

Joshing QA walkthrough — production

Exploratory test of joshing-11.vercel.app at phone size, three accounts, friend / invite / block / gameplay / knowledge / cleanup.

Run 2026-09-25, 20:12–21:32 ET (EDT, UTC-4) · Tester: Claude (Opus 5.5) via Claude-in-Chrome · Accounts: A = Duo Prova (555-222-2222, kept), B = Trio Third (555-333-3333, deleted 21:24), C = Quad Prova (555-444-4444, created 20:57, deleted 21:27) · Screenshot IDs (s01...s111) match the timeline appendix

1. OVERALL SUMMARY

The core loop works: signup through an invite, the Daily Five, grading feedback, catch-up, friend requests, blocking, unblocking, invite links and account deletion all complete without errors, and no console errors were recorded on the screens checked. Blocking holds where it matters most: a blocked person cannot find, request, re-invite or re-join through a link, and unblocking does **not** bring the friendship back.

The biggest problems are about what is left behind, and about grading:

- **Deleted accounts leave their names in other people’s feeds**, including real users (“Robyn”, “Joshua P”) who were never their friends (C1).
- **Blocking doesn’t clean the feed**. Both sides keep seeing each other’s names and friendship events, and the names link to a bare 404 (C2).
- **Partly-right answers are marked wrong** even when the grader itself says “right concept” / “right character” (C3). This goes against “fails toward the player”.
- Several places disagree with each other: the home card vs. the summary dots, “noon” vs. “1 PM” on the same screen, “Ready when you are!” right after finishing, and skipped questions that vanish and then get spoiled on the summary.
- Principle slips: the word “streak” on the home screen, and right/wrong dots that differ by color only.

ACCOUNTS AFTER THIS RUN

A (Duo Prova, 555-222-2222) **still exists**. B (Trio Third) and C (Quad Prova) **were deleted** through the app. Both numbers now get “Joshing is invite-only”. Leftovers are listed in section 9.

How this run was done (read before judging timings or screenshots)

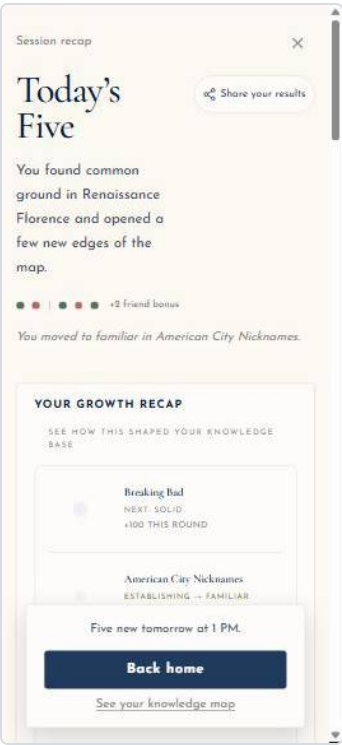

- **Viewport**. `resize_window` had no effect on this machine. Screens 20:12–20:18 ran in a same-origin 390×844 frame (shots s00–s06 are cropped from it). From 20:18 on, a native tab at **393×703**. Between ~21:01 and ~21:11 the window shrank itself to **316×564** (C’s gameplay, shots s70–s81). The desktop pass used a 1280-wide same-origin frame.
- **Hidden tab**. Chrome reported the automation tab as `visibilityState = hidden` for the whole run. That throttles timers and painting, so slow loads (“Loading friends...” up to ~24 s), some faded animations and blank or partial screenshots are **test artifacts, not filed as bugs**.
- **One browser profile**. All tabs share cookies, so A, B and C could not be signed in at the same time. I switched accounts by logging out and in (each switch is in the timeline).

- **Database.** Read-only SQL via the Supabase MCP was used to confirm state (follows, blocks, invites, users). No rows were written by hand.

