

Joshing QA walkthrough — 1–2 October 2026 (run 2)

Production (joshing-11.vercel.app) · phone size 390×844 · accounts A (kept), B and C (created through A's invite link, then deleted)

Evening run 1 Oct ≈20:00–20:51 ET · verification pass 2 Oct 06:40–07:00 ET · next-round pass 2 Oct 14:02–14:12 ET (EDT) · production commit e0241841 (deployment dp1_9bw4xdAufoUNyLCvyin6vSm558TU) · written by Claude for Josh · every time below is Eastern

[1. Summary](#) · [2. Issues](#) · [5. Questions for Josh](#) · [6. Untested](#) · [7. Principles](#) · [8. Suggestions](#) · [9. Cleanup](#) · [10. Timeline](#)

1. OVERALL SUMMARY

1 CRITICAL · 6 SHOULD-FIX · 24 NICE-TO-HAVE

The core flows work: sign-up, the Daily Five, catch-up, the whole friend/block/unblock sequence, invites and account deletion. The one Critical issue is a broken promise. A pressed “Never show this question” on a bonus question. The next day it came back as the first catch-up question, while it was still listed under “Hidden questions” (C1, reproduced 2/2).

Correction to this morning's report (run 1): it said “Not now” on “Add <topic> to your topics?” was fixed. That was a false pass. A had removed Sesame Street on 30 Sep, and that removal hid the result. With a clean account (C), any topic you only *answered* in still appears on “Manage your topics” as “o pts · Sometimes”. That includes a bonus where you pressed “Not now” and a From Friends question you got wrong. Reproduced 3 times on three topics (S1).

Highlights:

- **Fixes are already written** for six findings (S1–S5 and the “Text it” link question), plus one extra spot with the same cause as S1. They're on branch `fix/qa-2026-10-02-findings`, **not yet committed or deployed**. All of them passed a local check (section 3.9).
- **A newly added topic was not served the next day** (S6). The welcome slot from #1739 put Lighthouses of New England first, but it had no ready-made questions, and none were written for it in time, so it was quietly skipped. Why none were written is still a guess.
- **Blocking is solid** in both directions: search, profile link, invite link, personal invite and invite-by-phone all refused. Unblocking did not bring the friendship back. Re-friending showed one “now a friend” row (past fix holds).
- **Grading leans toward the player:** “Thomas Seymore”, “Birnam”, “McGill”, “King Tut” and “Nawlins” were all accepted. “piccolo” for Meredith Willson's instrument was marked wrong (he did play piccolo in Sousa's band), and the appeal accepted it.
- **Deletion is clean:** B and C were deleted in the app. Both numbers get the invite-only message, and there's no trace of them on A's screens or in the database.

Accounts now: A (5552222222, Duo Prova) exists, with topics restored. B (5553333333) and C (5554444444) are deleted and verified.

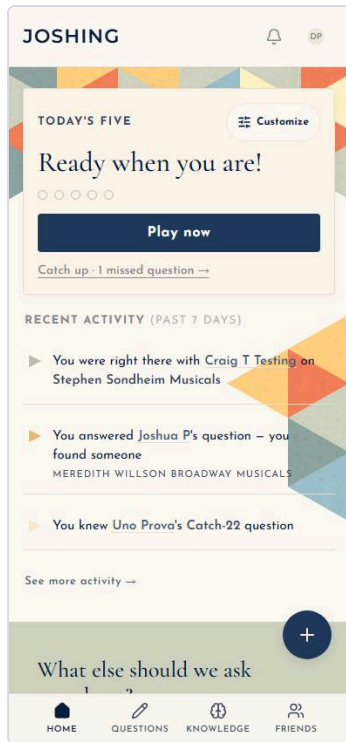

How this run was done

I used the Playwright harness in `scripts/qa/`: three headless 390×844 iPhone-style browsers, one per account, all signed in at once, with console and network errors logged. You approved three things up front: deleting B and C at the end, deleting C first if it existed, and freeing an invite slot for A. The run began at 20:00 ET, after the 1 PM rollover, so I made the next-round changes that evening and checked them after 1 PM on 2 Oct. On the morning of 2 Oct I re-checked every Should-fix cause against the deployed code and read-only database queries, and two causes changed (marked below). The fixes were then checked locally with a throwaway Postgres database. Nothing local touched production.

