

# Joshing QA walkthrough — 2026-09-26

Exhaustive phone-width walkthrough of production (joshing-11.vercel.app), accounts A / B / C

Run 10:34–13:09 ET, Saturday 26 Sep 2026 · Viewport 390 px wide (≈390×759; see "How this was run") plus one desktop pass at 1280 px · Accounts: A = Duo Prova (+1 555-222-2222, kept), B = Tre Prova (+1 555-333-3333, created and deleted this run), C = Quat Prova (+1 555-444-4444, created and deleted this run) · All times Eastern (EDT).

---

## 1 · SUMMARY

### CRITICAL

**“Never show this question” has never worked in production.** Every press returns 500 from `POST /api/questions/hide`, the round view goes blank with “Could not hide that question.”, and the `HiddenQuestion` table holds **zero rows ever**. Reproduced 2/2 (C1).

Most of the core loop works well at phone size: sign-up by invite, onboarding, a first round in about 30 seconds, generous grading (a typo, a vague “King Charles of France”, and a near-synonym were all marked right), and the friend system’s privacy rules (quiet decline, blocks hiding both people from each other, blocked invites refused without revealing the block, unblock not restoring the friendship). Several issues from yesterday’s report are fixed.

The main problems, besides C1:

- **“Skip for now” on a bonus question says it “rested” the whole topic** (“Resting Mozart. You won’t see these in your five.”), but it didn’t. The code shows that message for every skipped bonus (S1, 2/2).
- **The recap shows the answers to questions you chose to “skip for now”**, so they are spoiled before they “come back another day” (S2; also in yesterday’s report).
- **The welcome tour makes up activity for a real person**: “Duo Prova sent you a question they wrote”, “aced all five in Tennis Fundamentals” (S3).
- **Feed rows that are no longer true come back**: after block → unblock, B’s home says “Duo Prova accepted your friend request” and “is now a friend”, but they aren’t friends (S4).
- **Catch-up says “You’re all caught up”** and then offers the same question again straight away (S5, 2/2).
- **“People you invited” never lists people who joined by link**. A’s link says “2 friends joined” while the section says “No notes sent yet.” (S6).

**Accounts at the end**: only A (Duo Prova, +1 555-222-2222) still exists. B (Tre Prova) was deleted at 13:05 and C (Quat Prova) at 13:06, both through the app’s Delete account flow, and both numbers now return “Joshing is invite-only”.

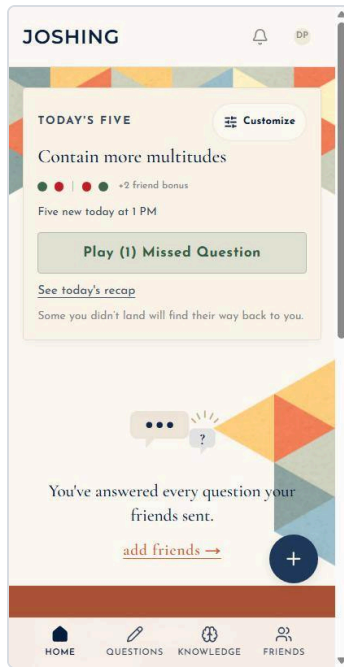

## HOW THIS WAS RUN

- **Viewport.** `resize_window` has no effect on this machine and the Chrome tab reports `visibilityState=hidden`. So the app was loaded in a same-origin `<iframe>` 390 px wide, filling the tab height (759 px, a little shorter than a 390×844 phone). The desktop pass used a 1280 px iframe scaled to fit. Screenshots are cropped to the phone frame.
- **Two accounts at once.** Chrome windows share cookies, so separate windows can't hold two sessions. I switched accounts by logging out and logging in again (OTP 000000) through the app's own `/api/auth/request-otp` and `/verify-otp`. I used the full login UI for A (10:39), B (10:42) and C (10:51).
- **Side effects of the harness.** Because the tab is hidden, rendering is throttled. Some screenshots timed out and were retried. Mouse-wheel scrolling doesn't reach the iframe, so I scrolled with script where needed. Typing sometimes didn't land on the first try. None of these are filed as app bugs.
- **Database.** I ran read-only queries (inside `BEGIN READ ONLY`) only to confirm what happened (skip rows, the `HiddenQuestion` count, queue dates). I made no database writes.
- **Console.** Errors were captured in the iframe (hooked `console.error`, `onerror`, `unhandledrejection`) and with the tab-level reader. Browser dialogs were stubbed to log instead of block. No native dialogs appeared.