3. FINDINGS BY AREA

3.1 Onboarding & auth

Worked: The invite landing reads “Duo invited you to Joshing, a trivia game built for you...”. The C (555-444-4444) bypass code works. Wrong codes show “Code invalid or expired” and 5 digits shows “Enter the

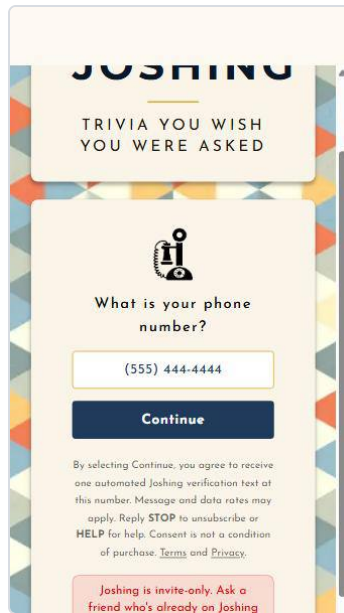

6-digit code.”. Returning logins for A and B work. A taken username shows “That username is already taken.” and greys out the button. Interest setup explains the disabled button (“2 selected · pick at least 1 more” / “Pick at least 3 to start”). An uninvited number shows “Joshing is invite-only. Ask a friend who’s already on Joshing to send you an invite.”, and the page scrolls so the message is visible (bottom 668 of 703 px).

Problems:

- There is **no way to resend a code** on the code screen, only “Change number” (N6).
- “Get a text when your five open” comes back at every login, even after “Not right now” (S11).
- On the profile step, a stale “Enter your display name.” error stays up after the name is filled in, and the username auto-fill fights typing (S18). Placeholders read “Jane Palay / jpalay” (N7).
- There is **no avatar step**. What’s required: name, username, 3 topics. Skippable: texts (“I’ll check back on my own”) and the tour.
- C was never told they are now friends with Duo (see S1).

Principle check: no streaks, guilt or urgency in onboarding copy. “Made from your topics, not pulled off a shelf. A new five lands every afternoon.”

3.2 Gameplay (C’s first Daily Five, plus A’s and B’s rounds)

TIME	TYPE	QUESTION	ANSWER GIVEN	VERDICT SHOWN
21:02	Clearly correct	“Literally meaning ‘the offices,’ what famous Florentine museum...”	The Uffizi	✓ LOCKED IN. The Uffizi
21:02	Clearly wrong	“How many numbered piano sonatas did Beethoven compose?”	27	× You’ll know this one next time. 32 · “Close! You’re in the right ballpark, just a few sonatas short.”
21:03	Typo	“In which city did Beethoven’s Ninth Symphony receive its first performance?”	Viena	✓ LOCKED IN. Vienna
21:05	Ambiguous / near	Brunelleschi’s technique for 3-D space on a flat surface	vanishing point	× Not this time. Linear perspective · “Right concept, wrong term—that’s the *tool* of linear perspective...”
21:08	Partly right	Magic Flute villain with the high aria (bonus)	the Queen	× Not this time. The Queen of the Night · “Right character type, but you need the full royal title here.”
earlier	Partly right, 2-part (A, before this run)	“...what physical deformities does Richard himself repeatedly cite...”	hunchback	Not this time · answer “a hunched back and a withered arm”
earlier	Generous (A, before this run)	Primavera: for whose villa at Castello?	Lorenzo de Medici	Correct (answer: Lorenzo di Pierfrancesco de’ Medici)

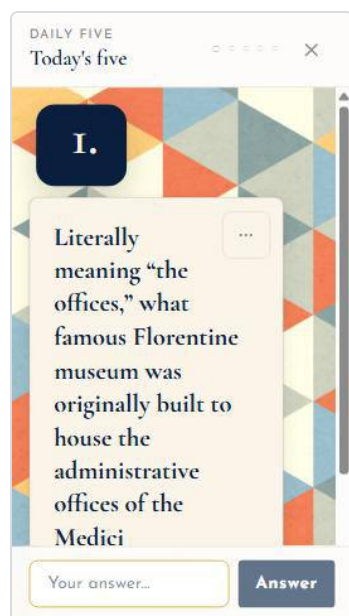

Skip / Not for me / Show me the answer. “NOT FOR ME” opens “Skip for now · Never show this question · Rest Great Lakes Shipwrecks”. After “Skip for now” the dots read ●●●●○ and the skipped card disappears (S7). “Show me the answer” on bonus 1 filled the bonus dot and left the five regular dots

unchanged. **Bonuses are additive:** they never touched “x of 5”. Bonus order: Othello (Shakespeare) then Magic Flute (Mozart), both after all five regular questions, both “FROM DUO’S WORLD”.