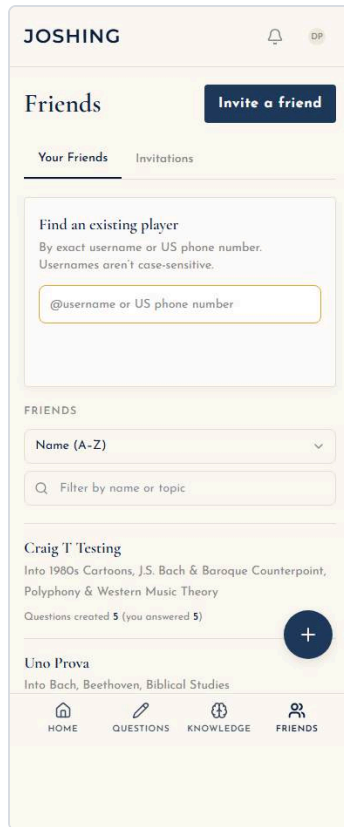

2. STARTING STATE (AS FOUND) AND BASELINE

As found — 20:04–20:06 ET, 1 Oct

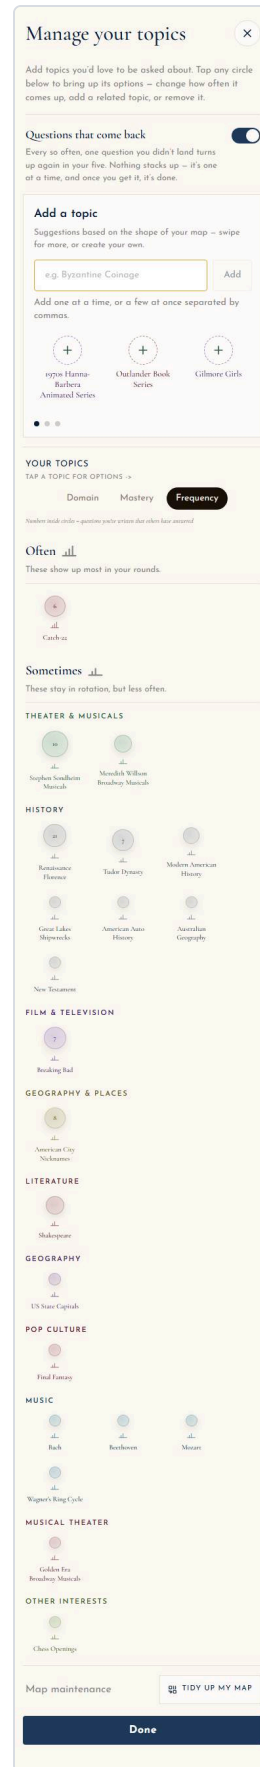

ITEM	A · DUO PROVA · 5552222222	B · 5553333333	C · 5554444444
Account exists?	Yes (signed in through the login screen at 20:04; “Verifying...” took ~8 s)	No — “Joshing is invite-only...” (20:05:40)	No — same (20:05:54)
Friends	Craig T Testing, Uno Prova	—	—
Pending requests / blocked	None / “You haven’t blocked anyone.”	—	—
Invite links	3 of 3: Link 1 “Duo Prova’s greatest hits” (Renaissance Florence, Final Fantasy, Michigan football), Link 2 (Renaissance Florence, Great Lakes shipwrecks), Link 3 (Renaissance Florence, Stephen Sondheim Musicals). “People you invited”: no one yet.	—	—
Privacy	Knowledge Public · Questions Public · Friends list Friends · contacts off · mutual-friend suggestions off · stranger discovery on · SMS off	—	—
Topics	Often: Catch-22. Everything else Sometimes. No Blue Moon or Never. Renaissance Florence under History, Final Fantasy under Pop Culture.	—	—
Today’s round	“Ready when you are!” · “Catch up · 1 missed question”	—	—

L05 · 20:05:54 · C · /login
C login attempt (as found)

Baseline — reached 20:12:25 ET

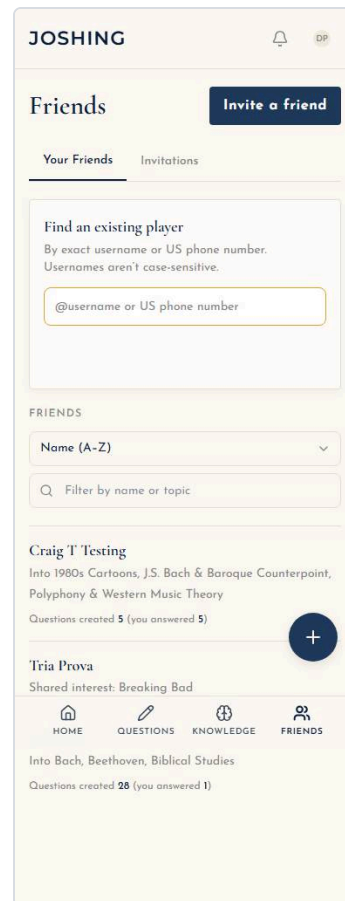

B and C didn't exist, so both signed up through the same new A link (section 3.5). That made both of them A's friends. A then unfriended B (20:12:01). Baseline: A and B are not friends, not blocked, and have no pending requests. Nothing resisted the reset.

3.1 ONBOARDING & AUTH

What worked: the invite link pre-fills the login with “Duo invited you to Joshing... you and Duo will be friends.” A wrong code shows “Code invalid or expired”. The second “Send a new code” (after 30 s) says “New code sent.” The username box cleans itself up (“Bad Name!” → “badname”), and says “That username is already taken.” for “duoprova”. The disabled button explains itself (“Pick at least 3 to start”, “2 selected · pick at least 1 more”). Onboarding offers the inviter's topics plus one labelled “FROM JOSHING”. The invite-only message is visible without scrolling (top at y=702 of 844).

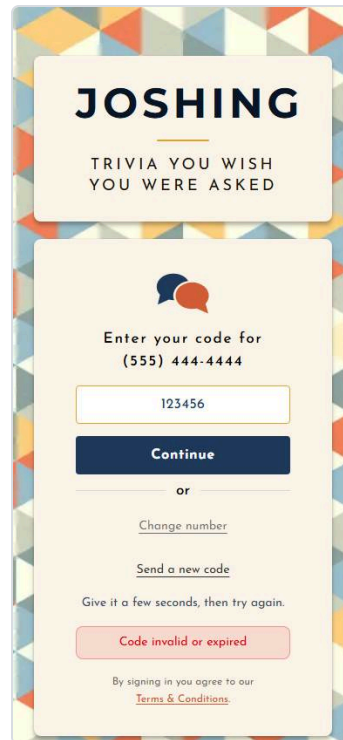

Issues: right after a wrong code, “Send a new code” shows “Give it a few seconds, then try again.” next to the old “Code invalid or expired”, with no wait time given (N1). The onboarding chip “×” is 20×20px, but that's exempt under the canon (§9.1, chip-dismiss).

3.2 GAMEPLAY

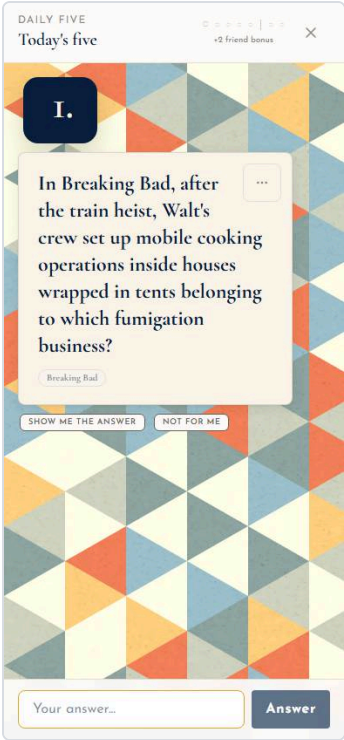

A's Daily Five (20:13–20:15)

TEST	QUESTION	ANSWER GIVEN	VERDICT
Clearly correct	Breaking Bad fumigation business	"Vamonos Pest Control"	✓ "LOCKED IN." (answer "Vamonos Pest")
Typo	Catherine Parr's fourth husband	"Thomas Seymore"	✓
Clearly wrong	Song that replaced "Happily Ever After" in <i>Company</i>	"The Ladies Who Lunch"	✗ "Close, but not quite." → "Being Alive", "NOW IT'S IN YOURS TOO"
Ambiguous	Instrument Meredith Willson played professionally	"piccolo"	✗ "Not this time", "Close! ... he played the bigger one." (he played flute <i>and</i> piccolo for Sousa)
Short form	Macbeth's wood	"Birnam"	✓
Show me the answer	Second Look: Hartford nickname	—	Revealed; counted as "Not this time" (deliberate)
Not for me → Never show	Bonus 1 "FROM CRAIG'S WORLD": Spy School, Alexander Hale	—	"HIDDEN. YOU WON'T SEE THIS QUESTION AGAIN." (but see C1)
Not for me → Skip for now	Bonus 2 "FROM CRAIG'S WORLD": Sesame Street Count	—	"SKIPPED. WE'LL BRING IT BACK LATER."