SS-11 · 10:38 · anon · /login · B number → invite-only

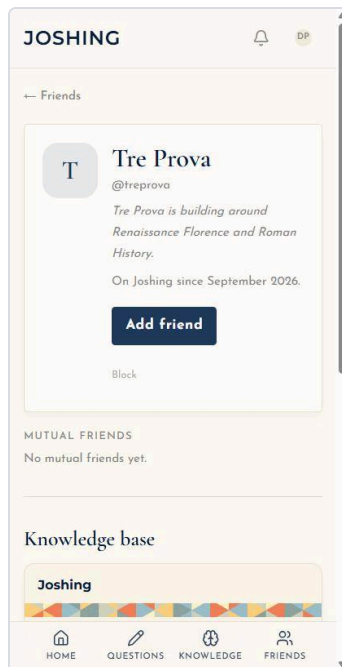

A's home showed 2 regular dots and "2 of 5 answered", while the recap listed 3 regular-question cards (Florence ✓, Steel City ✓, Richard III ✗) plus 2 bonus cards. This came from the previous run and I couldn't trace it further, so it's noted and not filed.

### Baseline (reached 11:03–11:04)

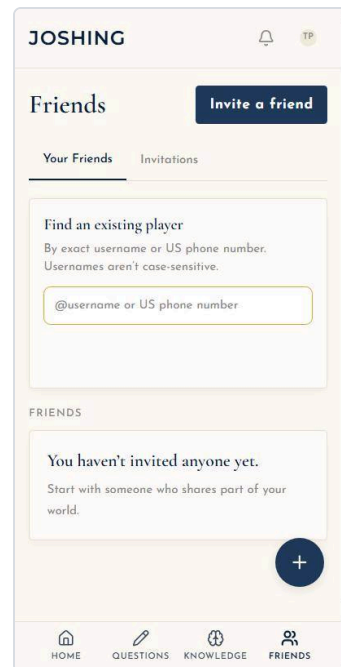

B didn't exist, so I created B through a fresh invite link from A (10:41–10:43). Joining by link made A and B friends right away. To reach the baseline, A pressed **Unfriend** on B's profile (11:03). After that, A and B were not friends, not blocked, and had no pending requests. Everything reset cleanly.

"Duo Prova is now a friend"

### 3 · AREAS

#### 3.1 Onboarding & auth

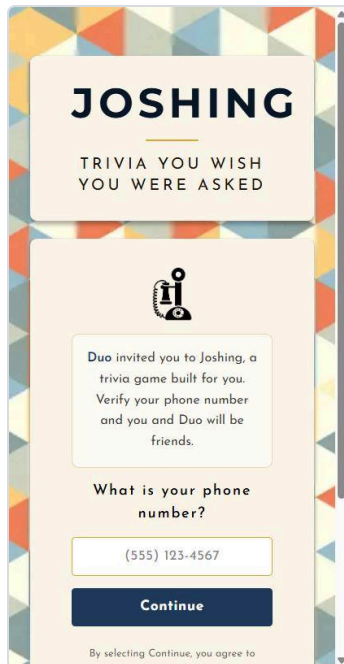

**What worked.** Uninvited numbers get “Joshing is invite-only. Ask a friend who's already on Joshing to send you an invite.” Opening an invite link shows “Duo invited you to Joshing, a trivia game built for you. Verify your phone number and you and Duo will be friends.” A wrong code gives “Code invalid or expired”. “Change number” keeps the invite banner. Profile setup explains itself: an empty submit shows “Enter your display name.”, a taken handle shows “That username is already taken.”, and the button is disabled with the reason on screen. Topic setup’s disabled button says “Pick at least 3 to start”, then “4 selected · add up to 8 more”. The first five were ready about 30 s after onboarding, with friendly loader copy (“Finding the right multitudes”, “Tuning the difficulty”).

#### Problems.

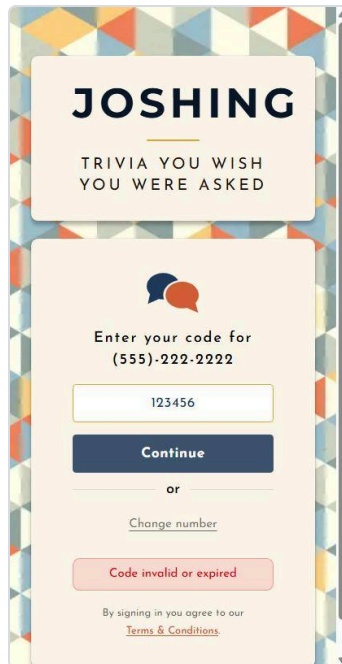

- The code screen has no “Resend code” link, only “Change number”. Re-entering the same number is the only way to get a new code (S10).
- At 390×759, the invite-only message sits at 722–800 px, partly below the fold. It has no `role="alert"` or `aria-live`, so screen readers won’t announce it (S10).
- The number is shown as “(555)-222-2222” (extra hyphen). After “Change number”, the field refills as raw “+15554444444” (N8).
- The username auto-fills from the display name. Clicking into it while the card was still animating mangled it into “treptreprovarova”. Bad characters are dropped silently (“9Quat!” → “quat”). Same as yesterday (N16).
- There is no avatar step, so every new player is an initial on a tile (N16).
- The display-name placeholder is “Jane Palay” / “jpalay”, the app owner’s surname and real handle (N18).

