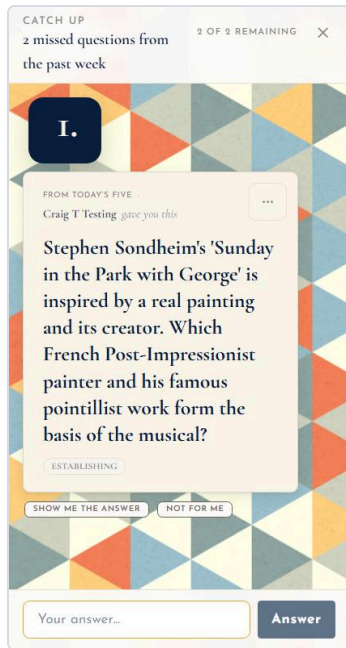

SS-31 · 08:20 ET · B · / · Home after round: dots match round + recap; "Play (2) Missed Questions"

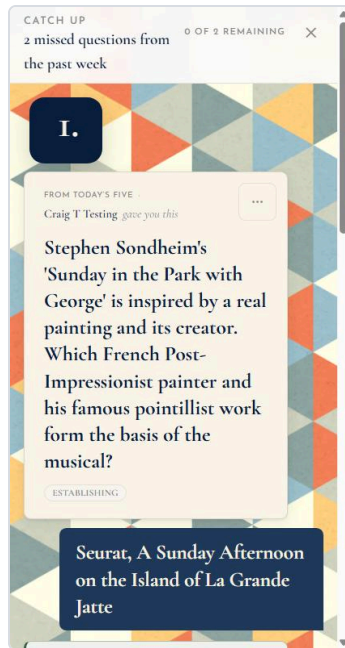

SS-40 · 08:28 ET · C · /daily/summary · "Nice start, Quat." recap

Catch-up

B's "Play (2) Missed Questions" opened "CATCH UP · 2 missed questions from the past week", labelled "FROM TODAY'S FIVE" (correct: both were from B's round that morning). After one right and one missed again it said "That's the round — 1 of 2. You're all caught up.", the home button disappeared, and reloading showed "Nothing to catch up on." — the loop from yesterday is gone. **Fixed (S5)**. A's catch-up at 08:46 labelled a Richard III question "FROM YESTERDAY'S FIVE"; it came from the round that opened Fri 25 Sep at 1 PM, which is "yesterday's five" when the home card still calls Saturday's round "Today's five". The labels count rounds (1 PM to 1 PM), consistently.

SS-32 · 08:21 ET · B · /daily/catchup ·
"FROM TODAY'S FIVE · Craig T Testing
gave you this" (Craig is not B's friend)

SS-33 · 08:22 ET · B · /daily/catchup ·
After 1 right + 1 missed-again: "That's
the round — 1 of 2. You're all caught
up."

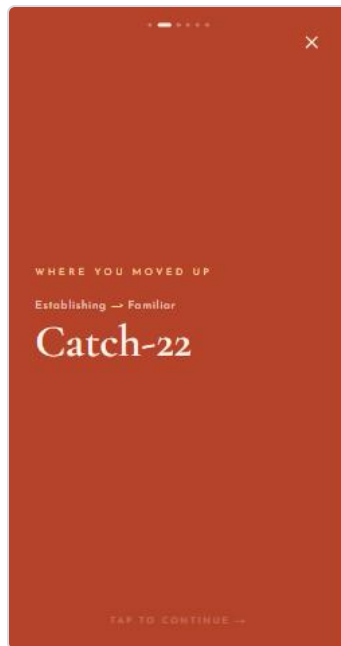

Weekly reflection (A, 08:47)

The reflection for "WEEK 14 · SEP 21 – SEP 27" (issued 4:01 AM Sunday, before that week ends) showed "11 questions you got right", "WHERE YOU MOVED UP Establishing → Familiar Catch-22", "WHAT YOU DISCOVERED ... Renaissance Florence, Great Lakes Shipwrecks", "WHAT YOU WORKED THROUGH Things you didn't have a week ago.", "WHAT YOU GAVE Uno Prova taught the room." and "This is who you were this week. See you next Sunday." The word "mastered" never appears; "moving up" means a topic crossed a points threshold. After "DONE", Lately changed to "Your weekly reflection · LOOK AGAIN →".

Fixed (N19). The "worked through" slide lists missed questions on purpose; the "discovered" list disagrees with the Knowledge page (N23).

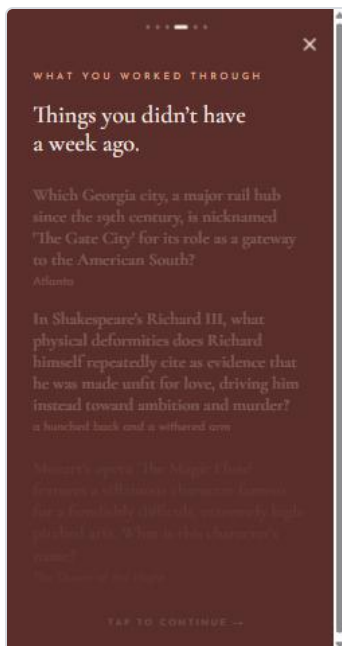

SS-76 · 08:47 ET · A · /ceremony/... · "WEEK 14 · SEP 21 – SEP 27 / Seven days of knowing things. / 11 questions you got right"

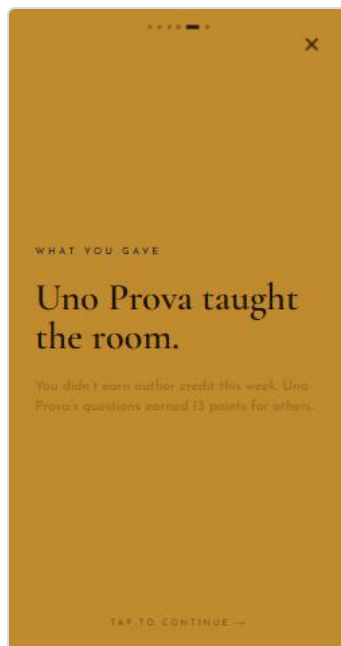

SS-77 · 08:47 ET · A · /ceremony · "WHERE YOU MOVED UP Establishing → Familiar Catch-22"

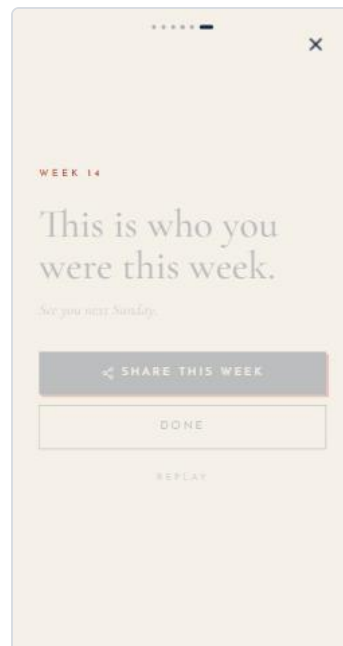

SS-78 · 08:47 ET · A · /ceremony · "WHAT YOU DISCOVERED Renaissance Florence, Great Lakes Shipwrecks"

SS-79 · 08:47 ET · A · /ceremony · "WHAT YOU WORKED THROUGH Things you didn't have a week ago." incl. Richard III (still in A's missed queue)

SS-80 · 08:47 ET · A · /ceremony · "WHAT YOU GAVE Uno Prova taught the room. You didn't earn author credit this week."

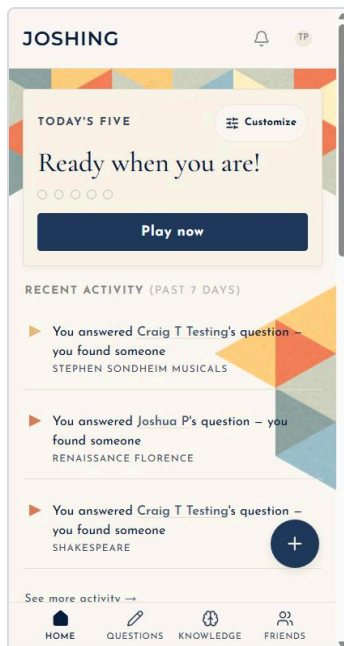

SS-81 · 08:48 ET · A · /ceremony · "This is who you were this week. See you next Sunday."

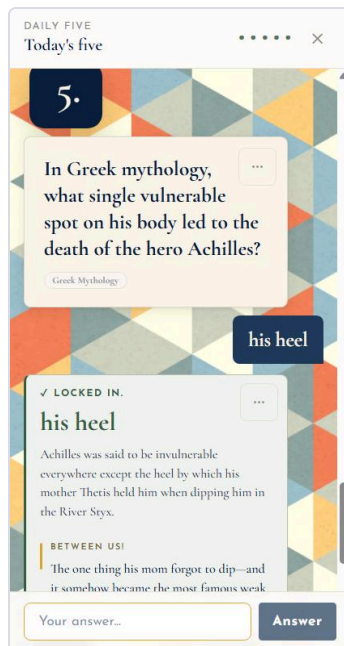

The 1 PM round (13:01–13:12)

- **B (blocked by A, no friends):** five plain questions, no bonus dots and no “+2 friend bonus”, and no “Duo” text anywhere. All five answered right (David → “Galleria dell'Accademia”, 1497 bonfire → “Bonfire of the Vanities”, “Malvolio”, “Bobby”, Achilles → “his heel”). Then a “SECOND LOOK · LAST SEEN SEPTEMBER 25” card appeared for a question B last saw at 8:22 this morning (S4).

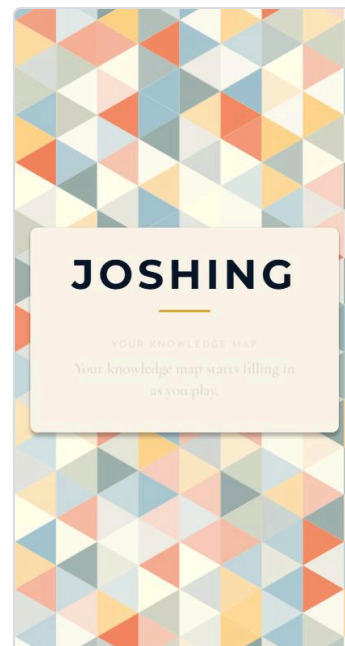

- **C:** the round took about a minute to build (“FINDING THE RIGHT MULTITUDES”, then “Your knowledge map starts filling in as you play.” — odd for someone with 70 points). The header first showed five dots with no bonus; after a reload it showed “+2 friend bonus”. The round includes **Greek Mythology** (added at 08:57) and **not** American Auto History (declined at 08:27).
- **A:** Juneau ✓; “Addison and Wilson Mizner” ✓; Bosworth crown “a thorn bush” → × “Close, but not quite. A hawthorn bush · Right plant family, wrong specific bush”; “The Soldier in White” ✓; “a pool table” ✓; “SECOND LOOK · LAST SEEN JUNE 23” (A joined June 24) → “Robert Bork” ✓; bonuses **FROM CRAIG'S WORLD** (none from B): “Ephesians” ✓ (an ambiguous “which letter” question, accepted), “Siegfried” ✓. End: “Strong.”
- **Argue your point** (A, 13:10) on the thorn-bush answer: “The traditional story says the crown was found in a thorn bush; a hawthorn is a thorn bush.” → the card flipped to “LOCKED IN.” and the dot turned green. Nothing tells the player the argument was accepted.
- A's home, round and recap agreed afterwards: all green, “+2 friend bonus”, “Five new tomorrow at 1 PM”.