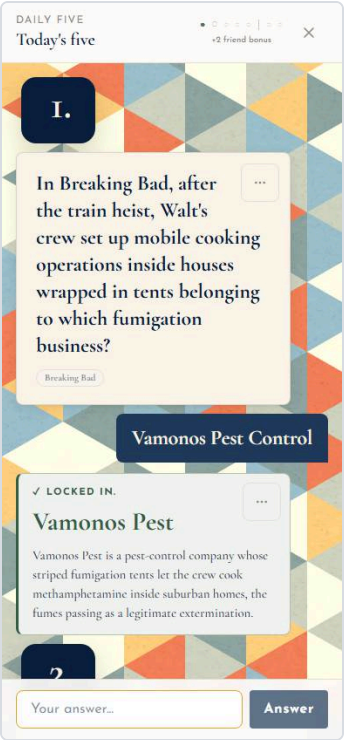

C's first five (20:39–20:40), partly right and nicknames: "McGill" for Saul Goodman's real name ✓, "King Tut" ✓, "Nawlins" ✓, "Cloud Strife" ✓, "a mosquito" ✗ ("Right episode, wrong bug"). Bonuses

came in this order: Catch-22, then Renaissance Florence, both “FROM DUO'S WORLD”. The round ended with “Strong. Four in a row at one point.” (see Principles).

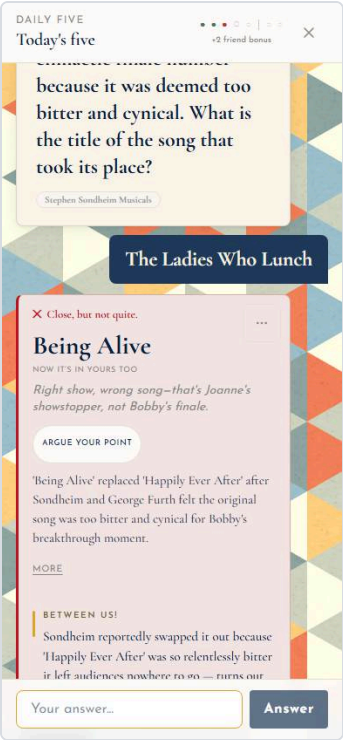

Counts agree: round, recap and home all said 5 of 5, with the bonuses separate (“+2 friend bonus”, never filling the five) and “Five new tomorrow at 1 PM”. Home's dot label calls the hidden bonus “Skipped” (N2). The recap labels the bonuses “from Craig's knowledge” while the round said “FROM CRAIG'S WORLD” (N3).

Catch-up and appeals (20:17–20:19)

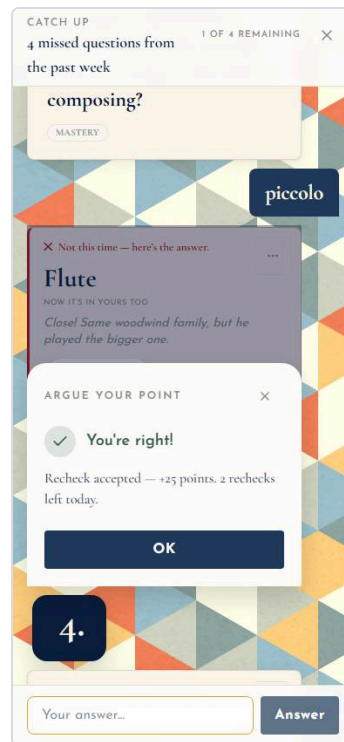

“Play (4) Missed Questions” → “4 missed questions from the past week”. Labels are correct: the Spy School “FROM YESTERDAY’S FIVE” came from the 30 Sep round (database). Points are shown as “+3 POINTS - CATCH-UP - 0.25X POINTS”. “piccolo” again → “Argue your point” → “Recheck accepted — +25 points. 2 rechecks left today.” The card itself still said “X Not this time”, “+0 POINTS” and “he played the bigger one” (S3). The original Five’s recap still marks the same answer “Not this time” (Questions for Josh). Once a round is finished, “/daily” always opens the recap, which has no “Argue your point”. Its only option is “This is incorrect” (a report), and after sending it the card shows a badge “Marked incorrect” that reads like a grade (N4).

Lately, answers and the airplane (20:19–20:25)

Every card A had played showed its answer under “ANSWER” (“110”, “Captain John Yossarian”). The airplane appeared only on known questions. “Send in Joshing” opened the friend picker with the question

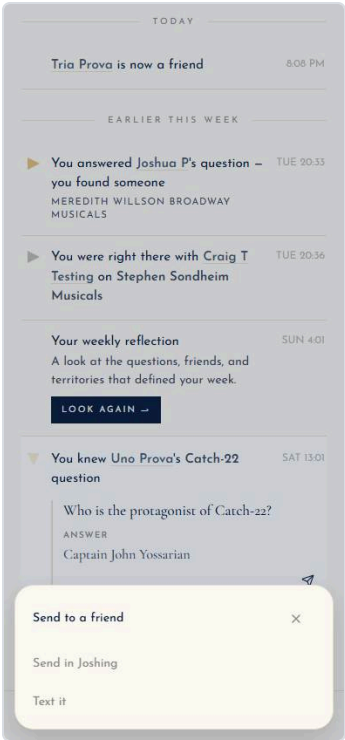

only. C received it as “QA note: try this one” with no answer, but the card read “Duo Prova sent you a question they wrote” above “by Uno Prova · Add friend” (S5). On the phone, “Text it” fired sms:&body=Did you know?... Captain John Yossarian... Play on Joshing: https://joshing-11.vercel.app. On a *played From Friends* card on home, the menu opened under the bottom nav and the + button, so “Text it” couldn't be tapped (S2, 2/2). Answering a From Friends question wrong and texting it before reloading *did* include the answer (“Mudd...”), which is better than the accepted limitation.