- A returning login as A went straight to the SMS ask (“Get a text when your five open”) again. This is a repeat of yesterday’s report.
- Joining by link makes the friendship with no confirmation screen. The only sign is the bonus label “From Duo’s world” and a feed row. This is a repeat.

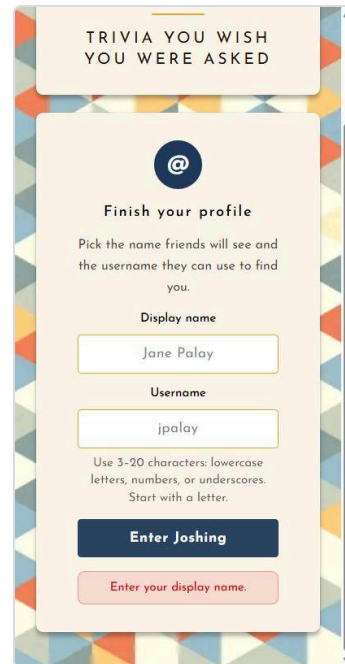

**Not tested:** an expired code. The OTP bypass code never expires, so this can’t be tested with test numbers (see Untested).

## 3.2 Gameplay

I played two full first rounds (B at 10:44–10:47, C at 10:53–10:57) and A's catch-up. A's own round at 1 PM is in 3.2b.

| TIME · ACCT | QUESTION (SHORT)                                       | ANSWER GIVEN | VERDICT SHOWN            | TEST                                    |

| 10:57 · C | Magic Flute villain (bonus)                            | "Queen of Night"         | ✓ The Queen of the Night                                                                                                 | near-miss                                                                            |
| 11:30 · A | Richard III: what deformities does he cite (two parts) | "a withered arm"         | × "Not this time — here's the answer." · "Half right—he's got the arm, but Richard also obsesses over his hunched back." | <b>partly right, multi-part</b><br><b>GRADED WRONG</b><br><b>(ACCEPTED DECISION)</b> |

**Progress dots and bonuses.** Each answer, reveal or skip filled the next of the five dots. Bonuses come after a divider ("●●●●● | ○○ +2 friend bonus") and never fill the five or change "x of 5", so they are additive ✓. Bonus order was the same for B and C: **Shakespeare first, then Mozart**, both "FROM DUO'S WORLD", labeled "Accessible". After the round, B's home card, recap and round screen agreed (●●●●● with the 3rd and 5th red, 2 grey bonus dots, "Five new today at 1 PM", "Play (2) Missed Questions"). Screen-reader labels exist for every dot ("Question 3: not this time", "Bonus question 1 of 2, from friends: skipped").

**Not for me.** The sheet offers "Skip for now · It'll come back another day.", "Never show this question", and either "Rest <topic>" (regular question) or "This is Duo's bag but not mine" (bonus).

- "Never show" always fails (C1).
- "Skip for now" on a bonus shows the resting message (S1).
- After the last bonus is skipped, its "SHOW ME THE ANSWER" / "NOT FOR ME" buttons stay on screen, enabled but doing nothing (S7).

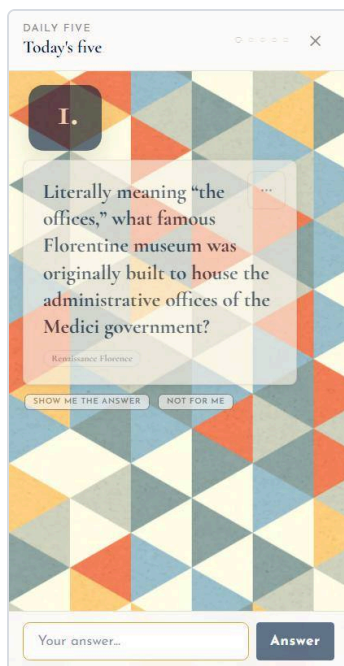

**End-of-round copy.** B (3/5): "TODAY'S JOSHING: FINISHED · Solid." C (4/5 + 1 bonus): "Untouched. Four in a row at one point." (N14). The first-session card reads "Nice start, Tre. New questions come every day — next up today at 1 PM."