SS-106 · 13:02 ET · B (blocked by A) · /
· New round: 5 empty dots, no “+2 friend bonus” (B has no friends)

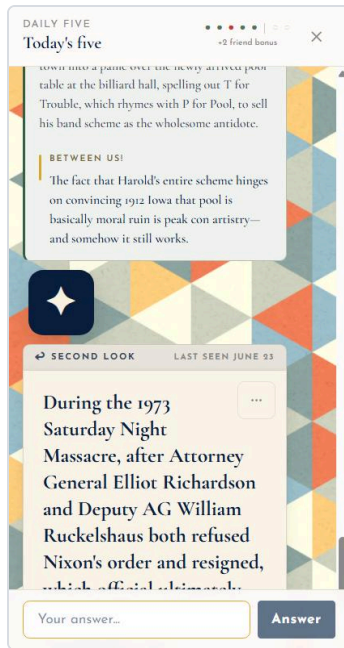

SS-107 · 13:03 ET · B · /daily · Round done — no “Duo”/“from Duo's world” anywhere; second-look card follows

SS-108 · 13:05 ET · C · /daily · ~60 s build; loader says “Your knowledge map starts filling in as you play.” to a player with 70 points

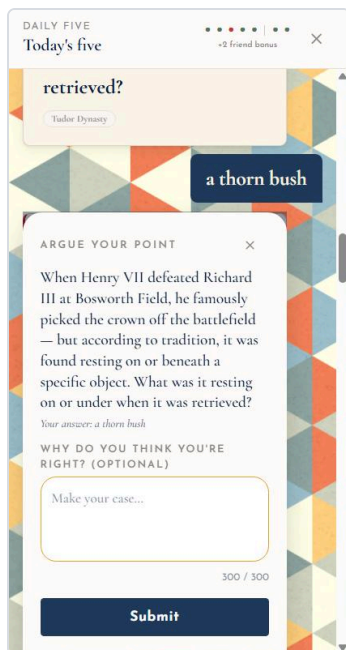

SS-109 · 13:08 ET · A · /daily · "a thorn bush" → "Close, but not quite. A hawthorn bush"

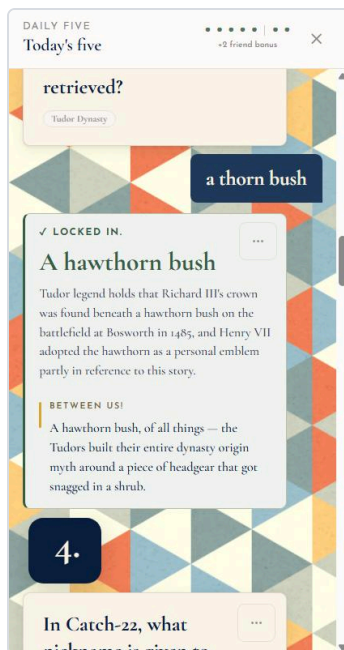

SS-110 · 13:09 ET · A · /daily · "SECOND LOOK · LAST SEEN JUNE 23" (A joined June 24)

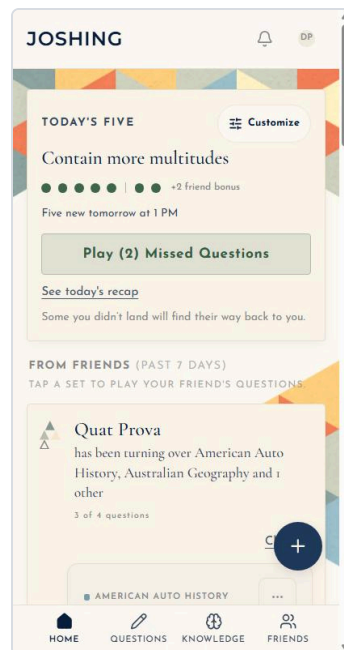

SS-111 · 13:10 ET · A · /daily · Bonuses FROM CRAIG'S WORLD; "Strong."

SS-112 · 13:10 ET · A · /daily · "ARGUE YOUR POINT" sheet

SS-113 · 13:11 ET · A · /daily · After arguing: card flips to "LOCKED IN." with no message

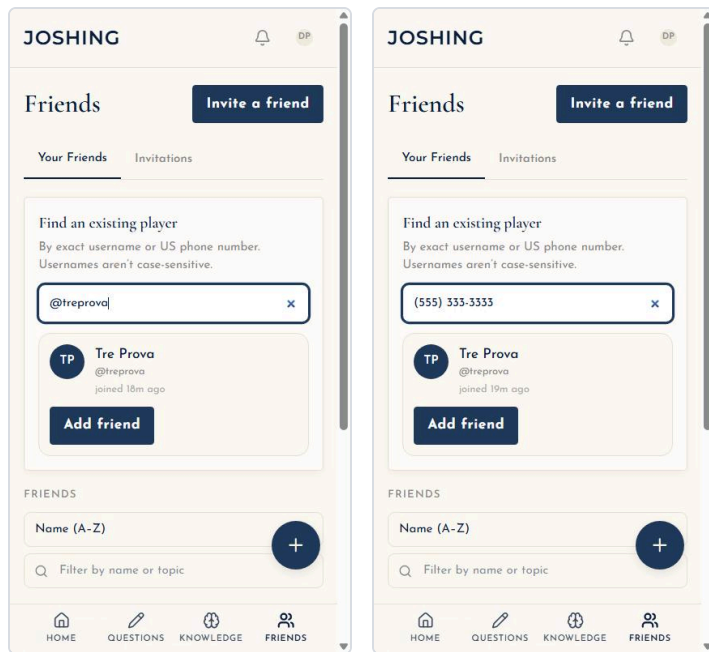

SS-114 · 13:12 ET · A · / · Home: all green, "+2 friend bonus", "Five new tomorrow at 1 PM"

5 · AREA 3 — FRIEND SYSTEM

Each step below starts from the 08:31 baseline. A and B were switched in one tab using the app's own sign-in calls (the same requests the login screen makes), because separate Chrome windows share one set of cookies here.

Step 1 — A finds B (08:33)

“@treprova” and “(555) 333-3333” both found “Tre Prova · @treprova · joined 18m ago · Add friend”. The name is no longer squeezed when “Requested / Cancel” show. **Fixed (S8).**

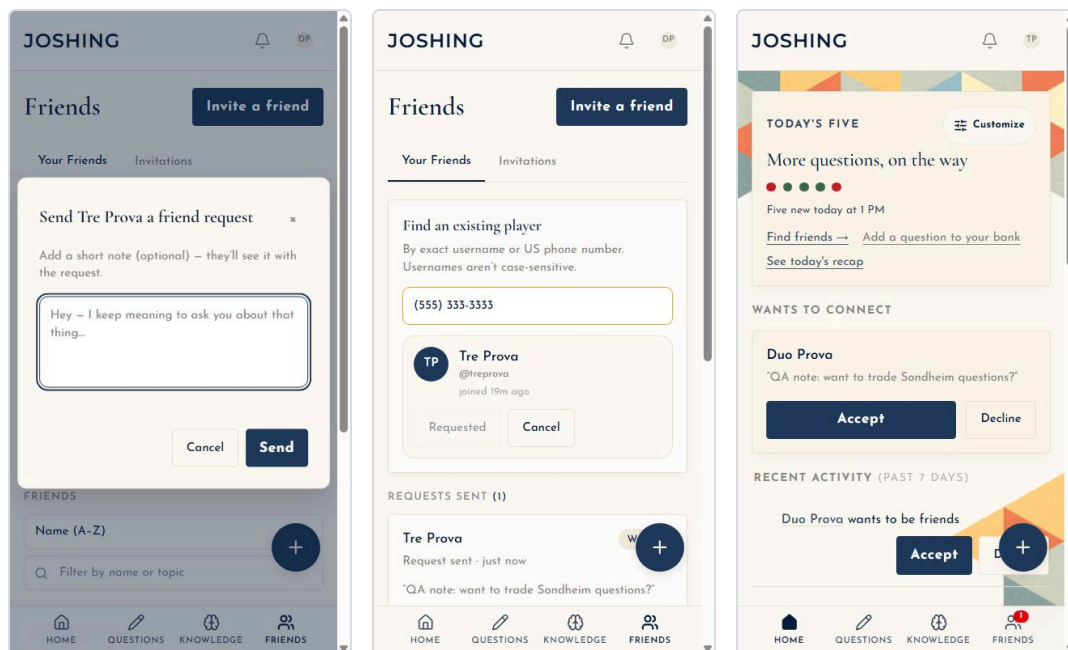

SS-49 · 08:33 ET · A · /friends · Step 1:
search “@treprova” → Tre Prova,
“joined 18m ago”, Add friend

SS-50 · 08:33 ET · A · /friends · Step 1:
search “(555) 333-3333” → Tre Prova

Step 2 — request with a note (08:33–08:34)

A's sheet: “Send Tre Prova a friend request · Add a short note (optional) — they'll see it with the request.”
B's home showed “WANTS TO CONNECT · Duo Prova · “QA note: want to trade Sondheim questions?” ·
Accept · Decline”. The same request also appeared a second time under Recent activity (see N12).

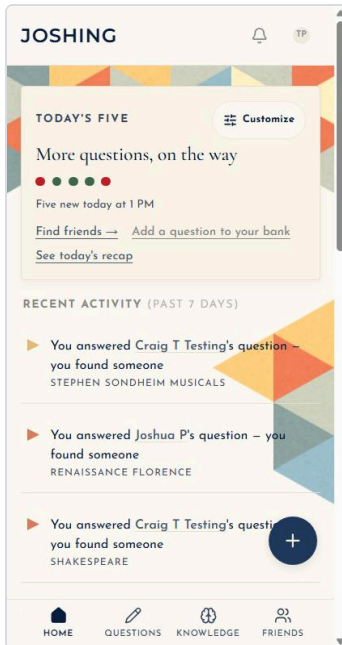

SS-51 · 08:33 ET · A · /friends · Step 2:
“Send Tre Prova a friend request” note
sheet

SS-52 · 08:34 ET · A · /friends · Step 2:
Requested/Cancel + REQUESTS SENT
(1) with note; “+” button covers
“Waiting”

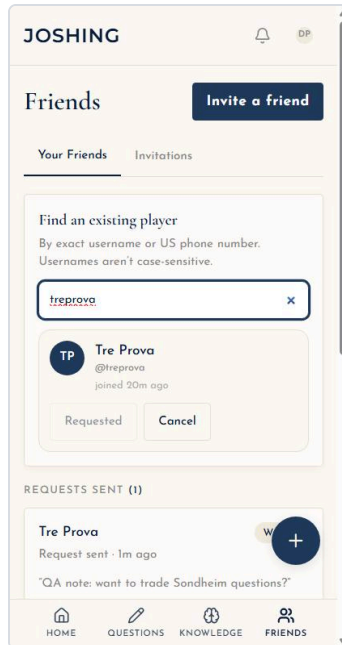

SS-53 · 08:34 ET · B · / · Step 2:
“WANTS TO CONNECT Duo Prova ‘QA
note...’” + duplicate row in Recent
activity; “+” covers Decline

Step 3 — B declines; A re-sends (08:34–08:36)

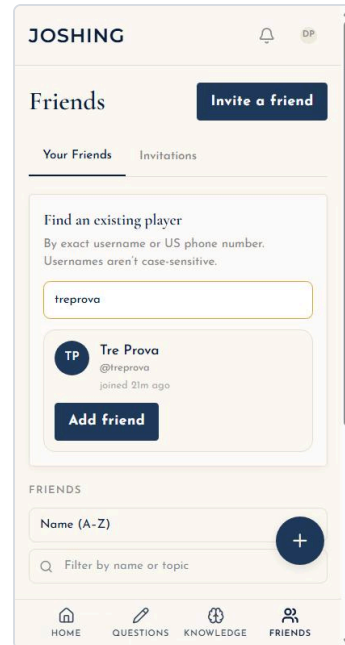

Decline removed both copies and the Friends badge at once. A still saw “Waiting” (the decline is not revealed). A pressed Cancel — the search card and “Requests sent” updated together (**fixed, S9**) — then sent again with a new note. B saw nothing: the re-send is quietly suppressed. The database kept A's request as declined with the new note, which is why A's list said “Request sent · 2m ago” for a request sent seconds before.

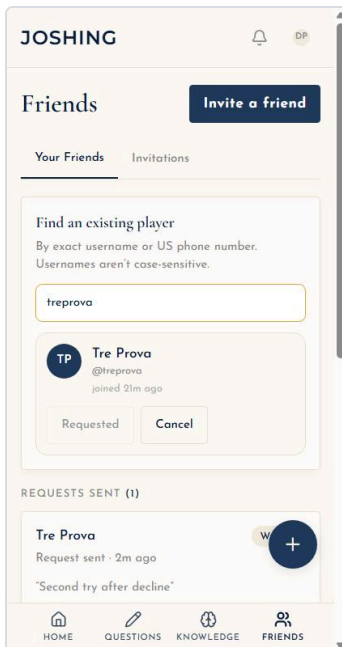

SS-54 · 08:34 ET · B · / · Step 3: after Decline — both rows and badge gone

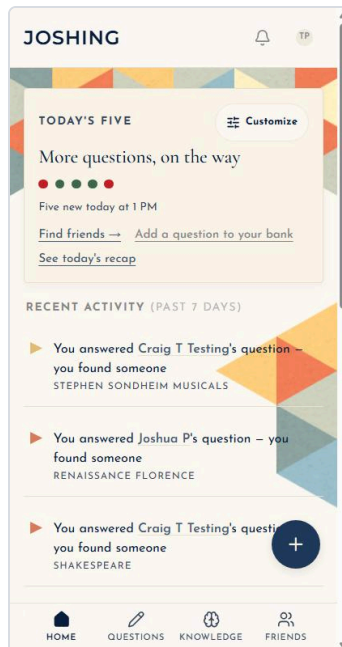

SS-55 · 08:35 ET · A · /friends · Step 3: A still sees “Waiting” (decline not revealed)

SS-56 · 08:35 ET · A · /friends · Step 3: Cancel → card “Add friend” and Requests Sent gone together