Weekly ceremony

“WEEK 14 · SEP 21 – SEP 27” / “Seven days of knowing things.”: seven days, so it matches. Screens: moved up (Establishing → Familiar, Catch-22), discovered, worked through, then “WHAT YOU GAVE — Uno

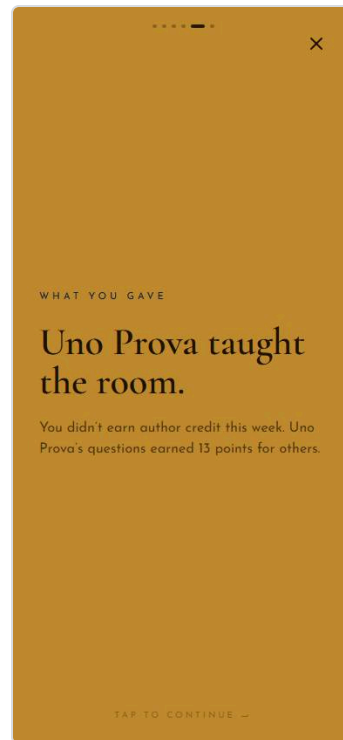

Prova taught the room. You didn't earn author credit this week.” (see Principles). “Mastered” doesn't appear this week. The reflection is dated Sun 4:01 but covers that whole Sunday (N5).

3.3 FRIEND SYSTEM (FROM THE BASELINE)

STEP	TIME	RESULT
1. A searches B by handle and phone	20:25:51–55	Found both ways (“joined 15m ago”)
2. Request with a note	20:26:14	B sees ““Hi Bina, QA test note #1”” on Friends and twice on home (a “WANTS TO CONNECT” card and an activity row, each with Accept/Decline, N6)
3. B declines; A re-sends	20:26:41 / 20:27:11	The decline stays hidden (“Waiting”). A cancels and re-sends; B sees nothing. Copy inconsistency: “Request sent · just now” vs “0m ago” (N7)
4. B requests; A accepts	20:27:43 / 20:28:06	Friends on both lists, in search (“Friends ✓”) and on profiles. Invite-by-phone says “You’re already friends with Bina.” A saw B’s incoming request and A’s own outgoing “Waiting” at the same time (N8). “People you invited” said “Not connected” until a reload (N9). B’s Lately listed “accepted your friend request 8:28 PM” below a 6:27 AM row (N10)
5. A blocks B	20:30:11	A: B gone from friends, invited list and Lately; search says “You’ve blocked this person.” B: A not found by handle or phone; A’s profile “This page isn’t available.”; home and Lately empty
6. Reconnect attempts while blocked	20:31–20:33	B → A’s link: “This invitation is no longer available.” B’s invite note to A’s phone was created (it doesn’t reveal A exists); A accepting it: “no longer available for this account.” A invite-by-phone to B: “You’ve blocked this person. Unblock them in Privacy settings first.”
7. Unblock	20:33:43	Instant (no confirm). Not friends. Re-friending showed ONE “Bina Prova is now a friend” row ✓

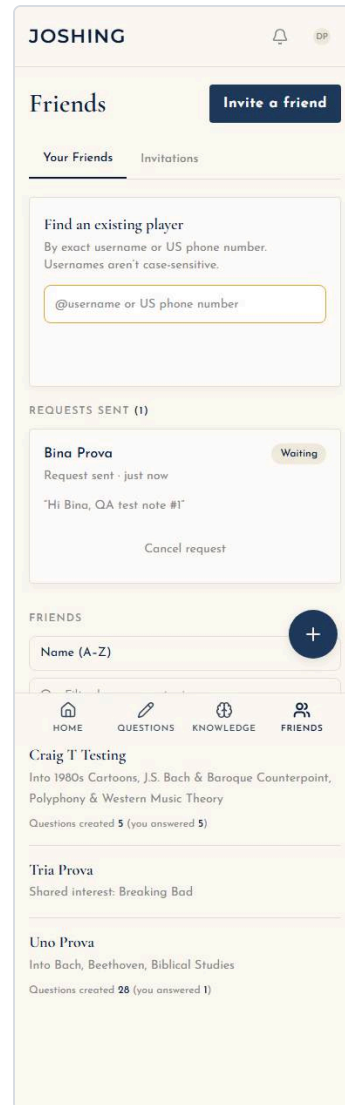

Also: search rate limit works (“Please wait 45 seconds before searching again.” after a burst, HTTP 429). Mutual-friend suggestions respect opt-in: Craig (opted in) and Bina showed for C; Uno (off) didn’t. Co-invitees: B and C redeemed the same link and were **not** made friends with each other (there’s no code for that, so it’s consistent with friend = mutual). Craig’s profile says “You both claim American City Nicknames — neither’s been tested yet” while listing “Which American city is nicknamed ‘Motor City’? You answered ✓” (N11).

3.4 KNOWLEDGE, PROFILE & TOPICS

The portrait adds up: 5 circles + “+6 more territories” = “2,156 knowledge points across 11 territories”. Mastery and Frequency views group topics under text headings (FAMILIAR / ESTABLISHING, Often / Sometimes / Never), so color isn't the only cue. The circle numbers are captioned “Numbers inside circles = questions you've written that others have answered”, but they count questions answered (A wrote 2 questions; circles show 21, 12, 9, S4). Categories have near-duplicates: “Geography” vs “Geography & Places”, “Musical Theater” vs “Theater & Musicals”. C's Renaissance Florence landed in a category called “Renaissance Florence”, and C's American City Nicknames in “Miscellaneous Trivia” (A has it under Geography & Places) (N12).