Home vs summary vs round. For C, the round, summary and (after reload) home agree: G R G R grey | R R and “Five new tomorrow at 1 PM”. But the first home view after finishing said “Ready when you are! · Play now” (S4), and the summary also says “every day at noon — next up Saturday at noon” (S6). For A, home shows 7 dots and the summary shows 5 (S5).

Catch-up. “4 missed questions from the past week · FROM TODAY”. A correct replay gives “+13 POINTS - CATCH-UP - 0.25X POINTS”. The discount is shown clearly and the “From” label is right.

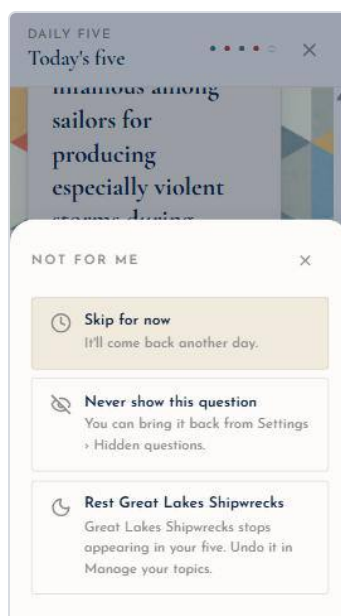

Wrong answers as connection. Mostly yes. “NOW IT’S IN YOURS TOO”, “BETWEEN US!” asides and “ARGUE YOUR POINT” feel warm. But the screen-reader labels on home say “Wrong” (N15), and an appeal gives no acknowledgement (N14).

Mutual-friend suggestions: none appeared anywhere. Both A and B have “Suggest me through mutual friends” OFF, and after B and C were both friends with A, neither saw the other suggested.

Strangers in feeds: C’s home showed “RECENT ACTIVITY · Someone played their first five questions” (anonymous), and a “niche match” notification about C went to a real user (see C1).

3.4 Knowledge / profile

- **Numbers don't add up (S12).** A's profile shows 5 bubbles + "+3 more territories" but says "976 knowledge points across 15 territories". B's shows 2 bubbles, no "+N more", and "across 5 territories". C's shows 2 bubbles and "73 knowledge points across 5 territories". (C's points do add up: +50 +10 in the round, +13 in catch-up.)
- **"YOUR KNOWLEDGE PORTRAIT" on someone else's profile (S13):** seen on B's profile viewed by A and on A's viewed by B.
- **Declaring an interest:** "Added "Jazz Piano" — it'll show up in an upcoming round. UNDO". Whether it changes the next questions is **untested** (next round tomorrow 1 PM).

- **Where topics land (S21):** Beethoven and Jazz Piano → MUSIC. Mozart, Renaissance Florence and Shakespeare → OTHER INTERESTS. Great Lakes Shipwrecks → HISTORY. “Add a territory” suggests “Mozart”, which C already has.
- **Legends without color:** Domain view groups bubbles under text headings (OK). Frequency shows “Sometimes” plus a bar icon (OK). Mastery legend dots “Mastery · Solid · Familiar · Establishing” are almost the same beige (N11), though bubbles are grouped under a text heading and profile bubbles carry a text label (“Familiar”, “Establishing”).
- “You both claim Final Fantasy — neither’s been tested yet.” appeared even though B answered a Final Fantasy question that day.