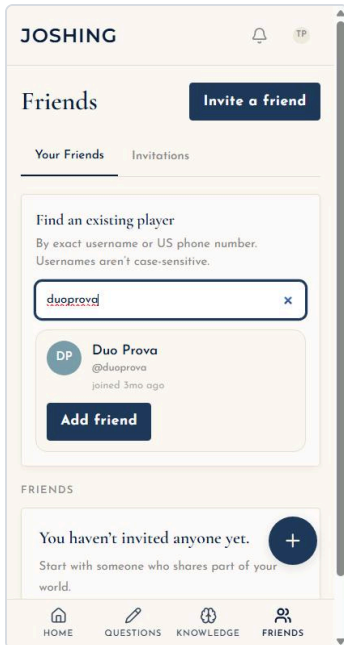

SS-57 · 08:36 ET · A · /friends · Step 3: re-send → “Request sent · 2m ago” “Second try after decline”

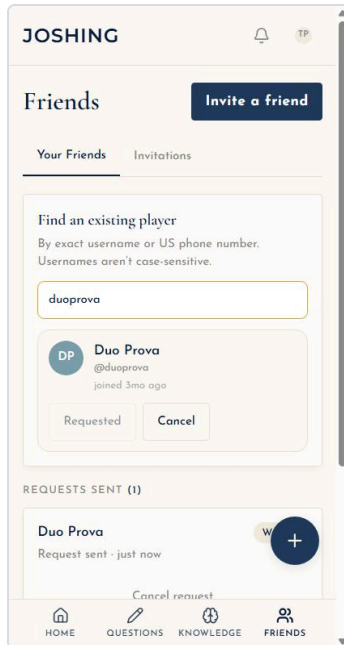

SS-58 · 08:36 ET · B · / · Step 3: re-sent request not shown to B (suppressed)

Step 4 — B asks, A accepts (08:36–08:42)

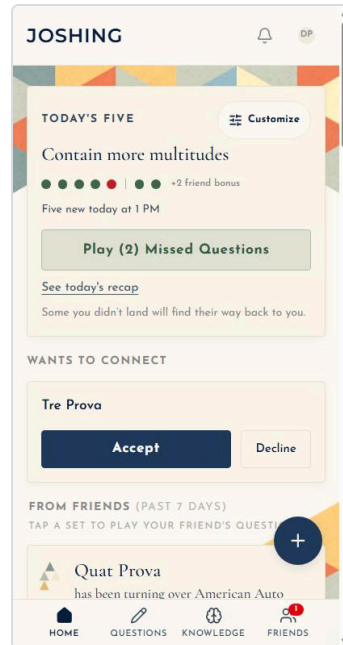

B's search showed a plain “Add friend” for A (A's suppressed request did not leak). B's “Requests sent” appeared at once. A accepted from home and saw “You and Tre Prova are now friends.” (**fixed, N11**). Every surface agreed: both friends lists, search (“Friends ✓ Unfriend”), both profiles, “People you invited” (Tre: “Joined through your link · Friends”), and invite-by-phone (“ALREADY FRIENDS · You're already friends with Tre.”, straight after the phone step — **fixed, N4**).

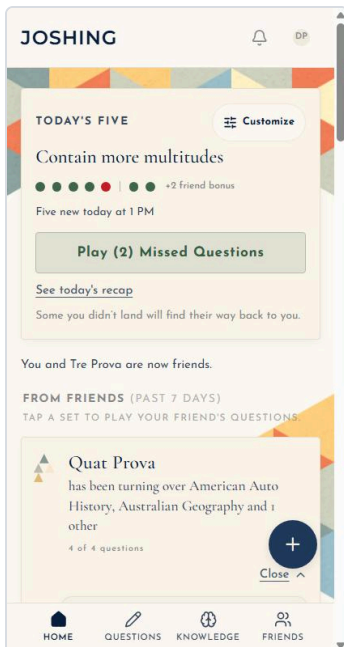

SS-59 · 08:36 ET · B · /friends · Step 4: B searches duoprova → “Add friend” (no leak)

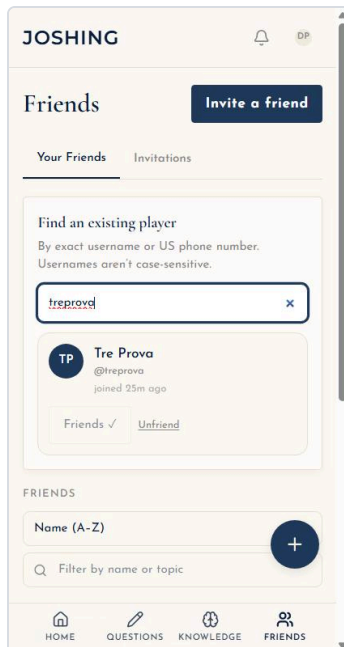

SS-60 · 08:37 ET · B · /friends · Step 4: B's Requests Sent appears immediately

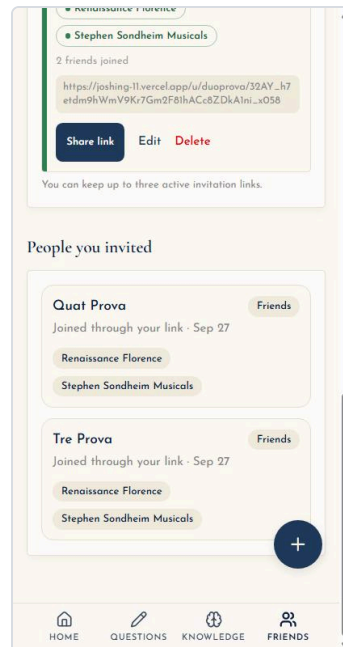

SS-61 · 08:37 ET · A · / · Step 4: “WANTS TO CONNECT Tre Prova”

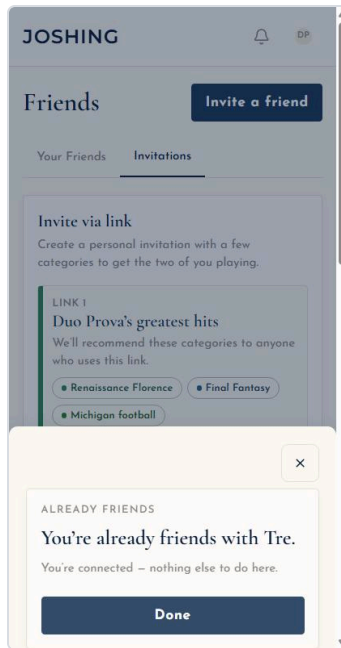

SS-62 · 08:38 ET · A · / · Step 4: “You and Tre Prova are now friends.”

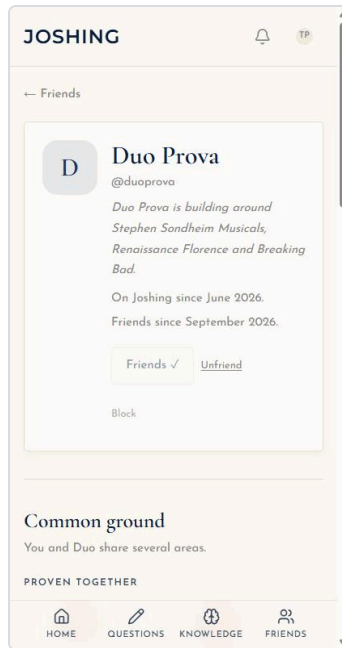

SS-63 · 08:39 ET · A · /friends · Step 4: search → “Friends ✓ Unfriend”

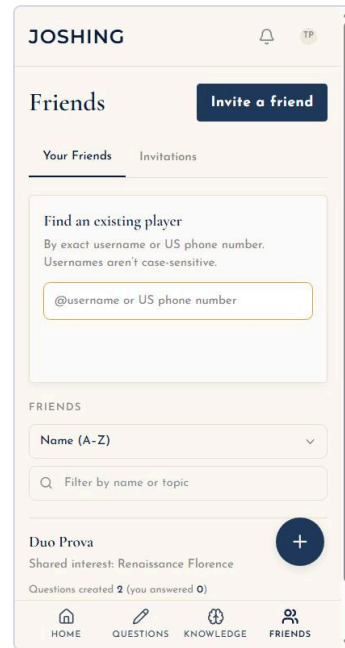

SS-42 · 08:29 ET · A · /friends Invitations · “People you invited”: Quat Prova, Tre Prova — “Joined through your link · Sep 27 · Friends”; LINK 3 “2 friends joined”

SS-64 · 08:40 ET · A · /friends?invite=1 · Step 4: invite-by-phone → "You're already friends with Tre."

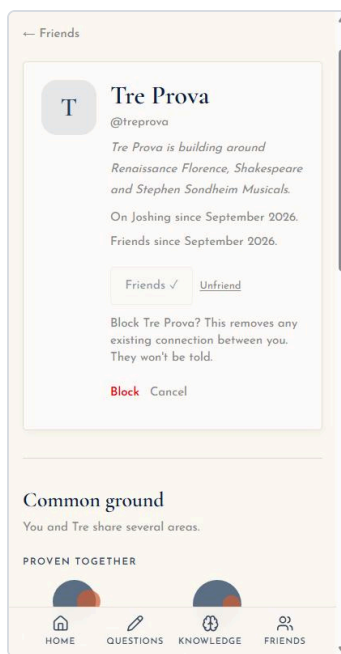

SS-65 · 08:40 ET · B · /users/(A) · Step 4: B sees A "Friends ✓"

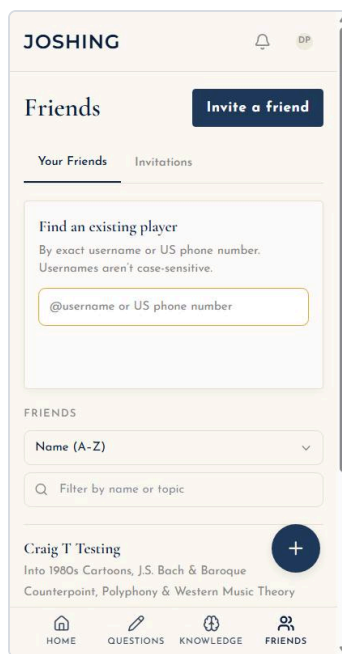

SS-66 · 08:42 ET · B · /friends · Step 4: B's friends list: Duo Prova

Step 5 — A blocks B (08:43–08:49)

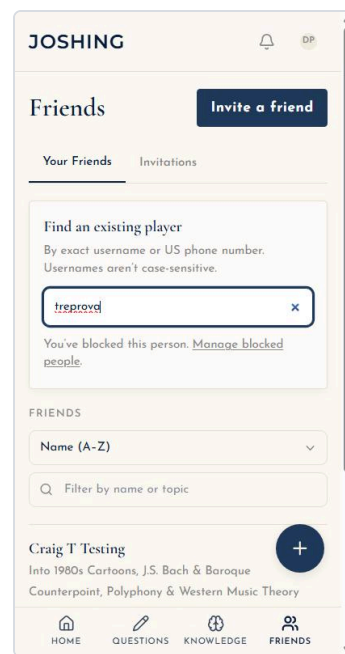

Confirm text: "Block Tre Prova? This removes any existing connection between you. They won't be told." After Block, A lands on Friends with no confirmation. On A's side B is gone from the friends list and "People you invited"; search says "You've blocked this person. Manage blocked people." (**fixed, N5**); B's profile says "You've blocked Tre Prova"; the Blocked list shows B with "Unblock"; A's feed has no B rows. On B's side: no friends, search for A by handle or phone says "No matching player found", A's profile says "Nothing to see here", and B's home and recap contain no "Duo" text.

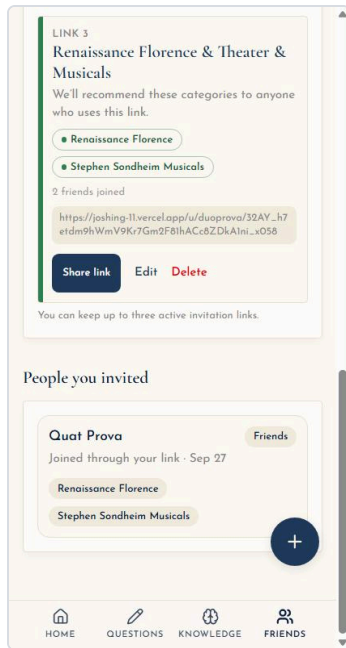

SS-67 · 08:43 ET · A · /users/(B) · Step 5: "Block Tre Prova? This removes any existing connection between you. They won't be told."

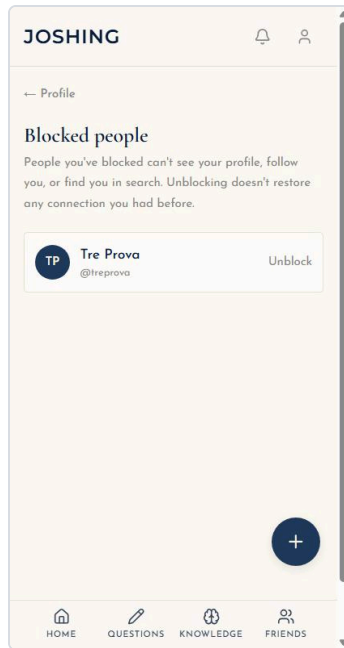

SS-68 · 08:43 ET · A · /friends · Step 5: after Block — lands on /friends, B gone, no confirmation

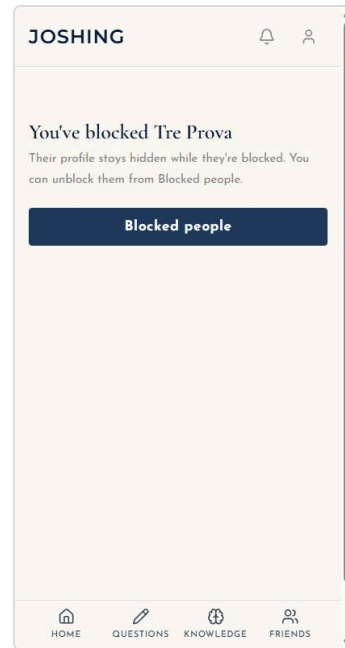

SS-69 · 08:43 ET · A · /friends · Step 5: search treprova → "You've blocked this person. Manage blocked people."