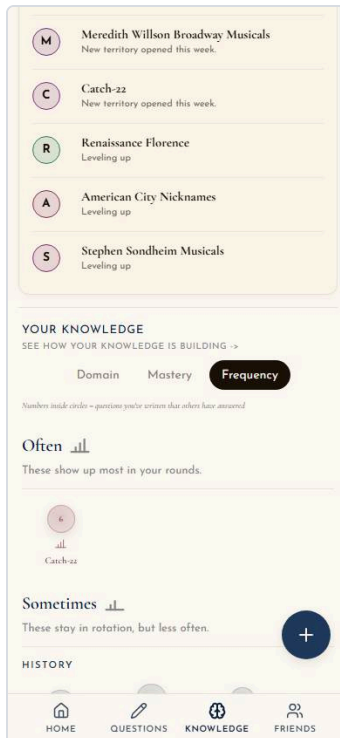

CHANGE	TIME	RESULT
Breaking Bad Sometimes → Often	20:43:30	Saved, survived reload, same on the knowledge page
Shakespeare Sometimes → Never	20:43:35	Saved, survived reload
Remove Meredith Willson (110 pts)	20:44:14	Confirm says “Your points are kept — add it again any time”. No Undo afterwards. It lingers under knowledge “RECENTLY EXPANDING ... New territory opened this week.” (fixed on the branch along with S1)
Re-add it	20:45:10	““Meredith Willson Broadway Musicals” is back on your map — the points you'd earned are still there.” 110 pts, Sometimes ✓
Add new “Lighthouses of New England”	20:45:36	Added with no confirmation (the re-add has one, N13). It landed in a new “ARCHITECTURE & DESIGN” category. It was not served the next day (S6)
Restore	2 Oct 14:08– 14:09	Breaking Bad → Sometimes, Shakespeare → Sometimes, Lighthouses removed. Restored, except that Jazz History now shows in A's list because A answered Tria's Jazz bonus wrong at 14:04 (S1). I didn't “remove” it, because removing leaves a hidden exclusion, which is what masked run 1. The fix hides it.

3.5 INVITE SYSTEM

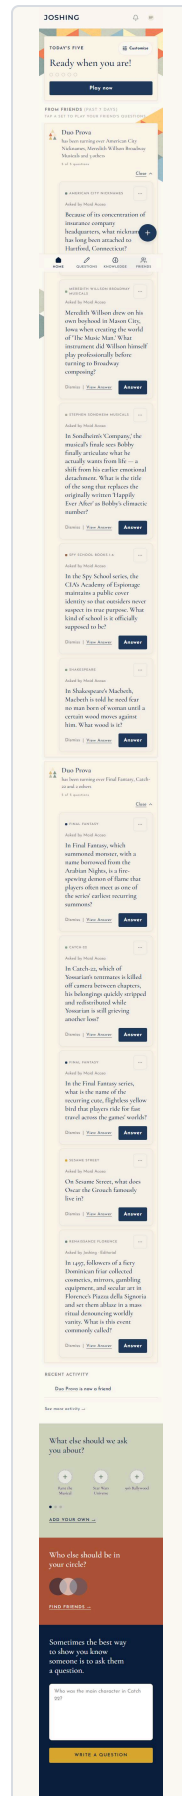

A freed a slot by deleting Link 3 (approved; the confirm says “The link stops working right away.”), then created “Final Fantasy & Film & Television” (Final Fantasy + Breaking Bad). The title mixes a topic and a category (N14). “Your categories” offers “Michigan football”, which isn't on A's map (N15). C (fresh) and B (fresh) both redeemed that link and became A's friends. Existing-user redeem (B on Link 1, 20:35) formed a friendship **with no confirmation**, landing silently on home (N16). Blocked redeem refused (above). The invalid link and deleted Link 3 token both show “This invitation link is no longer valid.” The invalid personal invite shows “Go to login” to a signed-in user (N17). A personal invite with no ideas says “Bina Prova picked a few categories to get you started” (N18). Someone else's personal invite: “no longer available for this account”. Expired links weren't testable.

3.6 NEXT ROUND (2 OCT, AFTER THE 1 PM ROLLOVER)

CHECK	TIME	RESULT
Shakespeare (Never) stays out of A's five, catch-up and bonus	14:04–14:06	PASS Not in any of them. Weak test: A had no missed Shakespeare questions to begin with
New topic Lighthouses of New England appears	14:04	Fail (S6) . Build record 17:05 UTC: it was tried first ("Lighthouses of New England · miss · tier"), then filled from other topics. No main-five generation ran
Breaking Bad (Often) shows up	14:04	PASS Q2 was Breaking Bad (one round can't prove frequency)
Hidden "Alexander Hale" question stays away	14:05 / 14:06	Fail (C1) : catch-up item 1, while still listed under Hidden questions. 2/2
B (blocked by A) gets no "from Duo's world"	14:08	PASS No bonus at all. Caveat: A is B's only friend, so this can't separate "blocked" from "no friends"
C (A's friend) still gets them	14:07	PASS "BONUS 1 of 2 · FROM DUO'S WORLD" (Meredith Willson, then Sondheim). A's own bonus said "FROM TRIA'S WORLD" (Jazz History)
Is Catch-22 (declined) served to C?	14:07	NOT SERVED . Rotation reads only real topic rows (getKnowledgeBase, daily.ts:320), so S1 is misleading but doesn't serve anything
Repeat "Not now" on a fresh topic	14:07:48	Bug reproduced : C's "Manage your topics" listed Meredith Willson (database: one answer event, no topic row)
Catch-up re-appeal (past fix S2)	—	Untested: no previously appealed question came back

3.7 DESIGN SYSTEM REVIEW

Run with `designAudit()` on every main screen, then confirmed on screenshots. Intentional inline links and canon-exempt controls (chip “×”, switch tracks) aren't filed.

- **Touch floor (\$9.1, “chunky” ruling):** round “SHOW ME THE ANSWER” 144×19 and “NOT FOR ME” 87×19 (bordered pills, not exempt); setup “Done — changes save automatically” icon 40×40; profile “Block” 28×44; home “Catch up · 1 missed question →” 20px tall; Lately “LOOK AGAIN →” 31px; carousel dots 8×8 (N19).
- **Overlap:** the send sheet under the nav and + button on played From Friends cards (S2). On desktop the FAB sits over card content: the end of the home question text, and next to “Share” on Knowledge (N20).
- **Fonts:** no off-system families found. No sideways scroll at 390px or 1280px.
- **Copy consistency:** Lately mixes “8:08 PM” and “TUE 20:33” (N21). “Play (4) Missed Questions” (N22). The summary card menu offers both “Rest Meredith Willson...” and “Move ... to Never” (N23).