3.5 Invite system

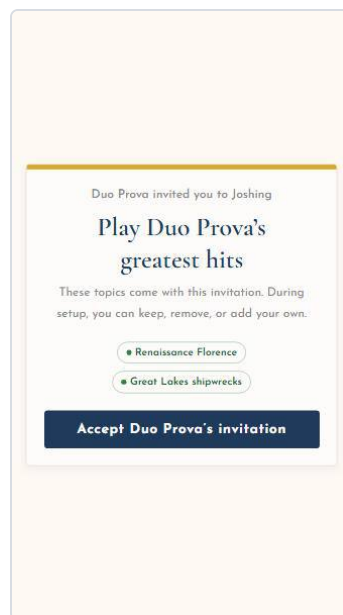

- **Create:** A was at 3 of 3 links, so A deleted the unused old Link 3 (in-app confirm, copy nit N9), then created “Renaissance Florence & Great Lakes shipwrecks” at 20:52. The sheet shows a red “Choose at least one category to save.” before any action (N10), and offers only 3 of A’s 15 territories.
- **C (fresh) via link:** account created, A↔C friends instantly (DB 20:57:01). **No on-screen confirmation** that C is now Duo’s friend.
- **B (existing) via the same link, signing in from the link:** A↔B friends instantly (21:16:13). B never saw an Accept screen and landed on the reminders ask (S1). The only sign was “Duo Prova is now a friend” in B’s feed.
- **B while blocked:** “This invitation is no longer available.” Block holds.
- **Invalid / deleted / wrong-handle links:** all show “Invitation unavailable · This invitation link is no longer valid.”, but a signed-in viewer only gets “Go to login” (N13).
- **Already-used by the same person:** C re-opening the link sees “Accept Duo Prova’s invitation” again, then is silently sent home (N13), and a duplicate “Quad Prova is now a friend” lands in A’s feed (S15).
- **Co-invitee auto-friending:** B and C both joined through the same link. **They were NOT made friends** (0 follow rows). Neither was suggested to the other.
- **Counter:** the link read “1 friend joined” after both C and B joined through it (S14).

3.6 Desktop pass (differences only)

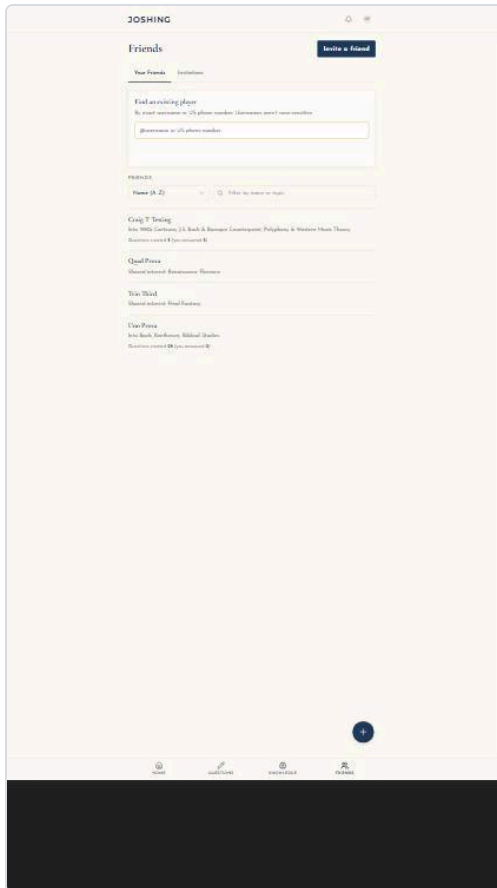

At 1280 px (scaled frame) the app is the same ~700 px column centered on the page, with the phone bottom tab bar kept (no side or top nav). The summary intro uses the full width (at phone width it's squeezed beside the Share button, N19). The "Five new tomorrow... Back home" card floats mid-page over the question cards. The "+" button sits far right of the column. Nothing else differed.

4. PRIORITIZED ISSUE LIST

“Possible cause” is kept apart from what was seen. Times are ET.

Critical

C1 · CRITICAL · REPRODUCED 2/2 (B AND C)

Deleted accounts’ names stay in other people’s feeds, including real users who were never their friends.

SEEN After deleting B (21:24) and C (21:27), A’s Lately feed still lists “Trio Third is now a friend”, “Quad Prova is now a friend”, “Quad Prova played their first five questions” and “Trio Third played their first five questions”. One of them now reads “Someone is now a friend”, so name-hiding is inconsistent. The database has `ActivityItem` rows with `actorNameSnapshot` “Trio Third” / “Quad Prova” and `actorUserId` null, owned by A (7 + 3), Uno Prova, Craig T Testing, **Robyn** and **Joshua P**. The rows sent to Robyn, Craig, Uno and Joshua P are of type `friend_answered_your_question`, although none of them were ever friends with B or C. C’s answer also created a `niche_match_answered_your_question` row for Joshua P at 21:02.

REPRO Friend A with a test account → have it play a round → delete it → open A’s /activities.