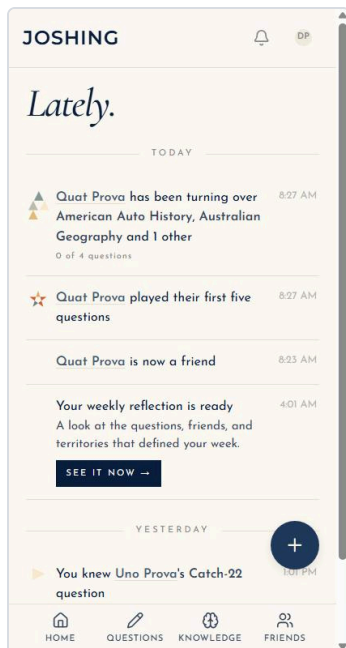

SS-70 · 08:43 ET · A · /friends
Invitations · Step 5: People you invited shows only Quat; LINK 3 still "2 friends joined"

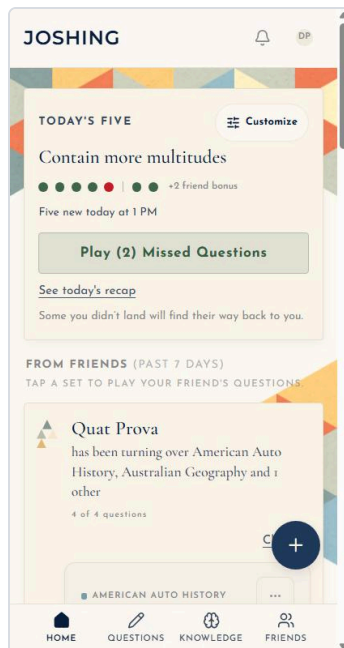

SS-71 · 08:44 ET · A · /blocked · Step 5:
Tre Prova listed with Unblock

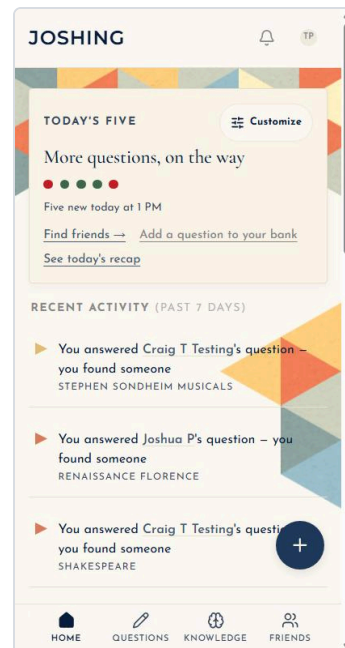

SS-72 · 08:44 ET · A · /users/(B) · Step 5:
"You've blocked Tre Prova"

SS-74 · 08:44 ET · A · /activities · Step 5:
no Tre rows; Quat set "0 of 4 questions"

SS-75 · 08:45 ET · A · / · Same Quat set
on home: "4 of 4 questions"

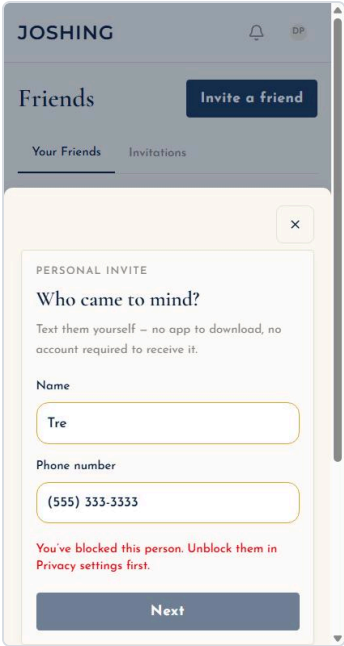

SS-82 · 08:49 ET · B (blocked) · / ·
Home: no Duo rows, no bonus attributions

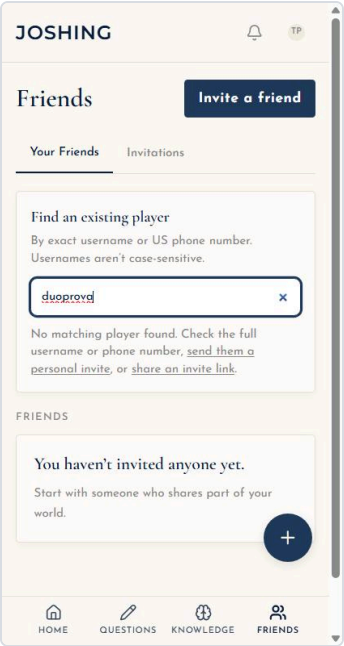

Step 6 — trying to reconnect while blocked (08:44–08:53)

WHO → WHOM	ROUTE	WHAT HAPPENED
A → B	Friend request	Not offered; search says "You've blocked this person."
A → B	Invite by phone	"You've blocked this person. Unblock them in Privacy settings first."

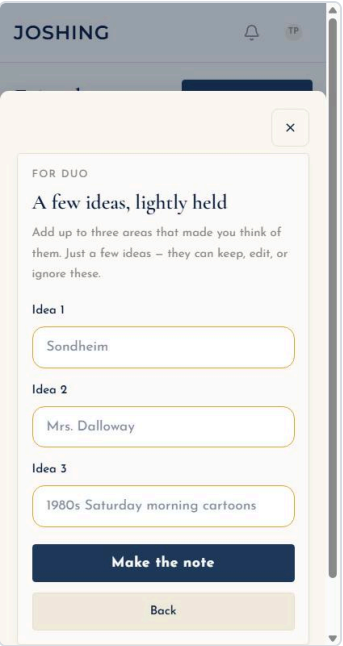

B → A	Friend request	Not possible; A can't be found.
B → A	Invite by phone	Flow runs to "INVITE READY Send this to Duo." (hides the block — right). When A opened that link: "Tre Prova invited you to Joshing" → Accept → "This invitation is no longer available for this account."
B → A	A's invite link	Card "Play Duo Prova's greatest hits" still shows → Accept → "This invitation is no longer available." No friendship formed (checked in the database at 08:53).

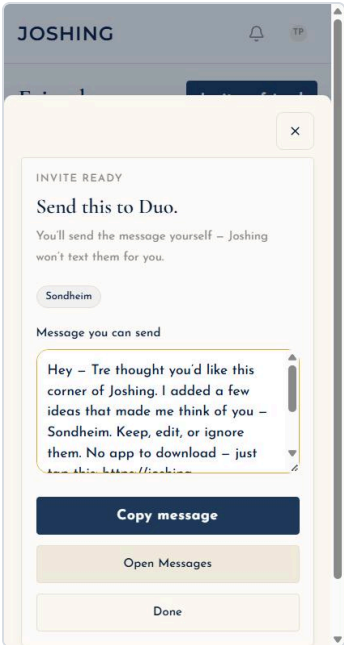

SS-73 · 08:44 ET · A · /friends?invite=1 · Step 6: invite-by-phone to B → "You've blocked this person. Unblock them in Privacy settings first."

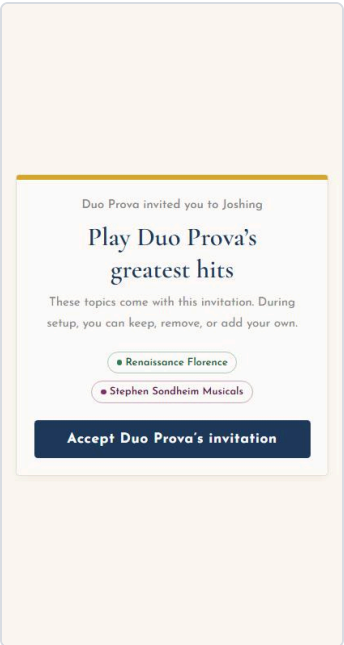

SS-83 · 08:50 ET · B · /friends · Step 6: search duoprova/555222222 → "No matching player found... send them a personal invite, or share an invite link."

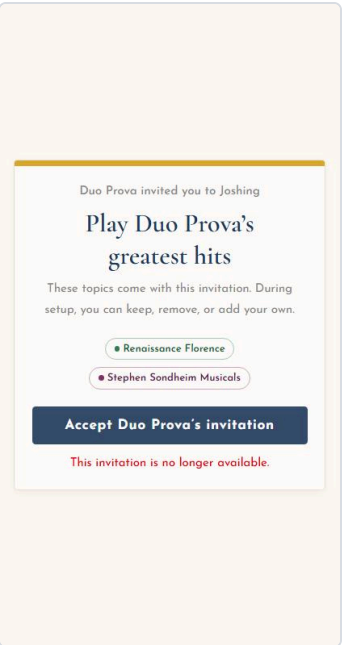

SS-84 · 08:51 ET · B · /friends?invite=1 · Step 6: personal invite to A's number proceeds to "A few ideas, lightly held"

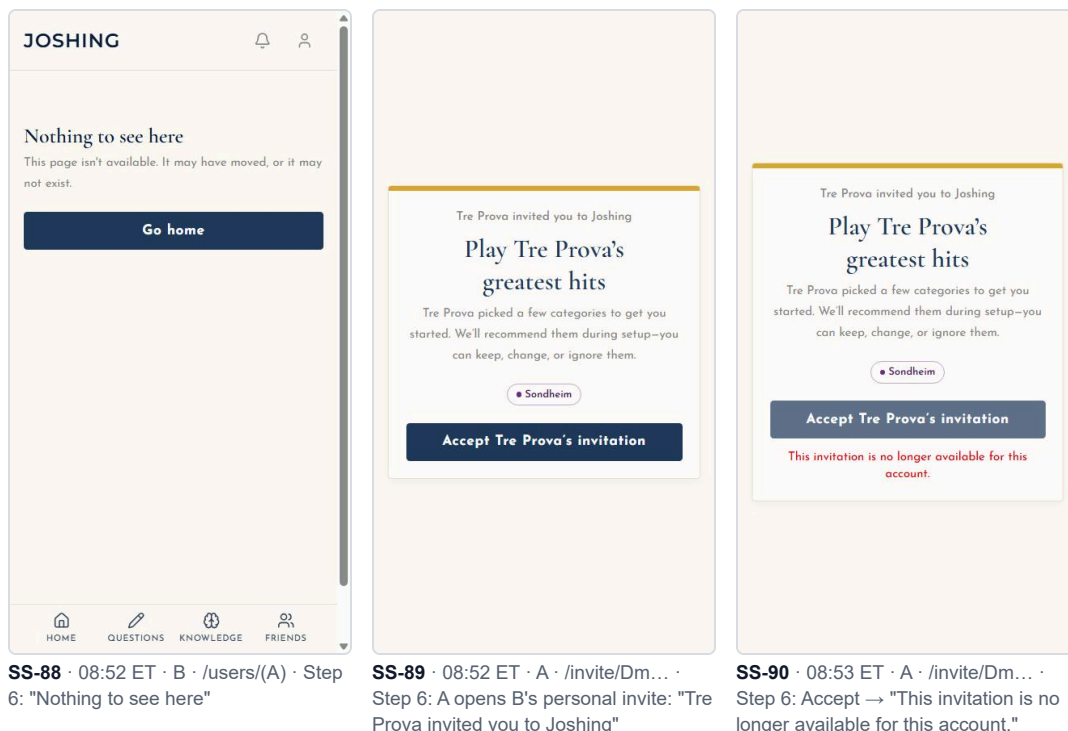

SS-85 · 08:51 ET · B · /friends?invite=1 · Step 6: "INVITE READY Send this to Duo."