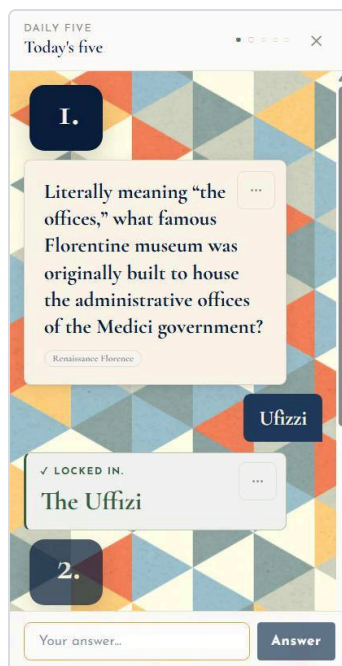

**Recap.** Full cards as designed. Authors seen: “by Joshua P” (a real stranger), “by JoshingEDITORIAL” (text runs together), “by Maid Acasa”. A reveal shows “YOU SAID · No answer submitted”. Skipped bonus cards show the full answer and explanation (S2).

**Catch-up.** “1 missed question from the past week · FROM TODAY”. That round is dated 2026-09-25 in the database and was played yesterday evening. The app’s day runs until 1 PM, so the label goes by the app’s day, not the calendar day (S13). Points shown: “+0 POINTS · CATCH-UP · 0.25X POINTS”. It ends with “That’s the round — 0 of 1. You’re all caught up.”, but home still says “Play (1) Missed Question” and serves the same question again (S5).

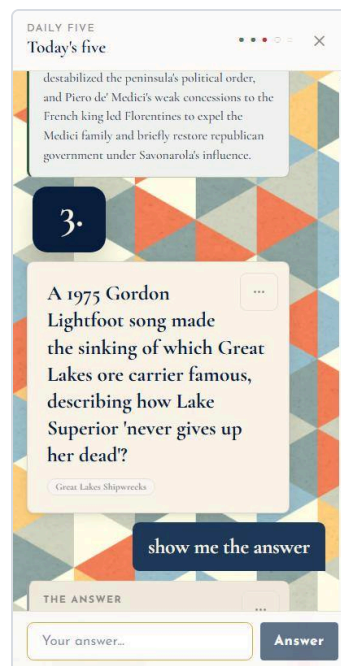

**Weekly ceremony (A).** “WEEK 13 · SEP 14 – SEP 20 · Seven days of knowing things. · 2 questions you got right”. Then “Where you moved up” (Establishing → Familiar ×2), “What you discovered”, “What you worked through · Things you didn’t have a week ago.” (3 questions), and “This is who you were this week. See you next Sunday.” The range is now seven days and “mastered” no longer appears (fixed since yesterday). Remaining oddities are listed in N13.

### 3.2b A's new round (13:00–13:04)

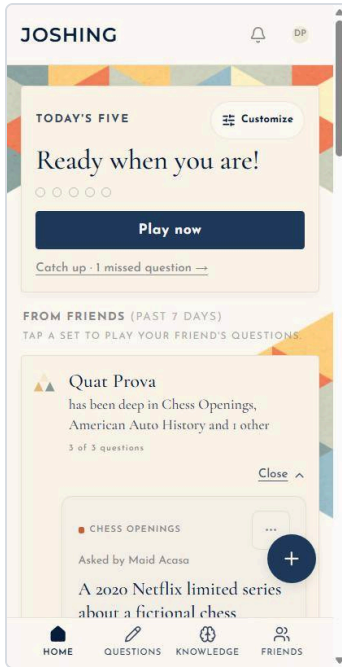

At 13:00 A's home flipped to "Ready when you are!" (○○○○○, aria "0 of 5 answered") with "Catch up · 1 missed question →".