TIMES / SHOTS 21:31:50 (A feed), 21:32 (DB) · s111, s93

Possible cause: account deletion nulls `actorUserId` but keeps `actorNameSnapshot`, and the feed renders the snapshot. The “friend_answered” type may be picked by question authorship rather than by an actual friendship.

C2 · CRITICAL · REPRODUCED 2/2 (AS FOUND 20:18, AFTER BLOCK 20:45/20:48)

Blocking doesn’t clean either side’s feed; names link to a bare 404.

SEEN With Trio Third blocked, A’s feed shows “Trio Third played their first five questions” (as found) and, after a fresh block, “Trio Third is now a friend 8:37 PM”. B’s feed shows “Duo Prova accepted your friend request”. Tapping the name leads to Next.js’s default “404 This page could not be found.” on both sides (S22).

REPRO A and B friends → A blocks B → open /activities as A and as B.

TIMES / SHOTS 20:18, 20:45:56, 20:48:22 · s07, s48, s52, s46

Possible cause: the feed query doesn’t filter `UserBlock` in either direction.

Partly-right answers are marked wrong, even when the feedback admits they're partly right.

SEEN “the Queen” → × (“Right character type, but you need the full royal title here.”). There’s only one queen in The Magic Flute. “vanishing point” → × (“Right concept, wrong term”). “hunchback” for “a hunched back and a withered arm” → Not this time (A, earlier today). The principle says ambiguous or partly right should be correct.

TIMES / SHOTS 21:05:04, 21:08:00, A’s summary at 20:16 · s76, s77, s02

Possible cause: the grader prompt enforces the full canonical term. The explanation is written knowing the answer was close, but the verdict isn’t allowed to follow it.

Should-fix

S1 · SHOULD-FIX · SEEN ONCE EACH (B 21:16, C 20:57)

Joining through an invite link makes you friends with no confirmation at all.

SEEN B, an existing user, signed in via A’s link and became A’s friend at 21:16:13 without seeing the invite card or an Accept button, landing on the reminders ask. C (new) was never told either. When already signed in, the same link does show “Accept Duo Prova’s invitation”.

REPRO Log out → open /u/duoprova/<token> → sign in as an existing user.

SHOTS s92

S2 · SHOULD-FIX · SEEN ONCE

A blocked user’s invite-by-phone says a request was sent (it wasn’t), and it contradicts search.

SEEN B (blocked) → invite Duo’s number → “Duo is already on Joshing. We turned your invite into a friend request. They’ll see it — and the areas you flagged — in their activity.” Nothing was created. B had flagged no areas, and search had just said “No matching player found” for the same person. The blocker sees a vague “Give this invite a little breathing room before trying again.” when inviting the person they blocked.

TIMES / SHOTS 20:47:17, 20:45:31 · s50, s47

S3 · SHOULD-FIX · SEEN 2× (20:21 NOT FRIENDS, 20:48 BLOCKED)

“+2 friend bonus / from friends” with zero friends; the blocker’s questions keep being served after a block.

SEEN B had no friends at 20:21, but the header said “+2 friend bonus” and the labels said “bonus question 1 of 2, from friends”. After A blocked B, the “FROM DUO’S WORLD” label vanished but the Windy City question from A’s world stayed in B’s round.

SHOTS S11, S12, S51

Possible cause: the bonus set is picked once at round creation and not re-checked against friendships or blocks.

S4 · SHOULD-FIX · SEEN 2× IN ONE VISIT (21:09:29, 21:09:53); GONE AFTER RELOAD

Right after finishing, home says “Ready when you are! · Play now” with five empty dots.

REPRO Finish the round → See my recap → leave to /. The first view is stale. A reload shows the correct “Five new tomorrow at 1 PM”.

SHOTS S80 (stale), S81 (after reload)

S5 · SHOULD-FIX · REPRODUCED 2/2 (20:16, 21:20)

A’s home card shows 7 dots; A’s summary and round show 5.

SEEN Home: ●●●●● (G R G G R) | ●● “+2 friend bonus”. Summary: “Question 1: correct · Question 2: not this time” | “Second look question 1 of 3”, “Bonus question 2 of 3”, “Bonus question 3 of 3”. Five question cards in total. The summary also says “+2” next to three extra dots, and mixes “Second look ... of 3” with “Bonus ... of 3”.