SS-86 · 08:52 ET · B · /u/duoprova/32AY... · Step 6: blocked B still sees "Play Duo Prova's greatest hits" invite card (Link 3 shows Link 1's name)

SS-87 · 08:52 ET · B · /u/duoprova/32AY... · Step 6: Accept → "This invitation is no longer available." (no way back to the app)

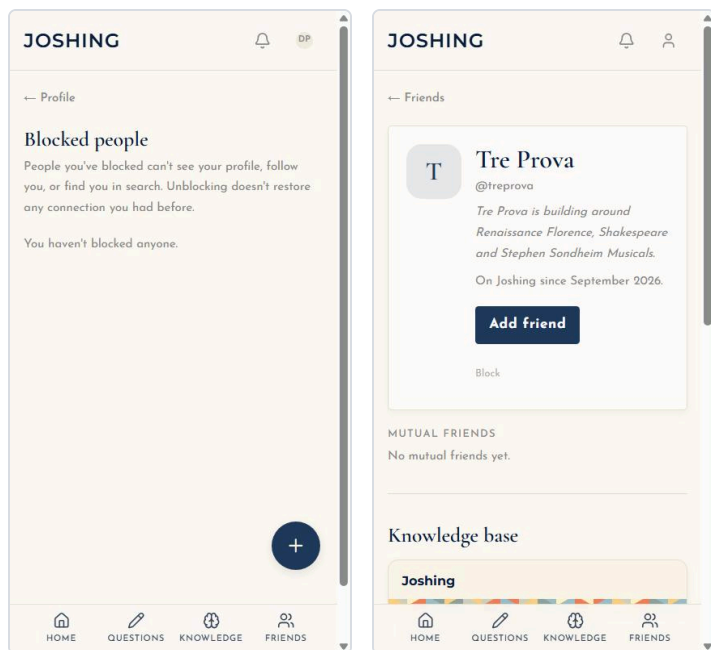

B's round while blocked (13:02)

Yesterday this was untested. Today the block stayed in place across the 1 PM rollover: B's new round had no bonus from A (B had no friends at all, so no bonus slots), and A's new round took both bonuses from Craig, none from B.

Step 7 — A unblocks B (13:13)

Unblock has no confirm step. Afterwards the Blocked list is empty, the database has no follow or block rows between A and B, and B's profile shows "Add friend" — the friendship did **not** come back. B's own feed stayed clean. A's Lately, however, showed "Tre Prova played their first five questions · 8:17 AM" again (B had been A's invitee; see Q8), and "Quat Prova is now a friend" twice (8:23 and 8:59 — the second from C pressing Accept on the link while already a friend, N8).

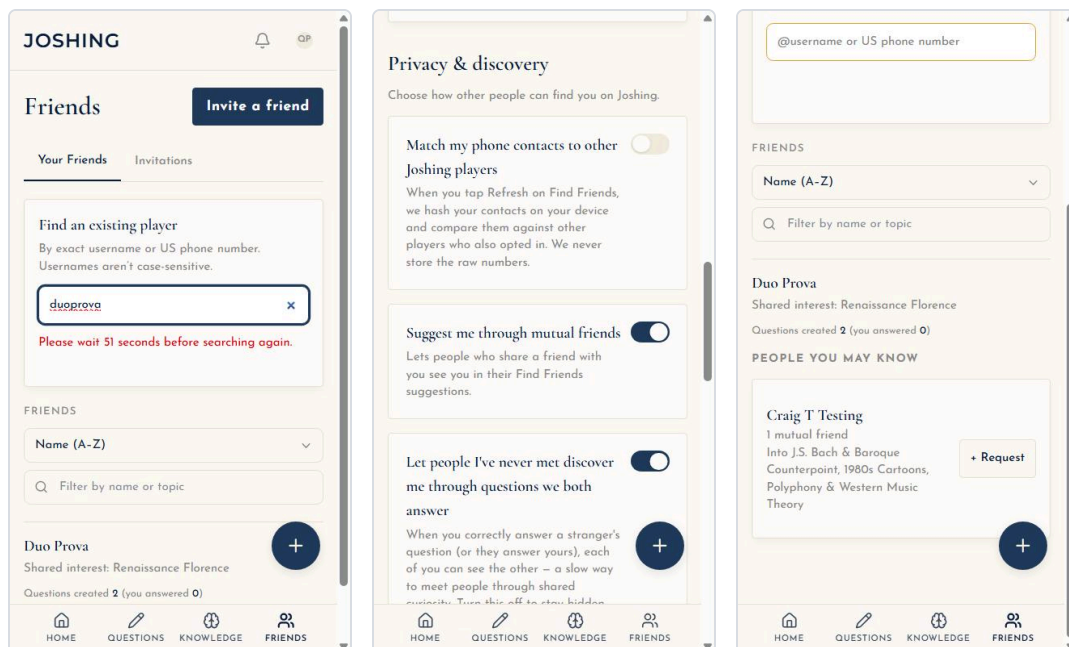

SS-115 · 13:13 ET · A · /blocked · Step 7: after Unblock — "You haven't blocked anyone."

SS-116 · 13:13 ET · A · /users/(B) · Step 7: not friends — "Add friend"

Other checks

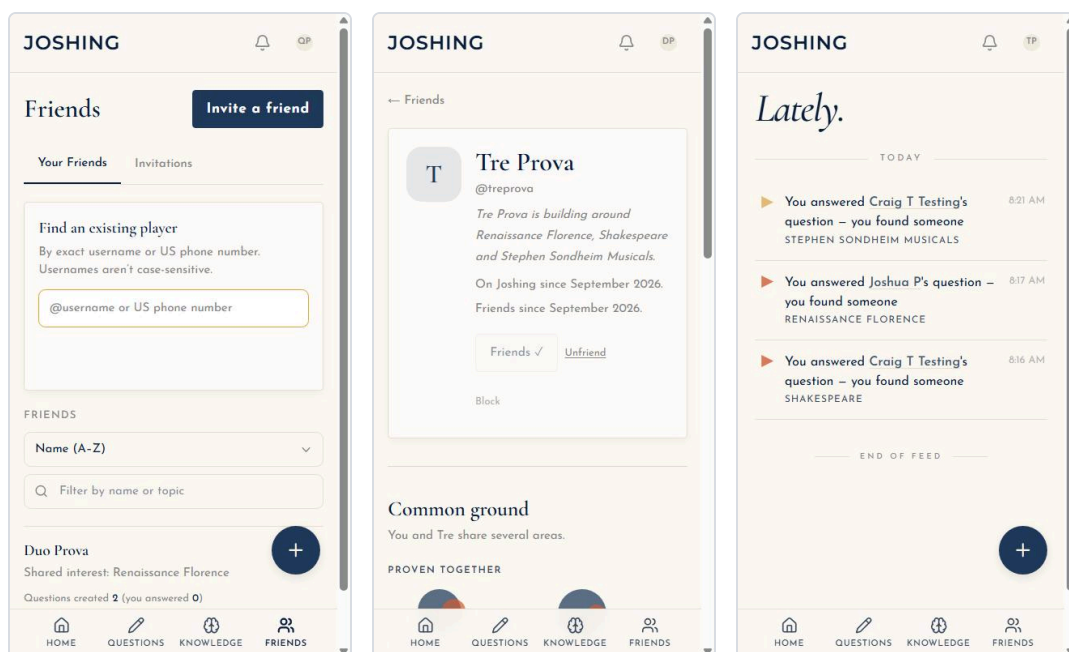

- **Search rate limit** (C, 09:00): 8 searches in a minute are allowed; the 9th returns 429 and the box says "Please wait 51 seconds before searching again."
- **Mutual-friend suggestions** (C, 09:02): after C turned on "Suggest me through mutual friends", C's Friends page showed "PEOPLE YOU MAY KNOW · Craig T Testing · 1 mutual friend · + Request" (Craig has the setting on; the shared friend is A). They surface only on the Friends page.
- **Friend profiles:** overlap shows as "Common ground · PROVEN TOGETHER" and a knowledge portrait by topic. A's portrait as seen by B: 5 topics + "+3 more territories" = "1,239 knowledge points across 8 territories" — the numbers add up.
- **Strangers in feeds:** B's feed shows "You answered Craig T Testing's question — you found someone" and the same for Joshua P. Neither is B's friend; both have stranger discovery ON (database), so this is consented. Question bylines on public questions are a separate matter (Q7).
- **Co-invitees:** B and C both joined through the **same** link (Link 3). Each became A's friend; B and C did **not** become friends and got no suggestion of each other (database, 08:24; C's Friends page 08:28).

SS-99 · 09:00 ET · C · /friends · After 8 searches in a minute: "Please wait 51 seconds before searching again."

SS-100 · 09:02 ET · C · /users/(C) · C turns ON "Suggest me through mutual friends"

SS-101 · 09:03 ET · C · /friends · "PEOPLE YOU MAY KNOW Craig T Testing · 1 mutual friend · + Request"

SS-41 · 08:28 ET · C · /friends · C's only friend is Duo Prova (not Tre, who used the same link)

SS-43 · 08:30 ET · A · /users/(B) · B's profile as friend: "Friends ✓ Unfriend", "73 knowledge points across 3 territories"

SS-47 · 08:32 ET · B · /activities · Lately: no "Duo Prova is now a friend" row after unfriend

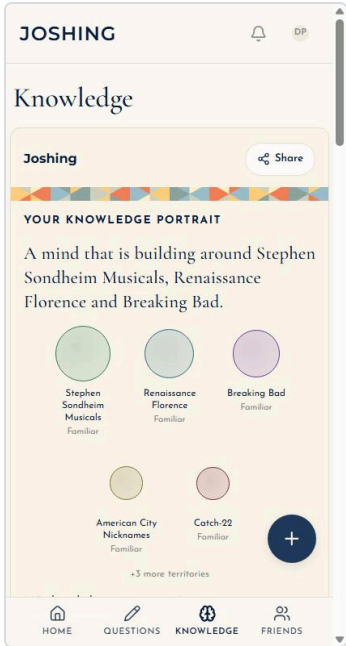

6 · AREA 4 — KNOWLEDGE & PROFILE

- **Numbers add up:** A — 5 circles + "+3 more territories" = "across 8 territories". C — "70 knowledge points across 2 territories" (Meredith Willson +60, Australian Geography +10 from the recap; American Auto History's +10 isn't a territory because C said "Not now" to adding it).
- **Views and legends:** Mastery view groups topics under text headings ("FAMILIAR", "ESTABLISHING") with "Grouped by level: Mastery → Solid → Familiar → Establishing"; Frequency

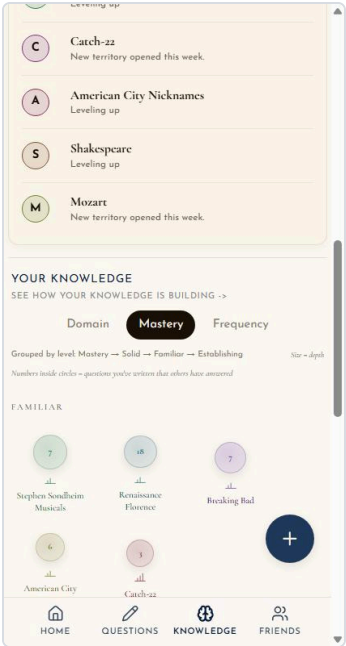

view uses “Often” / “Sometimes” headings plus a bar icon. Levels can be told apart without color.

Improved (N7).

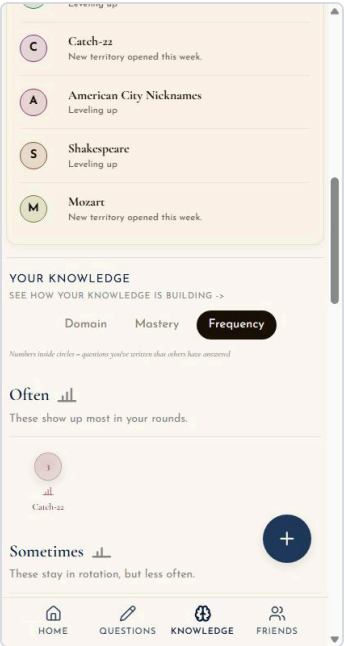

- **Declaring an interest** (C, 08:57): “Added "Greek Mythology" — it'll show up in an upcoming round.” At 1 PM C's new round included a Greek Mythology question, so declaring an interest visibly changes what comes next. The declined American Auto History did not appear.
- **Where typed topics land:** “Greek Mythology” → HISTORY. C's “Australian Geography” is stored as History in the database but shown under GEOGRAPHY on C's screen, while the same topic sits under HISTORY on A's screen. “American Auto History” is its own top-level category on both. Suggestion chip “90's Bollywood” is still there. See S3.