| TIME  | QUESTION                                                                                                       | ANSWER               | VERDICT                                                                                                   |
|-------|----------------------------------------------------------------------------------------------------------------|----------------------|-----------------------------------------------------------------------------------------------------------|
| 13:01 | Who is the protagonist of Catch-22?                                                                            | "Yossarian"          | ✓ Captain John Yossarian                                                                                  |
| 13:01 | Catch-22: island base                                                                                          | "Pianosa"            | ✓                                                                                                         |
| 13:02 | Merrily We Roll Along: what the opening party celebrates                                                       | "his new movie"      | ✓ "The launch of his first film as a Hollywood producer..." (vague but accepted, fails toward the player) |
| 13:02 | What persuaded Henry VIII to marry Anne of Cleves                                                              | "Holbein's portrait" | ✓                                                                                                         |
| 13:02 | Georgia's "Gate City"                                                                                          | "Savannah"           | × Atlanta · "Right state, wrong gateway..."                                                               |
| 13:03 | <b>SECOND LOOK · LAST SEEN JUNE 22</b> (two-part: who led Cosimo's Platonic academy, and who translated Plato) | "Ficino"             | ✓ "IT STUCK." Marsilio Ficino (one name answers both parts)                                               |
| 13:03 | Bonus 1 "FROM QUAT'S WORLD" · Netflix chess opening                                                            | "Queen's Gambit"     | ✓, then "NEW TERRITORY · Add Chess Openings to your topics?"                                              |
| 13:03 | Bonus 2 "FROM QUAT'S WORLD" · which automaker's Mustang                                                        | "Ford"               | ✓ (the question names the Mustang, so it nearly gives the answer away)                                    |

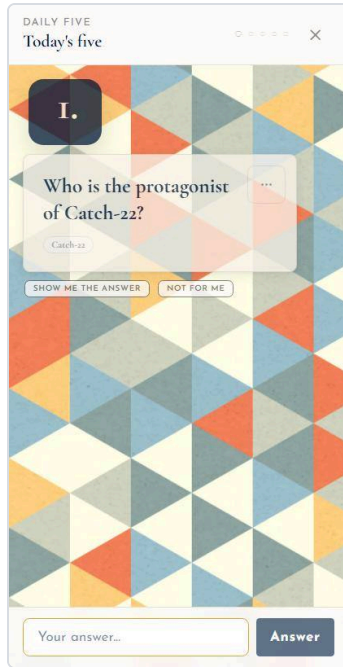

**Bonus order:** Chess Openings, then American Auto History, both from Quat. **Declared interest:** Great Lakes Shipwrecks (added 11:28 at "Sometimes") did not appear in this round; the five were Catch-22 ×2, Sondheim, Tudor, City Nicknames. One round isn't enough to say whether it works.

**Agreement:** the round header, recap and home all show ●●●●● (5th red) | ●● "+2 friend bonus", "5 of 5 answered", and "Five new tomorrow at 1 PM" ✓. "Play (2) Missed Questions" = Richard III plus Atlanta. The second-look item gets no dot, yet screen readers call it "Bonus question" (N19). Recap copy: "You got a American Auto History question from Quat Prova's world right." (N20). The ending again says "Untouched. Four in a row at one point."

### 3.3 Welcome tour (B, first run)

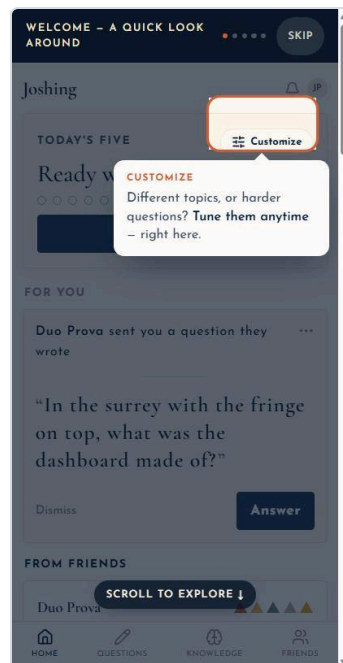

After the first recap, “Back home” opens “A quick look around · That was the daily game. Here’s where everything else lives.” The tour runs over a **mock home** with made-up content: avatar “JP”, “Ready when you are!” with five empty dots and “Play now” (though the player has just finished), “Duo Prova sent you a question they wrote · “In the surrey with the fringe on top...””, “Duo Prova ... 5 of 5 aced”, “aced all five in Tennis Fundamentals this week — play the same set”. All of that is invented and attributed to the real inviter (S3). The first highlight box sits above the Customize button (N10). In this harness the mouse wheel didn’t advance the tour; that may be the hidden tab, not the app.