SHOTS S97, S98, S02

S6 · SHOULD-FIX · REPRODUCED (SAME SCREEN, ALL USERS AMERICA/NEW_YORK)

Next-round time disagrees with itself.

TIMES / SHOTS 21:08:59 · S78

S7 · SHOULD-FIX · REPRODUCED 2/2 (B’S Q3 AS FOUND, C’S Q5 AT 21:06)

A skipped question disappears from the round, and the summary then spoils it.

SEEN After “Skip for now” the question card is removed, and only “SKIPPED. WE’LL BRING IT BACK LATER.” remains, visually attached to the previous question. B’s round showed Q1, Q2, Q4, Q5 with no Q3. C’s summary then shows “YOU SAID Skipped · ANSWER November” for a question promised to come back.

S9 · SHOULD-FIX (PRINCIPLE) · 3 SURFACES

Right vs wrong dots differ by color only.

SEEN Round header, summary and home use same-size filled circles, green for right and red for wrong (skipped = grey on home, hollow in the round). The labels exist only for screen readers. Answer cards themselves are fine (× / ✓ plus words).

SHOTS s76, s81, s98

S10 · SHOULD-FIX · REPRODUCED 2/2 (20:33:41, 20:34:37)

Re-sending after a decline quietly fails, but the button gives the decline away.

SEEN The first send flips the row to “Requested / Cancel”. After B declined, A’s “Send” leaves it on “Add friend” and no request exists. A can tell something is different.

SHOTS s24, s29

S11 · SHOULD-FIX · A 2/2, B 3/3

The text-reminder ask comes back at every login.

SEEN “Get a text when your five open” after every sign-in. “Not right now” at 20:15 didn’t change reminder_prompt_dismissed_at / reminder_interstitial_seen_at. Mildly naggy for a no-pressure product.

SHOTS s10

S12 · SHOULD-FIX · 3 PROFILES

Knowledge portrait counts don’t add up.

SEEN 5 shown + “+3 more” vs “15 territories” (A). 2 shown, no “+N more”, vs “5 territories” (B, C).

SHOTS s42, s83, s35

S13 · SHOULD-FIX · 2/2

“YOUR KNOWLEDGE PORTRAIT” heading on other people’s profiles.

SHOTS s42 (B viewing A)

S14 · SHOULD-FIX · 4/4 CHECKS (20:17, 20:39, 21:18, 21:31)

“People you invited” shows a deleted person with a wrong status; the link counter misses existing users.

SEEN “Terry Tester (555) •••-3333 · Accepted Sep 14 · You’re not connected right now.” stays even while A is friends with that number’s new owner. The `FriendInvitation` row has `inviteeUserId` null. The new link reads “1 friend joined” after C and B both joined through it.

SHOTS S36, S110

S15 · SHOULD-FIX · 2/2 (B 21:16, A 21:18)

Lately feed has duplicates and isn’t in time order.

SEEN A: “Quad Prova is now a friend” at 8:57 PM and again at 9:15 PM (after C re-opened the link), and “Trio Third is now a friend” twice. A 4:44 / 4:53 PM “wandering” item sits above 9:16 PM items on both A and B.

SHOTS S93, S92

S16 · SHOULD-FIX · 2/2 (A SUMMARY, C HOME)

Topic label gives the answer away.

SEEN Chip “CATCH-22” above “In Joseph Heller’s novel, what is the name of the bureaucratic rule...” (answer: Catch-22).

S17 · SHOULD-FIX · SEEN ONCE EACH

Broken text in grading/explanations.

SEEN Raw markdown “that’s the *tool* of linear perspective” (21:05). Beethoven explanation cut to “Fidelio (Op.” (B’s round, 20:21).

S18 · SHOULD-FIX · SEEN IN 2 STATES (20:58:35, 20:58:49)

Profile setup: stale error and username auto-fill fighting typing.

SEEN “Enter your display name.” stays under the button with “Quad Prova” filled in. Typing in Username while it auto-fills from the name produced “quaddprovauoprova”.

SHOTS S65

S19 · SHOULD-FIX · SEEN ONCE

Weekly ceremony wording: “Seven days” for Sep 13–Sep 20, and “What you mastered” for Establishing → Familiar.