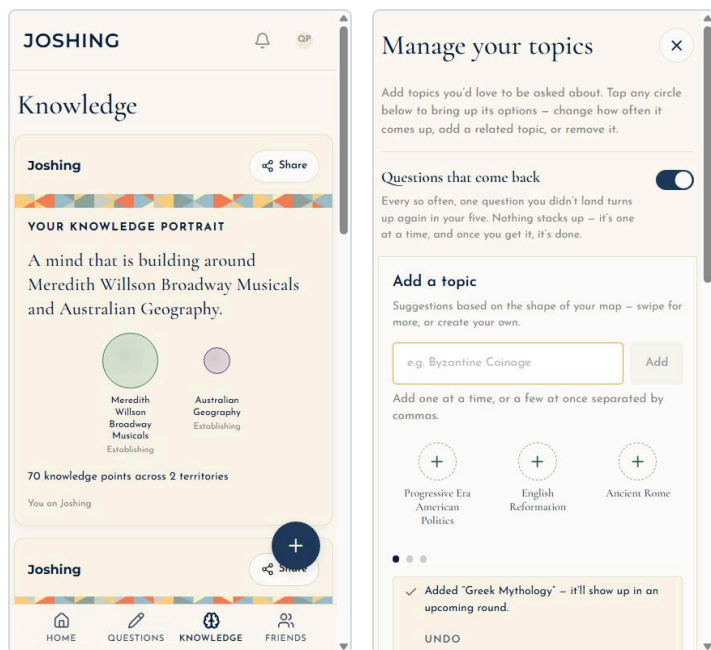

SS-91 · 08:55 ET · A · /knowledge · Portrait: 5 circles + "+3 more territories" / "1,239 knowledge points across 8 territories"

SS-92 · 08:56 ET · A · /knowledge · Mastery view: text group headings (FAMILIAR / ESTABLISHING)

SS-93 · 08:56 ET · A · /knowledge · Frequency view: "Often"/"Sometimes" headings + bar icons

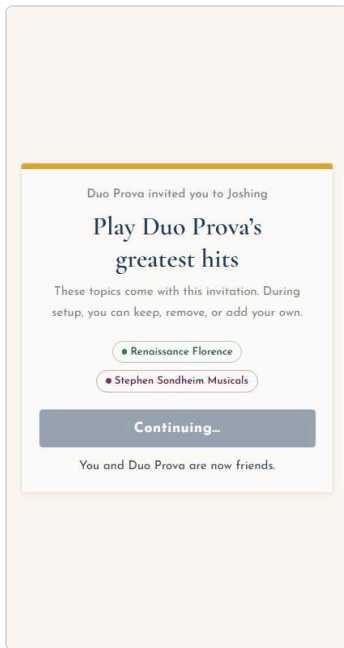

SS-94 · 08:57 ET · C · /knowledge · C portrait "70 knowledge points across 2 territories"

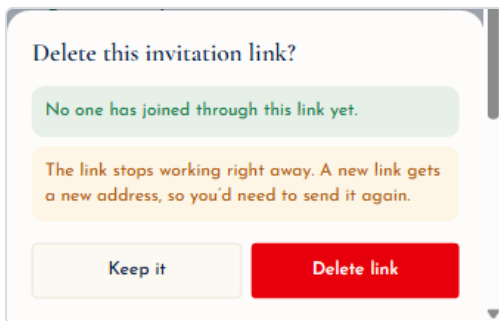

SS-95 · 08:57 ET · C · /daily/setup · Added "Greek Mythology" — "it'll show up in an upcoming round."

7 · AREA 5 — INVITE SYSTEM

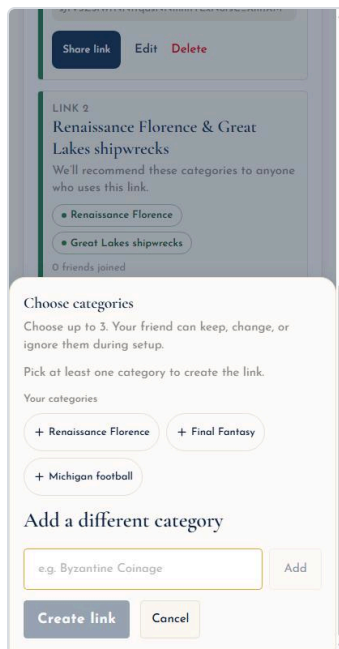

- **A creates a link** (08:11–08:13): A already had the maximum of three, so the old Link 2 (“Michigan football”, o joined) was deleted first. The delete sheet now says “No one has joined through this link yet.” (**fixed, N1**) and the toast says “Link deleted. Friends kept.” The create sheet shows a neutral “Pick at least one category to create the link.” hint instead of a red error (**improved, N2**), but still offers only 3 of A's topics. The new link is titled “Renaissance Florence & Theater & Musicals” although its chips are Renaissance Florence and Stephen Sondheim Musicals (N1).
- **Fresh redeem** (C and B): friendship formed silently; “People you invited” lists both (“Joined through your link · Sep 27 · Friends”) and Link 3 shows “2 friends joined”. **Fixed (S6)**.
- **Existing player, already a friend** (C, 08:59): card shows, Accept → “You and Duo Prova are now friends.” — though they already were.
- **Existing player while blocked** (B, 08:52): see step 6 — card shows, Accept fails, no way back into the app from that page.
- **Deleted link and made-up link** (C, 08:58): “Invitation unavailable · This invitation link is no longer valid. · Go to login” — the button says "Go to login" to someone already signed in.
- **Expired link**: untested (see section 11).
- **Existing player, not a friend, after unblock** (B, 13:15): card → Accept → “You and Duo Prova are now friends.” — the friendship formed (an invite link counts as consent).
- **Suggestions after that**: B and C now shared A as a friend. C had “Suggest me through mutual friends” on, B had it off; B's Friends page showed no suggestions.

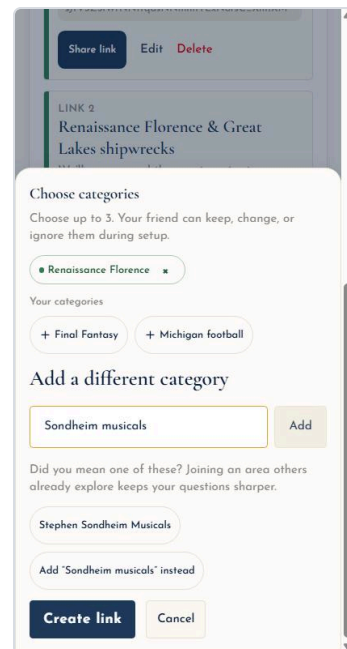

SS-117 · 13:15 ET · B ·
/u/duoprova/32AY... · Existing
(unblocked) B redeems link → "You and Duo Prova are now friends."

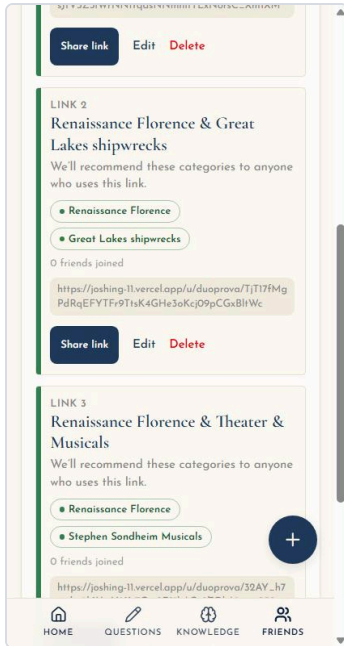

SS-11 · 08:11 ET · A · /friends Invitations · Delete-link sheet: "No one has joined through this link yet."

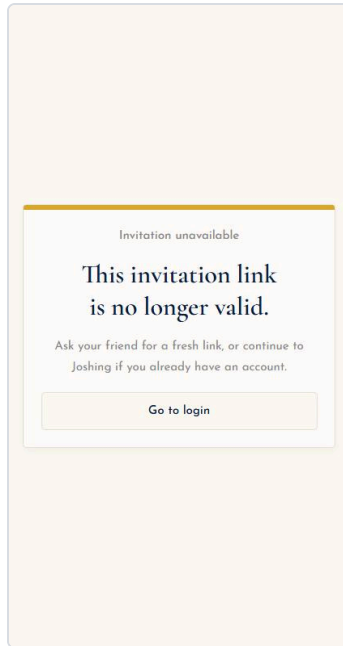

SS-12 · 08:12 ET · A · /friends · Create-link sheet: neutral "Pick at least one category..." hint; "Your categories" offers 3 topics

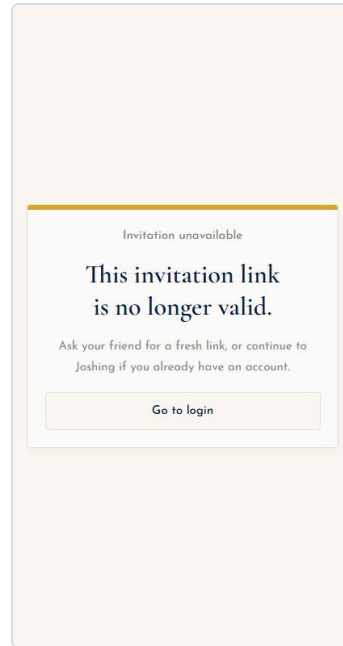

SS-13 · 08:12 ET · A · /friends · Typing "Sondheim musicals" suggests existing "Stephen Sondheim Musicals"

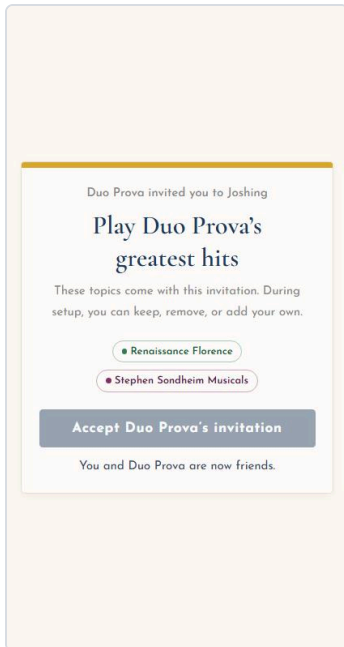

SS-14 · 08:13 ET · A · /friends · New LINK 3 titled "Renaissance Florence & Theater & Musicals" though its chips are Renaissance Florence + Stephen Sondheim Musicals

SS-96 · 08:58 ET · C · /u/duoprova/(deleted link) · "This invitation link is no longer valid." + "Go to login" (while signed in)

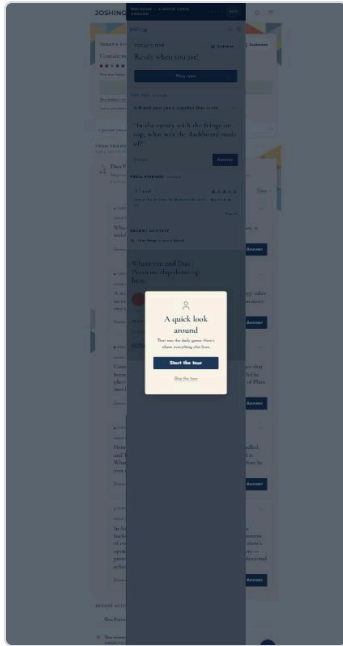

SS-97 · 08:58 ET · C · /u/duoprova/not-a-real-token-123 · same page

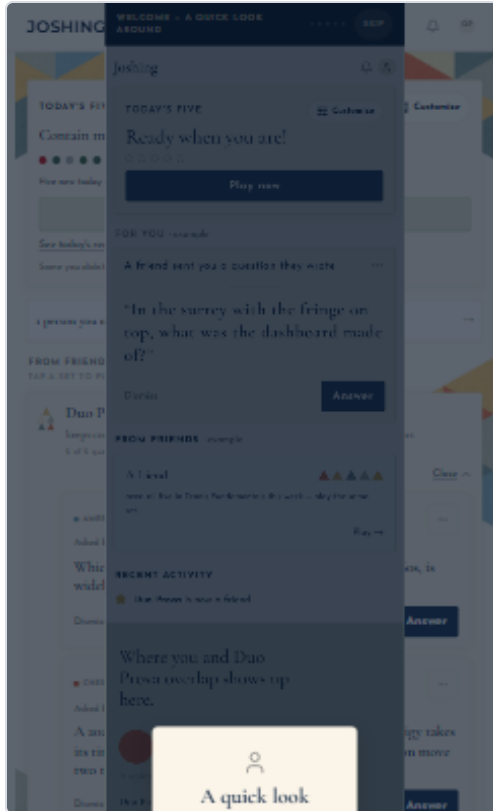

SS-98 · 08:59 ET · C · /u/duoprova/32AY... · Already-friend C presses Accept → "You and Duo Prova are now friends."

8 · DESKTOP PASS (1280 PX)

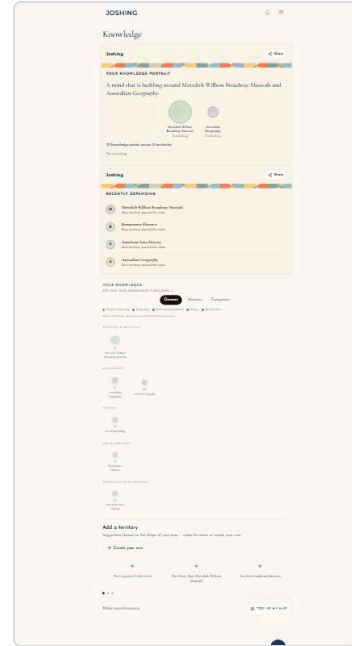

Pages render in a centered column and behave the same. The one difference: the welcome tour is a phone-width column in the middle of the screen, while the real home page shows, undimmed, on both sides, and the tour's header overlaps the site header (N18).