## Also checked.

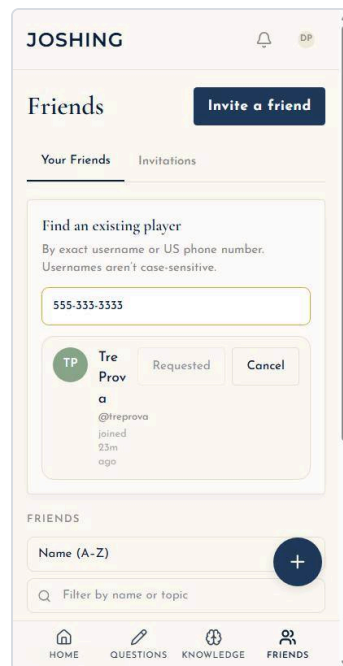

- Search rate limit: 8 lookups, then 429 Retry-After: 59; the UI says “Please wait 52 seconds before searching again.” ✓
- Mutual-friend suggestions: new accounts default to **OFF**, and the code needs *both* people opted in, so by default nobody ever sees one (Q2). With both B and C switched on, B’s Friends page showed “PEOPLE YOU MAY KNOW · Quat Prova · 1 mutual friend · + Request” and “Craig T Testing · 1 mutual friend” ✓.
- Friend profile: “Common ground · You and Tre both know Renaissance Florence · PROVEN TOGETHER”. The shared-interest line changed to A’s newly declared “Great Lakes Shipwrecks” within minutes ✓.
- Stranger names: C’s and B’s feeds say “You answered Joshua P’s question — you found someone”. This comes from stranger discovery, which is ON by default on purpose, and names a real, identifiable person. The same answer also creates a second row, “You came through on Joshua P’s Renaissance Florence question” (N6).
- After unfriending (11:04), B’s feed still said “Duo Prova is now a friend” (S4).
- Layout: with “Requested / Cancel” showing, the search result squeezes the name into “Tre / Prov / a” at 390 px (S8).

### 3.5 Knowledge / profile

- **Numbers add up** (fixed since yesterday): A “+3 more territories · 976 knowledge points across 8 territories” (5 shown + 3); B “70 knowledge points across 2 territories” (= the recap’s +60 +10); stranger “+76 more territories · 22,458 knowledge points across 81 territories”.
- **Declaring an interest:** “Great Lakes shipwrecks” added in Manage topics at 11:28. It was filed under **History** at “Sometimes” and showed up as B’s “Shared interest” with A. The first submit looked like nothing happened; the retry said “You already added that one.” Its effect on questions is in 3.2b.
- **Taxonomy** (S11): “Australian Geography” filed under HISTORY; “US State Capitals” under OTHER INTERESTS instead of Geography; “Catch-22” as its own top-level category; both “Theater & Musicals” (Sondheim) and “Musical Theater” (Golden Era Broadway) exist. User-typed topics get re-cased (“Great Lakes Shipwrecks”, “Jazz Standards”).
- **Legends:** the Frequency view marks Often/Sometimes/Resting with bar icons as well as color ✓. The Mastery legend’s four swatches (Mastery, Solid, Familiar, Establishing) are identical grey dots. You can only tell the levels apart from the section headings (FAMILIAR, ESTABLISHING) (N7).
- Suggestion chips include “90's Ballywood” and “1990's Cartoons” (N17).

### 3.6 Invite system

- **Create** (A, 10:40): at 3 of 3 links there is no create button (“You can keep up to three active invitation links.”). Deleting a link shows “The 0 people who already joined through this link stay your friends. Nothing changes for them.” (N1), then the toast “Link deleted. Friends kept.” The create sheet shows red “Choose at least one category to save.” before you’ve touched anything, and “Your categories” offers only 3 of A’s 15 topics (N2). New link: /u/duoprova/TjT17...
- **Redeem as fresh B and C (same link)**: both became A’s friends. The link now says “2 friends joined”, but “People you invited” still says “No notes sent yet.” (S6).
- **Co-invitee auto-friending: no**. B and C, who both joined through A’s link at 10:42 and 10:52, were not friends with each other (C’s friends list showed only Duo Prova at 10:57). They only appeared as “People you may know” once both opted in.
- **Redeem as existing B (not friends, not blocked)**: at 12:51 A unfriended B again, and B opened A’s link while signed in. The card showed “Accept Duo Prova’s invitation”; Accept → /api/invite-links/accept 200, B landed on home as A’s friend (“From friends · Duo Prova”) with no confirmation (N11). B’s home now also shows the teaser “2 people you may know →”. Earlier, at 11:32, A accepted B’s personal invite the same way.
- **Redeem while blocked**: refused both ways (3.4, step 6).
- **Deleted link** “This invitation link is no longer valid.”; **made-up token** “This invitation link is not valid.”; **used personal invite** “Invitation already used · This invitation has already been used.” All clear ✓.
- The invite card for Link 3 is headed “Play Duo Prova’s greatest hits”, which is Link 1’s name, not “Renaissance Florence & Great Lakes shipwrecks” (N3).
- **Expired link**: not tested. Personal invites say “Link rests after Oct 26”, and there was no way to age one without writing to the database.

### 3.7 Desktop pass (1280 px) — differences only

The app stays a single ~480 px column centered on the page, keeps the phone bottom tab bar, and the floating “+” sits over the right edge of the column. The knowledge portrait fits all five circles on one row. No broken layouts or horizontal overflow (scrollWidth 1265 < 1280).