SHOTS S94, S95

S20 · SHOULD-FIX · SEEN ONCE

False overlap claim for a brand-new player.

SEEN C's home: "You and Duo Prova keep meeting in the same places. American City Nicknames · Bikini Bottom Animated Series". C had neither topic.

TIME 21:09:29

S21 · SHOULD-FIX · SEEN ONCE

Taxonomy inconsistencies.

SEEN Mozart under OTHER INTERESTS while Beethoven and Jazz Piano are under MUSIC. "Mozart" offered in "Add a territory" while already owned.

SHOTS s84, s85

S22 · SHOULD-FIX · 2/2 (A AND B SIDES)

Blocked-profile URL shows Next.js's bare default 404.

5. QUESTIONS FOR JOSH

- **Can players tell Maid Acasa is a bot?** Not from the UI. It shows as “by Maid Acasa” / “Asked by Maid Acasa”, exactly like a person, next to “by Joshua P”. A small “Joshing’s writer” marker would avoid players thinking it’s a stranger.
- **Invite-link consent.** The invite counting as consent is deliberate, but an existing user who signs in from a link becomes a friend without seeing who or what (S1). A one-line “You and Duo are now friends” would keep the rule and remove the surprise.
- **“Show me the answer” = red / “Not this time”.** Choosing to look isn’t a wrong answer. Should it get its own neutral mark?
- **Generous grading on a different person.** “Lorenzo de Medici” was accepted for Lorenzo di Pierfrancesco de’ Medici (a different man). That fits the principle, but it teaches a wrong fact unless the card points out the difference.
- **Ceremony on the way to the summary.** A’s week was unviewed (feed said “SEE IT NOW”), yet /daily → /daily/summary at 20:15 went straight to the summary. Is the interstitial meant to show only right after finishing a round?
- **Anonymous stranger activity.** C’s home showed “Someone played their first five questions”. It’s anonymous, but it’s still a stranger’s activity in a brand-new player’s feed.
- **Test accounts pinging real users.** Test play created notifications for Robyn and Joshua P (C1). Should test numbers be excluded from niche-match and author notifications?
- **“FROM DUO’S WORLD” vs “you answered o”.** C answered two bonuses “from Duo’s world”, yet Friends says “Questions created 2 (you answered o)”. The two phrases mean different things (topics vs authorship), which isn’t obvious.
- **Search rate limit.** ~8 searches a minute. Fine for people, but friend-hunting by several phone numbers can hit it.

6. UNTESTED

WHAT

WHY

WHAT WOULD UNBLOCK IT

Expired OTP code	The bypass code 000000 never expires	A non-bypass test number, or a short-TTL test code
Resend code	No resend control exists (N6)	Build one
Whether a declared interest changes the next questions	Next round is tomorrow 1 PM and C was deleted tonight	Declare on a kept account, check the next day's five
Two accounts signed in at once	The Chrome extension shares one cookie jar across its windows	A second Chrome profile, or an incognito window the extension can drive
Contact matching and mutual-friend suggestions	Both toggles were OFF on A and B, and I didn't change A's settings	Turn "Suggest me through mutual friends" on for two test accounts that share a friend
Console errors before 21:19	read_console_messages only records after its first call, and my in-page error hook was lost when the first tab closed	Call the console reader at the very start of the run
Load-time / performance	The automation tab was hidden and throttled	Keep the Chrome window in front during the run
A single consistent 390×844 viewport	resize_window was ignored; the window resized itself mid-run	Un-maximize and un-snap the Chrome window before starting, or run Chrome's device emulation
Writing a question; answering a friend-written question	Out of the brief's five areas; time	Add to a future run

7. PRINCIPLE AUDIT

PRINCIPLE	VERDICT	EVIDENCE
No streaks, leaderboards or coercive mechanics	MOSTLY	No leaderboards, counters or guilt copy seen. But "TAP A STREAK TO PLAY YOUR FRIEND'S QUESTIONS" (S8), and the text-reminder ask returns at every login (S11). Catch-up copy is gentle: "Some you didn't land will find their way back to you."
Wrong answers feel like connection moments	MOSTLY PASS	"NOW IT'S IN YOURS TOO", "You'll know this one next time.", "BETWEEN US!", "ARGUE YOUR POINT". Dents: screen-reader text says "Wrong" (N15), and appeals get no reply (N14).
Color never carries meaning alone	FAIL	Right/wrong dots are same-shape green/red on round, summary and home (S9). Mastery legend dots are indistinguishable (N11). Answer cards, frequency view and profile bubbles do pair color with text or icons.
Grading fails toward the player	FAIL	Typos pass ("Viena", "Pittsburg", "catch 22"), but partly-right answers fail ("the Queen", "vanishing point", "hunchback") while the feedback says they were close (C3).