3.8 DESKTOP PASS (1280×800, A, 20:47–20:49)

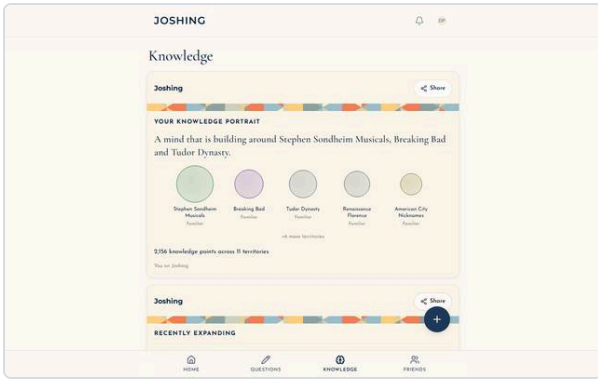

No horizontal scroll or console errors on home, summary, friends, knowledge, topics, profile or Lately.

“Text it” copied “Did you know?” + question + “Captain John Yossarian” + “Play on Joshing:

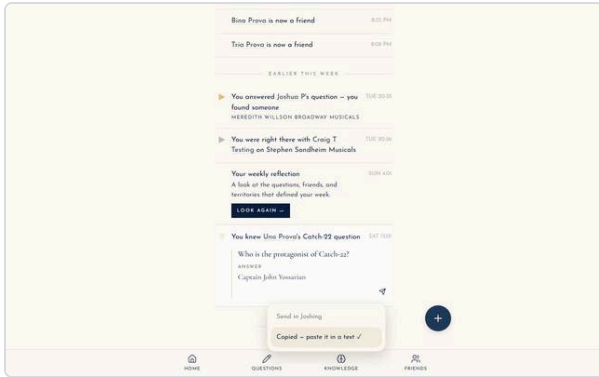

`https://joshing-11.vercel.app`” and showed “Copied — paste it in a text ✓” for 1.4 s (easy to miss, N24). Only difference from phone: the FAB overlap (N20).

3.9 RE-CHECKED PAST FIXES, AND THE FIXES NOW ON THE BRANCH

PAST FIX	RESULT
“Not now” on “Add <topic>?” doesn't add the topic (after 29 Sep)	Fail. Run 1's pass was masked by an existing exclusion. Reproduced with C (Catch-22 20:40, Meredith Willson 14:07) and A (Jazz History 14:04) → S1
Catch-up re-appeal on a later attempt (S2, 1 Oct)	Untested — no previously appealed item returned
Topic stays in the player's category (S5)	PASS Renaissance Florence under History, Final Fantasy under Pop Culture, before and after playing
Remove / re-add copy (S6)	PASS “Your points are kept...” / “...is back on your map — the points you'd earned are still there.”
One “now a friend” row; former friend's activity disappears (S1)	PASS One Bina row after unfriend → block → unblock → re-friend; B's Lately emptied while blocked
“Never show this question” (after 26 Sep)	Partial. Kept out of the five and the bonuses, listed under Hidden questions, but returns in catch-up → C1

Fixes written on 2 Oct, on branch `fix/qa-2026-10-02-findings` (separate working copy, **not committed, not deployed**). Typecheck clean, 276 tests pass. Checked locally against a throwaway database at 08:00–08:30 ET:

- S1: the topic list, the friend knowledge page and “Recently expanding” show only topics with points or ones you added (`src/lib/knowledge/on-map.ts`). Locally, Tudor Dynasty (answered wrong) and Sesame Street (declined bonus) stayed off.
- S2: the send menu and friend picker draw at the page's top level, and the answered-card fade moved to the question text. Locally, “Text it” was the top element at its spot.
- S3: catch-up flips the card to correct on an accepted appeal (server answers faked in the browser for this one). Locally it showed “LOCKED IN” and “+25 POINTS”, and no “Not this time”.
- S4: the key now reads “Numbers inside circles = questions answered in each topic” (a label fix; the “questions you wrote that others answered” count was never built).
- S5: “...a question they wrote” only when the sender is the author. Locally a forward read “Finn Friend sent you this”.
- “Text it” now carries the sender's own invite link (the one whose topics match, else their first; the site URL if they have none).

4. PRIORITIZED ISSUE LIST

Critical

C1 • A question marked “Never show this question” comes back in catch-up

Seen: 1 Oct 20:14:32 · A · /daily · bonus “FROM CRAIG'S WORLD” (Spy School: “...how is he related to Erica Hale?”) → NOT FOR ME → “Never show this question” → “HIDDEN. YOU WON'T SEE THIS QUESTION AGAIN.” It's listed under Hidden questions (20:50). On 2 Oct 14:05 · A · /daily/catchup it was item 1 of 9, “FROM YESTERDAY'S FIVE · you skipped this”, while still listed under Hidden questions (14:05:31).

Repro: hide a bonus question → after the next 1 PM open catch-up. **Times:** 20:14:32, 14:05:13, 14:06:22. **Reproduced:** 2/2. **Shots:** G10, NR03, NR04, NR05.

Possible cause (confirmed in code): `getDailyCatchupItems` in `src/server/db/queries/daily.ts` (~lines 806–870) filters resting topics, blocked questions and your own questions, but never reads `HiddenQuestion`. Hiding also marks the slot skipped, which makes it catch-up eligible. The 26 Sep fix covered the five (`queue-orchestrator.ts:624`) but not catch-up. **Not fixed yet.**

Should-fix

S1 • Topics you only answered in show up as your topics (includes “Not now”)

Seen: C (clean account): 20:40:33 “Not now” on “Add Catch-22 to your topics?” → “Manage your topics” lists “LITERATURE · Catch-22”, “0 pts”, “Sometimes” selected. 2 Oct 14:07:48: “Not now” on Meredith Willson (never answered before) → listed. A: Jazz History listed after one wrong bonus answer (14:04).

Times: 20:40:33, 06:50, 14:07:48, 14:09. **Reproduced:** 3/3. **Shots:** CG06, CG09, Vo2, NR08, RS01.