SS-144 · 11:35 · A · / · desktop

SS-145 · 11:36 · A · /knowledge · desktop

### 3.8 Console

The tab-level reader recorded 8 uncaught Error: Connection closed. exceptions (chunk 28ca1cf1fd289851.js) at 10:35:05, 10:46:48, 10:47:38, 10:50:50, 10:56:05, 10:59:37, 11:21:46 and 11:30:32 (N15). The iframe hook recorded no console.error calls. Failing network calls: POST /api/questions/hide 500 (10:54, 10:55); the expected refusals (/api/invite-links/accept 400, /api/friend-invitations/accept-... 400, /api/friend-invitations 409, /api/friends/search 429).

Possible cause — The times line up with moments I navigated or switched accounts while a page was still loading, which looks like a React Server Components stream being cut off. They may be harmless, but they are unhandled.

## 4 · PRIORITIZED ISSUES

### Critical

#### C1 · CRITICAL · REPRODUCED 2/2

**“Never show this question” always fails with a server error and blanks the round.**

REPRO 10:54 and 10:55 ET · C · /daily · Q2 (1494 Medici) → NOT FOR ME → “Never show this question”. Every question area disappears; only “Could not hide that question. [Try again]” is left. “Try again” just reloads the round, and the question comes back. POST /api/questions/hide → **500** both times. Read-only DB check: table HiddenQuestion exists (6 columns) and has **0 rows ever**. So the feature has never worked in production, and “Settings › Hidden questions” can never list anything.

The catch-up page (src/app/daily/catchup/page.tsx:67) calls the same endpoint without checking the response, so there it fails silently while the card is dismissed.

SCREENSHOTS SS-65, SS-66, SS-67

**POSSIBLE CAUSE** — The route (src/app/api/questions/hide/route.ts) has no try/catch, so any insert error becomes a 500. The id column has no database default, which rules out a missing-table problem. A likely candidate is a foreign-key mismatch: the client sends question\_id when a slot has no generated\_question\_id, and some slot ids may not exist in Question (e.g. editorial or bank ids). The Vercel runtime logs for 14:54–14:55 UTC will show the real error.

## Should-fix

### S1 · REPRODUCED 2/2

#### **“Skip for now” on a bonus question says the whole topic was rested.**

REPRO 10:46 ET · B · /daily · bonus 1 (Shakespeare) → NOT FOR ME → “Skip for now · It’ll come back another day.” → the round says “RESTING SHAKESPEARE. YOU WON’T SEE THESE IN YOUR FIVE.” Repeated on bonus 2 with an exact button click → “RESTING MOZART...”. The DB shows only two SkippedDailyQuestion rows and no resting preference, so the message is wrong; the action was right. For comparison, C’s “This is Duo’s bag but not mine” (10:57) called /api/daily/preferences/domain-frequency and /api/daily/skip.

SCREENSHOTS SS-39, SS-40, SS-41

**POSSIBLE CAUSE** — src/app/daily/page.tsx:791 picks the message only from isBonusSlot(slot), so every skipped bonus slot gets the “Resting ...” text, whichever option was chosen.

### S2 · SEEN 2/2 (B AND C) · ALSO IN 2026-09-25 REPORT

#### **The recap shows the answers to questions you chose to “skip for now”.**

REPRO 10:47 ET · B · /daily/summary · the two skipped bonus cards show “YOU SAID Skipped · ANSWER A love potion (juice of a flower / love-in-idleness)” and “The Queen of the Night”, with full explanations. The skip option promised “It’ll come back another day.”, so when it comes back it’s already spoiled.

SCREENSHOTS SS-43

### S3 · SEEN ONCE

#### **The welcome tour puts made-up activity in a real friend’s name.**

REPRO 10:48 ET · B (new) · / · “Start the tour”. The mock home says “Duo Prova sent you a question they wrote · “In the surrey with the fringe on top...””, “Duo Prova ... aced all five in Tennis Fundamentals this week”, “5 of 5 aced”, and “Ready when you are! · Play now”, right after the player finished. None of it happened. A new player may go looking for that question or bring it up with their friend.

SCREENSHOTS SS-44, SS-45, SS-53, SS-54

### S4 · SEEN AT 11:04 AND 11:24

#### **Friend feed rows stay, or come back, after the friendship ends.**

REPRO 11:03 A unfriends B → 11:04 B’s /activities still says “Duo Prova is now a friend”. 11:10 friends again; 11:15 A blocks B (rows hidden ✓); 11:23 A unblocks → 11:24 B’s home Recent activity shows “Duo Prova accepted your friend request” and “Duo Prova is now a friend”, though they are not friends (A’s profile of B says “Add friend”).