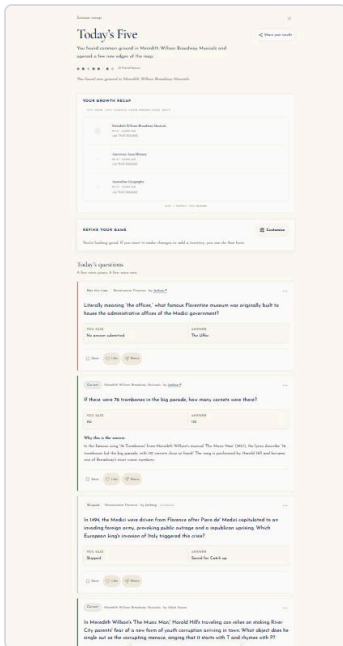

SS-102 · 09:04 ET · C · / (1280px frame) · Desktop: welcome tour is a phone-width column; real home shows undimmed on both sides

SS-103 · 09:04 ET · C · / (1280px frame) · Desktop zoom: tour header overlaps the real JOSHING header

SS-104 · 09:06 ET · C · /knowledge (1280px frame) · Desktop knowledge page: centered column, category legend + headings

SS-105 · 09:06 ET · C · /daily/summary (1280px frame) · Desktop recap: centered column, same content

9 · PRIORITIZED ISSUES

Critical

None. Nothing lost data, exposed private data, or blocked a core flow; no candidate needed a second reproduction.

Should-fix

Each item below was checked against the code (and the "known deliberate decisions" list) after the walkthrough, to confirm it is a real problem and not intended behaviour. See "Reviewed and dropped" at the end of this section.

S1 · REPRODUCED 2/2 · CONFIRMED IN CODE

Home and Lately disagree about a friend's question set: "4 of 4" vs "0 of 4".

REPRO 08:44 ET · A · /activities → "Quat Prova has been turning over American Auto History, Australian Geography and 1 other · 0 of 4 questions". 08:45 · A · / → the same set: "4 of 4 questions". A had answered none of them.

SCREENS SS-74, SS-75

Cause (checked) — the same component, `src/components/activity/ActivityStreamItem.tsx`, prints *questions left* in its home layout (line 415: `total - answered`) and *questions answered* in its Lately layout (line 554: `answered`), with identical "x of y questions" wording. Pick one meaning (the home comment says "count down what's still answerable") and use it in both.

S2 · SEEN ONCE · CONFIRMED IN CODE

A topic the player declined is shown as "in rotation", though the game will never ask it.

REPRO 08:27 ET · C · /daily · after a right bonus answer, "NEW TERRITORY · Add American Auto History to your topics?" → "Not now". 08:57 · C · /daily/setup → American Auto History appears under "Sometimes · These stay in rotation, but less often." The database has no declared interest and no frequency for it.

SCREENS SS-95

Cause (checked) — the server is right: a topic first opened by a +2 bonus gets no rotation record until the player says yes (B-DOMAIN-BONUS-ROTATION-01; C has no `PLAYER_MASTERY` row for it), so the Daily Five never draws from it. The page is wrong: `usePeakDetail` shows any topic with no saved frequency as "Sometimes". And picking a frequency there only saved a preference, which still wouldn't add the missing record. **Fixed on branch fix/qa-2026-09-27** (see section 15).

Topics are still filed in wrong or inconsistent categories.

REPRO 08:55 ET · A · /knowledge: Australian Geography under HISTORY; American Auto History as its own top-level category; Chess Openings under OTHER INTERESTS. 08:57 · C: typed “Greek mythology” → HISTORY. C's own “Australian Geography” is stored with `broadCategory = "History"` but drawn under GEOGRAPHY on C's page — so the same topic lands in different places for different people.

SCREENS SS-91, SS-94, SS-95, SS-104

"SECOND LOOK · LAST SEEN ..." shows the wrong day — sometimes a day before the player existed.

REPRO 13:03 ET · B · /daily · the Sweeney Todd question returns as “SECOND LOOK · LAST SEEN SEPTEMBER 25”. B's account was created at 08:14 today and B last answered it at 12:22 UTC (08:22 ET) today. 13:09 · A · /daily · “SECOND LOOK · LAST SEEN JUNE 23”; A's account was created on June 24.

SCREENS SS-107, SS-110

Cause (checked) — two errors stack. (1) For generated questions, `src/server/db/queries/missed-return.ts` uses the round's `queue_date (max(queue_date))` as “last seen”, not when the player answered; B's morning round is dated 2026-09-26 because rounds run 1 PM to 1 PM. (2) That date is stored as midnight UTC (“2026-09-26T00:00:00.000Z” in B's slot) and `returnSourceLabel` in `src/components/play/GameplayChat.tsx` formats it in the player's time zone, which in ET is the evening before. Use the answer time (as the canonical-question branch already does, from `MASTERY_EVENTS.created_at`), or format date-only values in UTC.

Reviewed and dropped or downgraded

- **Stranger's name shown after a wrong answer — downgraded.** B saw “CRAIG'S WORLD INCLUDES THIS”, “by Craig T Testing” and “Craig T Testing gave you this” for a question by someone who isn't B's friend. The code only serves a stranger's question when its author set it to **Public** (`visibility = 'public'` in `src/server/db/queries/daily.ts`), and the “{name}'s world includes this” line is deliberately shown only on wrong answers (the connection-moment idea). So the name is covered by the author's own choice. What remains is wording: “gave you this” implies Craig chose B (N22), and whether bylines should also respect the discovery switch is a product call (Q7).
- **Weekly reflection "worked through" lists a still-missed question — dropped.** That slide is built on purpose from questions missed this week (`computeBeat6`: “a miss is a discovery, never a failure”), so Richard III belongs there.
- **Invite page says "Play Duo Prova's greatest hits" for Link 3 — dropped.** Every link's landing page uses that title by design (`inviteGreatestHitsTitle`); it isn't Link 1's name leaking.
- **"Chess Openings stops appearing in your five" — dropped.** Accurate: resting keeps it out of the five for good.
- **"Three in a row" counted across a skip — dropped as a bug.** Counting over answered questions is defensible; the wider question is Q4.

Nice-to-have

ID	ISSUE	WHERE · TIME	SEEN
N1	New link title reads “Renaissance Florence & Theater & Musicals”. Titles join each topic's broad group with "&"; Renaissance Florence has no group (so its own name is used) and the group "Theater & Musicals" already contains an "&".	A · /friends · 08:13 · SS-14	1
N3	After Block, A lands on Friends with no confirmation that anything happened.	A · 08:43 · SS-68	1
N4	After a block, Link 3 still says “2 friends joined” while “People you invited” shows 1.	A · 08:43 · SS-70	1
N5	Re-sending after a decline shows “Request sent · 2m ago” for a request sent just now.	A · 08:36 · SS-57	1
N6	The same friend request shows twice on home (card + activity row); labels now match (both “Decline”) — carried N12.	B · 08:34 · SS-53	1
N7	The floating “+” button covers the “Waiting” label in Requests Sent and the second “Decline” button on home at phone width.	A, B · 08:34 · SS-52, SS-53	2
N8	Already-friend pressing Accept on a link sees “You and Duo Prova are now friends.” (the success line in AcceptInviteLinkButton.tsx doesn't distinguish “already friends”).	C · 08:59 · SS-98	1
N9	Invalid/deleted link page offers only “Go to login”, even when signed in; the blocked-accept page has no way back into the app at all.	C, B · 08:58, 08:52 · SS-96, SS-87	3
N10	Recap labels a hidden bonus and a rested bonus as “Skipped” (and still offers Share on them).	B, C · 08:19, 08:28 · SS-29	2
N11	C's recap says both “You found common ground in Meredith Willson...” and “You found new ground in Meredith Willson...”.	C · 08:28 · SS-40	1
N12	“Between us” aside speaks as if the player wrote the question: “...so it makes sense you'd want to test people on it.”	C · /daily · 08:27	1
N14	Answer text “Georges Seurat and 'A Sunday on La Grande Jatte” has an unclosed quote and a shortened painting title.	B · 08:16 · SS-21	2
N16	Username characters are still removed silently (“Quat!Prova 9” → “quatprova9”); no avatar step — carried.	C · 08:23 · SS-34	1
N17	Welcome tour highlight box sits above the Customize button (carried N10); the tour reappears on C's home after C has played, still showing a mock “Ready when you are! Play now”.	B, C · 08:20, 08:28, 08:59 · SS-30	3
N18	Desktop only: the welcome tour is a phone-width column; the real page shows undimmed at the sides and the headers overlap.	C · 09:04 · SS-102, SS-103	1
N19	Friends empty state for someone with no friends says “You haven't invited anyone yet.”	B · 08:32 · SS-48	3
N20	Create-link sheet offers only 3 of A's 8+ topics under “Your categories” (half of N2 yesterday).	A · 08:12 · SS-12	1
N21	Suggestion chip “90's Ballywood” (carried N17).	A · /knowledge · 08:55	1
N22	Catch-up says “Craig T Testing gave you this” for a public question from a stranger — it reads as if Craig chose this player.	B · /daily/catchup · 08:21 · SS-32	1

N23	Weekly reflection's "WHAT YOU DISCOVERED" (Renaissance Florence, Great Lakes Shipwrecks) disagrees with the Knowledge page's "New territory opened this week" (Catch-22, Mozart); they use different rules. The week is labelled "SEP 21 – SEP 27" but was issued at 4:01 AM on the 27th (carried N13).	A · 08:47, 08:55 · 1 SS-78, SS-91
N24	A freshly built round showed five dots and no "+2 friend bonus" until the page was reloaded (C); the build took about a minute and its loader told a returning player "Your knowledge map starts filling in as you play."	C · /daily · 13:04– 1 13:06 · SS-108
N25	A successful "Argue your point" flips the card to "LOCKED IN." with no message saying the argument was accepted.	A · /daily · 13:10 · 1 SS-113
N26	The floating "+" button still covers the "Type DELETE to confirm." field on the delete-account step at phone width (carried N21; the "account deleted" message part of N21 is fixed).	B, C · 13:16– 2 13:17 · SS-118
N27	Unblock happens on one tap with no confirmation or "unblocked" message.	A · /blocked · 1 13:13 · SS-115

Fixed since yesterday (verified today)

YESTERDAY	TODAY	SCREENS
C1 "Never show this question" 500	Works: "HIDDEN. YOU WON'T SEE THIS QUESTION AGAIN."	SS-26
S1 Skip said "Resting ..."	"SKIPPED. WE'LL BRING IT BACK LATER."	SS-27
S2 Recap showed skipped answers	"Not shown for skipped questions"	SS-29
S3 Tour invented activity for a real friend	"A friend ..." labelled "example"	SS-30
S4 Feed rows outlived an unfriend	B's Lately dropped "Duo Prova is now a friend" after the unfriend	SS-47
S5 Catch-up "all caught up" loop	Missed-again question leaves the queue	SS-33
S6 People you invited missed link joiners	Lists both, "Joined through your link"	SS-42
S7 Dead buttons after last skip	None left	SS-27
S8 Squeezed name in search result	Name on one line	SS-52
S9 Friend screens stale after actions	Cancel, decline, send all update at once	SS-54, SS-56, SS-60
S10 No resend; invite-only message easy to miss	"Send a new code"; message is an alert inside the window	SS-08, SS-09
N1, N4, N5, N8, N11 (request), N18, N19, N20	Delete-sheet wording, early "already friends", "You've blocked this person", phone formatting, accept confirmation, placeholder, "LOOK AGAIN", "an American"	SS-11, SS-64, SS-69, SS-62

10 · QUESTIONS FOR JOSH

Q1 · Unfriending still erases shared history (carried). At 08:31 A unfriended B; B's home lost the "+2 friend bonus" dots and B's recap lost both "from Duo's knowledge" bonus cards. That makes sense for a block, but for a plain unfriend it quietly rewrites what B played this morning.

Q2 · Co-invitees are not connected. B and C redeemed the same link from A within 10 minutes. They didn't become friends and weren't suggested to each other (both have mutual-friend suggestions OFF by default). If "people who joined through the same friend's link" is a strong signal, a suggestion (not auto-friending) could help — it needs a consent decision.

Q3 · The "What you gave" slide compares you with a friend. "Uno Prova taught the room. You didn't earn author credit this week." It names a top contributor and tells the player they didn't earn credit. It's gentle, but it's a ranking plus a small "you didn't" — close to the no-leaderboards / no-guilt line.

Q4 · "Three in a row at one point." (carried Q3). Still shown at the end of both new players' rounds. It's within one round, not a daily streak, but it's counting runs — and for C it counted across a skip.

Q5 · A brand-new player is nudged to rest a topic after two misses. B's first recap: "You've missed the last 2 Stephen Sondheim Musicals questions. Rest them for now?" B picked that topic from the invite minutes earlier. Two misses in a first session may be too early to suggest giving up on it — and it frames the wrong answers as failures.

Q6 · The blocked person still sees the blocker's invite card (carried Q5). Opening A's link as blocked B still shows "Duo Prova invited you to Joshing"; only Accept fails. A neutral "invitation unavailable" before pressing would match the rest of blocking.