Possible cause (confirmed; first draft was wrong): “Not now” itself writes nothing (no `PLAYER_MASTERY`, `DeclaredInterest` or preference rows). The list comes from `/api/knowledge: getKnowledgePageData` adds every topic found in answer history (`loadDomainAggregates`, `knowledge.ts:482`), and `KnowledgeFlatClient.tsx:381` showed every non-hidden one. The map tree and the rotation (`daily.ts:320`) use only real topic rows, so nothing is served (C's round had no Catch-22). **Fixed on the branch.**

S2 · On a played From Friends card, the send menu opens under the bottom nav, so “Text it” can't be tapped

Seen: 20:23:39 and 20:24:49 · C · /. The element at “Text it”'s centre was the nav's “KNOWLEDGE”, and the + button covered the sheet.

Reproduced: 2/2 (also after reload). **Shots:** FF04, FF05.

Possible cause (confirmed): FromFriendsStreak.tsx:385 opacity: spent ? 0.72 : 1 makes the card a stacking context, which traps the z-sheet (50) layer under the nav (40). **Fixed on the branch.**

S3 · After an accepted appeal in catch-up, the card still says wrong

Seen: 20:18:00 · A · /daily/catchup: “Recheck accepted — +25 points” beside “× Not this time”, “+0 POINTS” and “he played the bigger one.” **Reproduced:** seen once; the cause is in code. **Shots:** K06, K07.

Possible cause (confirmed): the daily round flips its slot to correct (daily/page.tsx:630–640). Catch-up only updates the tally and recap (useCatchupFlow.ts:668–678). **Fixed on the branch.**

S4 · The knowledge-circle key describes the wrong number

Seen: 20:38 · A · /knowledge, /daily/setup. The key says “questions you've written that others have answered”. A wrote 2 questions; circles show 21, 12, 9. **Shots:** KN02.

Possible cause (confirmed): KnowledgeFlatClient.tsx:126 and knowledge-view.ts:26 pass questionsAnswered. No caller computes the authored count (the overview's source throws “not implemented”). **Fixed (relabelled) on the branch.**

S5 · A forwarded question says the sender wrote it

Seen: 20:21 · C · /: “Duo Prova sent you a question they wrote” directly above “by Uno Prova · Add friend”. **Shots:** LT09.

Possible cause (confirmed): FeedList.tsx:400 sets authoredBySender = question_source === 'authored', which is true for any human author. Showing “by Uno Prova” itself is fine: Uno allows stranger discovery and questions are public. **Fixed on the branch.**

S6 · A newly added topic isn't served the next day

Seen: A added “Lighthouses of New England” at 20:45:36. A's 2 Oct round (built 13:05:46 ET) had no Lighthouses question. **Shots:** TP09, NR02.

Possible cause (half confirmed): *Confirmed* by read-only DailyBuildMetric: the welcome rule (#1739) worked. The first bank attempt was “Lighthouses of New England · miss · missReason tier”, and the five filled from 5 bank hits in other topics; the only generation round recorded is phase: bonus. Production logs 17:00–17:15 UTC show Lighthouses “fall_through”, followed by a generation batch where quality gates dropped several questions. *Unconfirmed guess* for why no Lighthouses question survived: either no core generation was requested once other topics' bank hits covered the five (generate-questions.ts ~3288: remainingCount = count - bankPicks.length), or generated Lighthouses questions were dropped by the gates or the off-by-default NARROW_KB_GUARD_ENABLED guard (its production value couldn't be read). **Not fixed yet.**

Nice-to-have

- **N1** Resend cooldown: “Give it a few seconds, then try again.” beside a stale “Code invalid or expired”, with no wait time (Co3).
- **N2** Home dot label calls a hidden bonus “Skipped”.
- **N3** “FROM CRAIG'S WORLD” (round) vs “from Craig's knowledge” (recap).
- **N4** The recap has no appeal after a finished round (by design: the miss comes back in catch-up, where Argue works); the “Marked incorrect” badge after a report reads like a grade.
- **N5** Weekly reflection dated Sun 4:01 but covers that whole Sunday.
- **N6** The same incoming request appears twice on B's home, each with Accept/Decline (FR05).
- **N7** “Request sent · just now” vs “Om ago”.
- **N8** A sees B's incoming request and its own outgoing “Waiting” to B at once (FR11).
- **N9** “People you invited” says “Not connected” until a reload after becoming friends.
- **N10** B's Lately out of order: an 8:28 PM row below a 6:27 AM row.
- **N11** Craig's profile: “neither's been tested yet” next to “You answered ✓” in the same topic.
- **N12** Category near-duplicates and per-player drift (Geography / Geography & Places; Musical Theater / Theater & Musicals; “Renaissance Florence” and “Miscellaneous Trivia” as categories for C).
- **N13** Adding a new topic shows no confirmation (re-adding does).
- **N14** Link title “Final Fantasy & Film & Television” mixes a topic and a category.
- **N15** “Michigan football” offered under “Your categories” though not on A's map.
- **N16** An existing player redeeming a link becomes friends silently, with no confirmation.
- **N17** Invalid personal invite shows “Go to login” to a signed-in user.
- **N18** A no-ideas personal invite says “Bina Prova picked a few categories...”.
- **N19** Tap targets under 44px (section 3.7).
- **N20** Desktop FAB overlaps card content (DK1, DK4).
- **N21** Lately time formats mixed (“8:08 PM” / “TUE 20:33”).
- **N22** “Play (4) Missed Questions” formatting.
- **N23** Recap card menu has both “Rest ...” and “Move ... to Never”.
- **N24** Desktop “Copied — paste it in a text ✓” lasts 1.4 s. Also: “piccolo” marked wrong for Willson (appeal accepted it and saved it as an alternative); question content: the Macbeth stem conflates two prophecies, and the *Sunday in the Park* answer is missing a closing quote.

5. QUESTIONS FOR JOSH

- **“Text it” link.** Before the branch, the text linked the bare site, so a non-member hit “Joshing is invite-only”. The branch now uses the sender's own invite link, which means whoever joins through it automatically becomes the sender's friend. A player with no links still gets the site URL. Should Joshing make a link for them, using one of their 3 slots?
- **Accepted appeal vs the original Five.** Winning the appeal in catch-up (+25) leaves today's recap still saying “Not this time” for the same answer. Should an accepted appeal also correct the original round's card?

- **Removed topics in catch-up.** A's skipped Sesame Street bonus (a topic A removed on 30 Sep) is in catch-up. Catch-up filters resting topics but not removed ones. Intended?
- **Bonus misses in catch-up.** Missed bonus questions from friends' topics (Jazz History) join A's catch-up although A doesn't have that topic.
- **Real-phone “Text it”** on iPhone and Android is still owed. Automation can only see that Messages was asked to open.