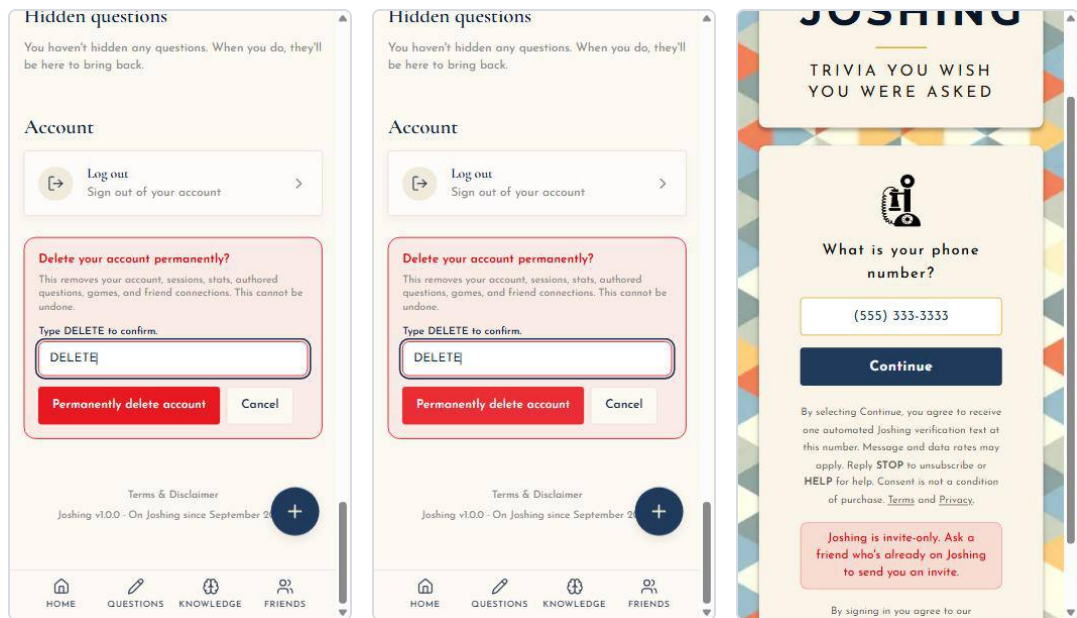

8. SUGGESTIONS FOR IMPROVEMENT

- **One "partial credit" rule in the grader:** if the explanation would start with "Right concept / right character / you're close", mark it correct and show the full answer as "the full name is ...". This turns C3 into a teaching moment instead of a miss.

- **Make the feed respect relationships at read time:** hide items whose actor is blocked (either direction) or deleted, and label deleted actors consistently (“A former player”). Only use “friend_...” types when a friendship exists.
- **Give dots a second cue:** ✓ inside green, ✕ inside red, a small arc for skipped, and use the same glyphs on round, summary and home. Build the home dots from the same data as the summary so they can’t drift (S5).
- **Say “friends now” once:** a one-time toast when an invite link creates a friendship, for both the joiner and the inviter, plus “You’re already friends” when a friend re-opens a link.
- **Keep skipped questions visible:** leave the card in place with “Skipped · coming back another day”, and hide its answer on the summary until it has come back.
- **One source for the next-round time:** the recap card, summary footer, onboarding and home should all read from the same helper.
- **Replace “streak”** in the friends strip with “Tap a friend to play their questions.”
- **Remember “Not right now”** for the text ask (e.g. re-ask after 14 days or never), matching the product’s low-pressure tone.
- **Blocked states:** a styled “This profile isn’t available” page, and on the blocker’s side “You’ve blocked this person · Manage blocked people” instead of a bare 404 or “breathing room”.
- **Bot clarity:** a small “Joshing’s question writer” tag next to Maid Acasa.