Q7 · Should a stranger's byline respect the discovery switch? Public questions from strangers show the author's full name ("by Craig T Testing") whether or not the author has "Let people I've never met discover me" on, while the feed side of discovery is carefully gated on that switch and on a correct answer. Today both authors had it on, so nothing leaked; but someone who turns discovery off would still be named on every public question they wrote.

Q8 · Should an invitee's activity stay in your feed after you've unfriended and blocked them? After A unblocked B at 13:13 (not friends), A's Lately showed "Tre Prova played their first five questions · 8:17 AM" again. The row type is "a friend you invited played their first five"; B was A's invitee, so it's history rather than a stranger's activity — but yesterday's decision was that friendship rows go once the friendship ends, and this one comes back after an unblock.

Q9 · One strict grading call. "a thorn bush" was marked wrong for "A hawthorn bush" ("Right plant family, wrong specific bush"), although the tradition is often told as "a thorn bush". It falls under the accepted "partly right can be graded wrong" decision, and "Argue your point" overturned it at once — worth deciding whether the grader should accept it first time.

11 · UNTESTED, AND WHAT WOULD UNBLOCK IT

- **Expired sign-in code.** The test code 000000 never expires. Needs a real, non-bypass test number, or a preview database where an OtpCode row can be backdated.

- **Expired invite link / personal invite.** Needs a backdated invitation — a production write, so not done. A preview environment would allow it.
- **Real 390×844 phone and touch.** `resize_window` has no effect here; the tab was 393×744 and input was mouse and keyboard. Needs a real phone or a working resize.
- **Two accounts signed in at once.** Chrome windows here share one cookie jar, so accounts were switched in one tab with the app's own sign-in calls. Needs a second browser profile.
- **SMS and email sending.** Reminder opt-ins were declined on purpose (“I’ll check back on my own”).
- **Console coverage.** Console messages were captured (a probe `console.error` showed up), but browser-level network failures don’t always appear there.

12 · PRINCIPLE AUDIT

PRINCIPLE	VERDICT	EVIDENCE
No streaks, leaderboards or coercive mechanics	MOSTLY	No streak counter, leaderboard, countdown or guilt copy on home, round, recap or reminder asks (“I’ll check back on my own” is an equal choice). Soft spots: the weekly reflection’s “Uno Prova taught the room. You didn’t earn author credit this week.” (Q3) and “Three in a row at one point.” (Q4).
Wrong answers feel like connection moments	PASS	Wrong-answer copy is gentle (“You’ll know this one next time.”, “Close, but not quite.”, “NOW IT’S IN YOURS TOO”) and relational (“Craig’s world includes this”); the weekly reflection lists misses as “Things you didn’t have a week ago.” One exception: a first-session recap suggesting “Rest them for now?” after two misses (Q5).
Colour never carries meaning alone	MOSTLY	Mastery and frequency views use text headings and bar icons; verdicts use ✓/✗ plus words; required-field and error messages are text. The right/wrong dots are colour-only, which is on the accepted list.
Grading fails toward the player	MOSTLY	Typos (“Ufizzi”, “Murray”) and ambiguous answers (“the King of France”, “Ephesians”) were accepted. Partly-right “Seurat” was marked wrong (accepted decision). “a thorn bush” was marked wrong but overturned by “Argue your point” (Q9).

13 · SUGGESTIONS FOR IMPROVEMENT

- **Say when a friendship forms through a link.** B and C joined through A’s link and became A’s friends silently; a line on the first recap (“You and Duo are now friends — their world will show up in your bonuses”) would make the bonus labels make sense.
- **Tell the player an argument worked.** After “Argue your point” succeeds, a short “Fair point — counted.” turns a silent flip into a nice moment, and matches the “fails toward the player” promise.
- **Treat “last seen” as a relative phrase.** “From this morning” / “from last week” is harder to get wrong than a calendar date and reads more like conversation.
- **One source of truth for “new this week”.** The weekly reflection and the Knowledge page should share the rule for a newly opened topic (N23).
- **Offer co-invitees to each other.** People who joined through the same friend’s link are a natural suggestion, if both consent (Q2).
- **Show the category a typed topic will land in** while it’s being added, with a way to change it — the cheapest guard against S3-type filing errors.

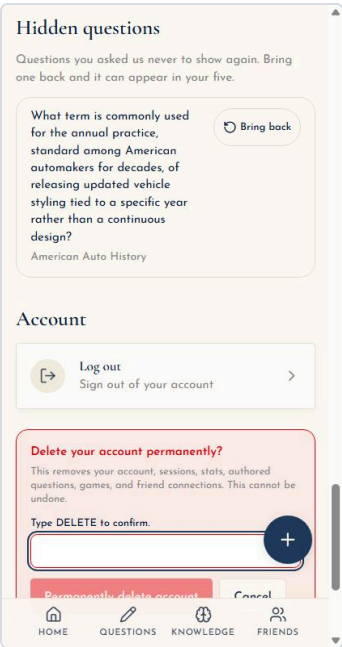

- **Keep the floating "+" button off forms and confirmation steps (N7, N26):** hide it whenever a sheet, form or destructive confirm is open.

14 · CLEANUP

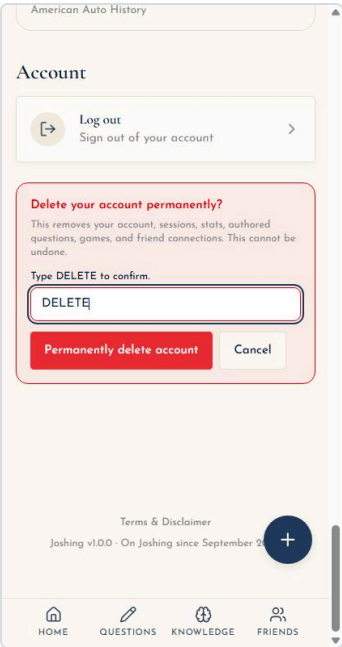

ACCOUNT	DELETED	HOW IT WAS CHECKED	RESULT
B · Tre Prova · +1 555-333-3333	13:17:00 ET, in the app (profile → Delete account → "DELETE" → Permanently delete account), after confirming the signed-in name and phone	Landed on "Your account was deleted."; sign-in with the number → "Joshing is invite-only..." (403 invite_required); A's search for "treprova" → no match	GONE
C · Quat Prova · +1 555-444-4444	13:17:50 ET, same path	Same messages; A's search by phone → no match	GONE
A · Duo Prova · +1 555-222-2222	Kept	Friends: Craig T Testing, Uno Prova (as found). Blocked: none. Pending: none. All three links "0 friends joined". People you invited: "No one yet." Lately: no B or C rows.	AS FOUND*

Database sweep (read-only, 13:20): no User rows for either number or name; no rows in any of 68 user-reference columns except 4 ActivityItem rows (type follow_mutual, owner A, referenceId = B or C) whose actor id and name snapshot are already null — they don't render. Same inert pattern as yesterday.

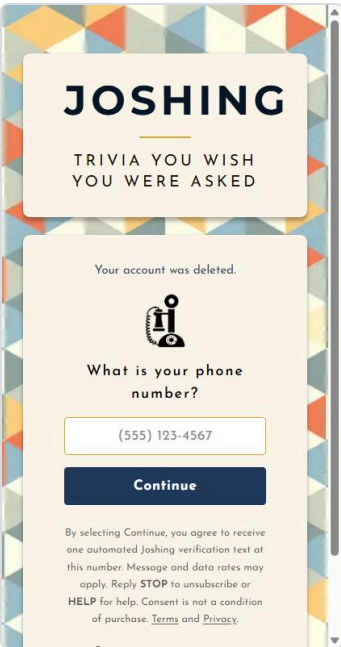

***Changes to A that remain:** A's old Link 2 ("Michigan football", 0 joined) was deleted at 08:12 to make room, and a new Link 3 ("Renaissance Florence & Theater & Musicals") now sits in its place. A also played the 1 PM round and won one argued answer. Nothing else about A was changed.

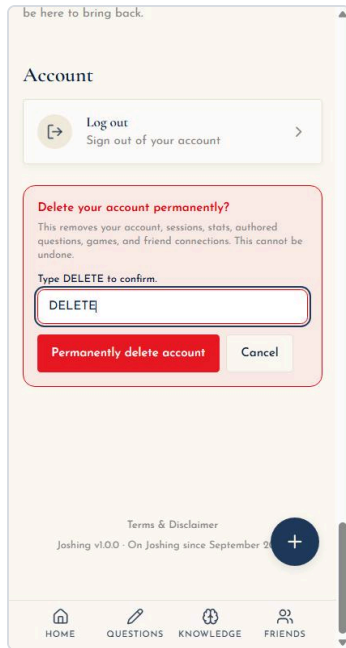

SS-118 · 13:16 ET · B · /users/(B) · Delete-account confirm; hidden question listed with "Bring back"; "+" button over the DELETE field

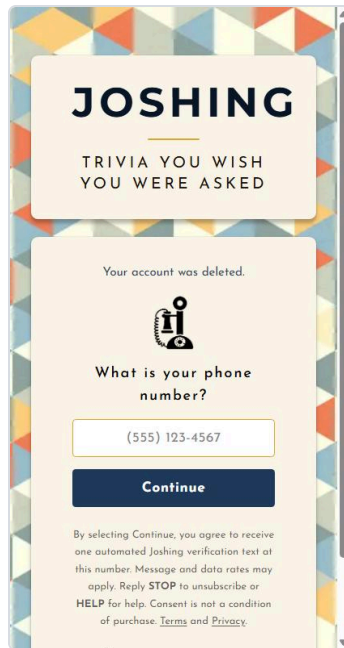

SS-119 · 13:16 ET · B · /users/(B) · "DELETE" typed, "Permanently delete account"

15 · FIXES MADE AFTER THE REVIEW

On branch `fix/qa-2026-09-27` (from main at 8977af64), not yet committed or deployed. Typecheck and lint are clean; the full test suite passes (3,009 tests).

- **S1 — counts agree.** `src/components/activity/ActivityStreamItem.tsx`: the Lately layout now shows the same "questions left" count as home. New test in `MilestoneStreamItem.test.tsx`.

- **S2 — declined topics tell the truth.** New `src/server/knowledge/rotation-display.ts` works out which held topics the Daily Five doesn't draw from ("parked"), using the same `getKnowledgeBase` the round builder uses. The Knowledge and Manage-your-topics pages pass that list to `usePeakDetail`, which shows parked topics as "Never"; picking a real frequency for one now goes through `/api/daily/preferences/adopt-bonus-domain` (the same call as the bonus card's "Yes"), so it really joins the rotation. New tests in `rotation-display.test.ts`.
- **S3 — better categories for new topics.** `src/lib/knowledge/broad-category.ts`: "Geography" and "Religion & Mythology" are now real buckets; a label ending in a bucket name ("American Auto History") folds into that bucket; and a topic whose own name says "Geography" or "Mythology" is filed there even if the model said History. Applied where declared topics are saved (`users.ts`), and the new buckets are in the categorizer prompts (`src/server/llm/interests.ts`). New tests in `broad-category.test.ts`. **Not done:** existing rows in production (e.g. A's "Australian Geography" = History) are not rewritten — that needs a separate, reviewed backfill.

Second batch (2026-09-29)

- **S4 — "Last seen" date.** `src/server/db/queries/missed-return.ts` now uses the moment the round opened (its date at 17:00 UTC), never earlier than the account's creation, or the catch-up answer time when later — instead of the round's date at midnight UTC. Checked read-only on A's data: the June card now reads June 24 (A's signup day), not June 23.
- **N26 / N7 — floating "+"**. It now steps aside while a text field is focused or while a confirm panel is open (delete account, log out, unfriend, block) — `src/components/useFabSuppressed.ts`, wired in `Nav.tsx`. It still shows on every page as the design canon requires. Not covered: it can still sit over a list row's button at some scroll positions (the "Waiting" label, the second "Decline").
- **N8 — already friends.** Accepting a link when you're already friends now says "You and Duo Prova are already friends." and no longer writes a second "is now a friend" feed row (`acceptUserInviteLink` returns early).
- **N22 — "gave you this".** Now "wrote this", since catch-up and returns serve questions the game picked.
- **N25 — winning an argument.** The "✓ Recheck accepted — +N points." note now stays on the card after it flips to correct (it used to vanish with the wrong-answer section).
- **N10 — recap labels.** Hidden and rested questions now read "Hidden" / "Rested" instead of "Skipped".
- **N9 — invite dead ends.** A bad link shows "Back to Joshing" to signed-in players, and a failed Accept on either invite page now offers "Back to Joshing".
- **Model: Sonnet 5 → Sonnet 5.5.** `claude-sonnet-5-5` is live and priced like Sonnet 5. It rejects thinking: `{type: "disabled"}`, which the shared request sanitizer sent on every call, so `src/lib/llm.ts` now sends its lowest setting, `between_tools`, instead (checked live: plain text back; disabled → 400). Both web-search tool versions were checked live on it; no code uses forced tool choice. A price row was added. The switch itself is the `ANTHROPIC_MODEL` environment variable in Vercel production, to change only after this code is deployed.

16 · TIMELINE APPENDIX