6. UNTESTED

- Expired OTP code and expired invite links: would need waiting for expiry or a database change.
- Catch-up re-appeal (past fix S2): needs a previously appealed question to come back.
- Never for missed-question returns: A had no missed Shakespeare questions. Needs a missed Shakespeare question first.
- Blocked friend's bonus: B had no other friends, so "blocked" and "no friends" looked the same. Needs B to have a second friend.
- Real-phone Messages hand-off (see above).
- Whether a declared interest changes the next questions: shown only negatively (S6).

7. PRINCIPLE AUDIT

PRINCIPLE	VERDICT	EVIDENCE
No streaks, leaderboards or coercion	Mostly holds	No streak counters or leaderboards. Two lines lean that way: “Four in a row at one point.” (C's round end) and the ceremony's “You didn't earn author credit this week. Uno Prova's questions earned 13 points for others.”
Wrong answers feel like connection	Holds	“NOW IT'S IN YOURS TOO”, “Right show, wrong song”, “You'll know this one next time.”
Color never carries meaning alone	Holds (except the accepted dots)	Levels have text headings; verdicts have ✓/✗ and words. Round dots are color-only (accepted).
Grading fails toward the player	Mostly holds	Typo, short form, surname-only, nickname and slang all accepted. “piccolo” rejected until appealed.

8. SUGGESTIONS FOR IMPROVEMENT

- One “is this topic on the map?” rule (the branch adds `isOnMap`) used by every surface: topics screen, knowledge, catch-up, Recently expanding and invite-link category pickers.
- Make “hidden” a single filter applied wherever questions are served (five, bonus, catch-up, missed returns, From Friends).
- For a welcome-slot topic with no bank stock, run one small core generation for it, or show “Your first Lighthouses questions are on the way” instead of skipping silently.
- Give a link redemption by an existing player a small “You and Duo are now friends” confirmation.
- Show the resend cooldown in seconds, and clear the old error when a new message appears.

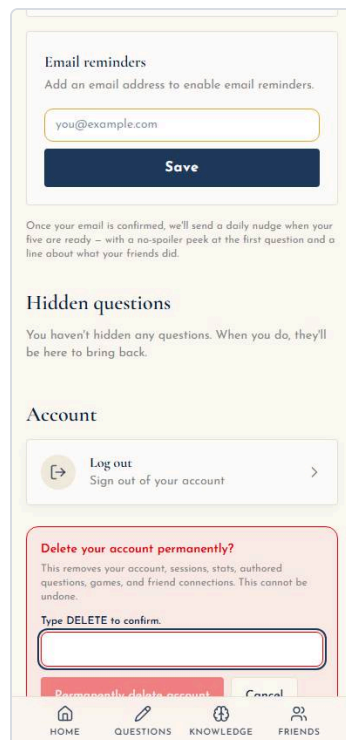

9. CLEANUP

B deleted at 14:09:52 and C at 14:10:17 on 2 Oct, in the app (profile → “Delete account” → typed DELETE → “Permanently delete account” → “Your account was deleted.”). Each window's name and phone were checked first. Verified: 5553333333 and 5554444444 both get “Joshing is invite-only” (14:10:38, 14:10:46). A's friends, search (both handles and phones), blocked list, “People you invited” (“No one yet.”), Lately, home, recap and catch-up have no Bina or Tria. Link 3 shows “o friends joined”. Database: o User, Follow, FeedItem and DailyQueue rows for either. A's topics are restored except the Jazz History entry from S1 (left on purpose, see 3.4). Deleted Link 3 (“Renaissance Florence & Theater & Musicals”) can't be restored with its old address; A's Link 3 is now “Final Fantasy & Film & Television”. **Accounts now:** only A exists.

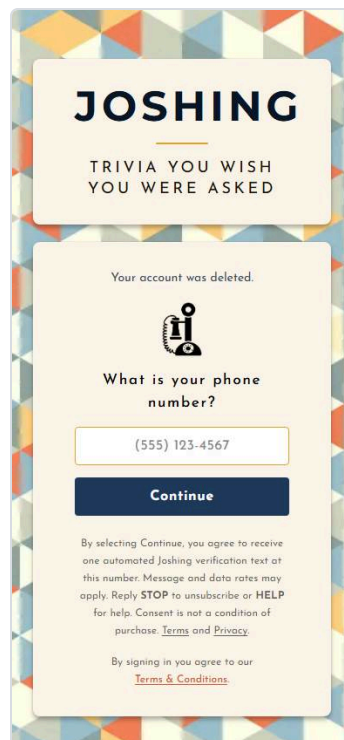

Lasting changes this run made in production (beyond A's restored topics):

- A's “Hidden questions” now contains the Spy School “Alexander Hale” question (A had none at the start). It's kept on purpose so C1 can be re-tested after a fix; “Bring back” undoes it.
- The accepted appeal saved “piccolo” as an accepted answer on the real Meredith Willson question (GradeDispute alternative_added), so every player will now be marked right for it.
- A's “This is incorrect” report on that question (20:16:30) is in the admin review queue.
- A's 1 Oct and 2 Oct rounds include deliberate test answers (A's 2 Oct round is all “not sure”), so A's stats for those days are skewed.
- A's invite links: original Link 3 deleted (20:06:28); new Link 3 “Final Fantasy & Film & Television” created (20:06:48).

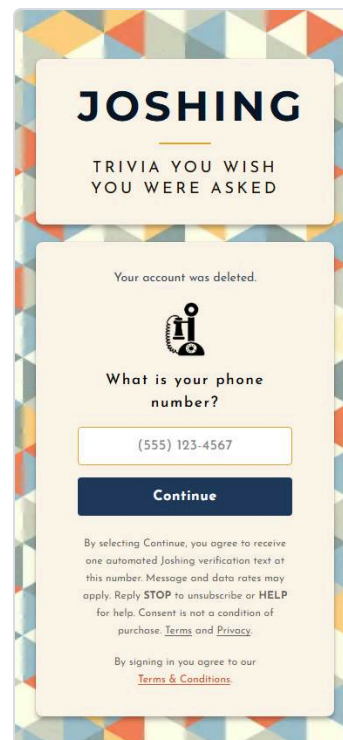

Screenshots that would show A's working invite-link addresses are left out of this report on purpose.