SCREENSHOTS SS-79, SS-122, SS-123

#### S5 · REPRODUCED 2/2

##### **Catch-up says “You’re all caught up”, then serves the same question again.**

REPRO 11:30 A answers the only catch-up question wrong → “That’s the round — 0 of 1. You’re all caught up.” Home still says “Play (1) Missed Question”. 11:32 after reload it opens the same Richard III question as “1 OF 1 REMAINING”. Replaying today’s misses is intended, but a question missed *again* seconds ago comes straight back in a loop, and the “caught up” line is wrong.

SCREENSHOTS SS-133, SS-140

#### S6 · SEEN 10:35, 11:00, 11:13 · RELATED TO 2026-09-25

##### **“People you invited” never shows people who joined through a link.**

REPRO A · /friends Invitations: Link 3 says “2 friends joined”, but “People you invited” says “No notes sent yet.” The heading promises people; the empty state talks about notes; neither B nor C appears.

SCREENSHOTS SS-3, SS-74

#### S7 · SEEN ONCE

##### **Dead buttons stay on the last skipped bonus after the round ends.**

REPRO 10:46–10:47 B · after skipping bonus 2, “SHOW ME THE ANSWER” and “NOT FOR ME” stay visible and enabled under “TODAY’S JOSHING: FINISHED”. Clicking them does nothing.

SCREENSHOTS SS-41, SS-42

#### S8 · SEEN 3×

##### **Friend search result squeezes the name at phone width.**

11:05, 11:08, 11:10 · With “Requested” and “Cancel” showing, the name wraps one or two letters per line (“Tre / Prov / a”, “joined / 23m / ago”).

SCREENSHOTS SS-84

#### S9 · SEEN ONCE EACH

##### **Friend screens go stale after an action.**

11:08 A cancels a request: the search card says “Add friend” while “REQUESTS SENT (1) · Waiting” stays below. 11:07 B declines: the Friends-tab badge “1” stays until the next page. 11:10 B sends a request: B’s “Requests Sent” section doesn’t appear until reload.

SCREENSHOTS SS-87, SS-90

#### S10 · SEEN 10:38–10:51

##### **Login: no “resend code”, and the invite-only message is easy to miss.**

The code screen has no resend link (confirmed in code; only “Change number”). The invite-only error is 722–800 px down in a 759 px-tall viewport, with no `role=alert/aria-live`.

SCREENSHOTS SS-11, SS-13

S11 · SEEN 11:25 · ALSO IN 2026-09-25 REPORT

### Topics filed in the wrong categories.

Australian Geography → History; US State Capitals → Other interests; Catch-22 as its own category; “Theater & Musicals” and “Musical Theater” both exist.

SCREENSHOTS SS-125, SS-128

S13 · SEEN ONCE

### “From today” on a question missed yesterday.

11:29 A · /daily/catchup. The round is dated 2026-09-25 (played yesterday evening), but the card says “FROM TODAY”. The home card also still calls it “Today’s five” until 1 PM, so the app’s day disagrees with the calendar in the morning.

SCREENSHOTS SS-132

S14 · SEEN ONCE (AFTER CLEANUP)

### A deleted player’s name stays in their friend’s recap.

REPRO 13:03 A answers two bonuses “FROM QUAT’S WORLD”. 13:06 C (Quat Prova) deletes the account. 13:09 A · /daily/summary still shows “from Quat’s knowledge” on both bonus cards. That is inconsistent with unfriend and block, which scrub these labels (Q1, 3.4 step 5). The feed side is clean: the 4 leftover ActivityItem rows (type follow\_mutual, reference = B/C ids) have actorUserId and actorNameSnapshot both null and don’t render.

SCREENSHOTS SS-155 (before), SS-164

## Nice-to-have

| ID | ISSUE                                                                                                                                                                                  | WHERE · TIME                    | SEEN |

| N10 | Tour highlight box sits above the Customize button.                                                                                                                                                       | B · 10:49 · SS-46                 | 1 |
| N11 | No confirmation after Accept (request), Accept (invite link), or joining by link.                                                                                                                         | A · 11:10, 11:32                  | 3 |
| N12 | The same request shows twice on home with different labels (“Decline” vs “Not now”).                                                                                                                      | B · 11:07 · SS-86                 | 1 |
| N13 | Ceremony: “2 questions you got right” but 3 under “worked through”; Breaking Bad is both “moved up” and “discovered”; the Sep 14–20 reflection was sent Sun 4:01, early on Sep 20, before the week ended. | A · 11:31 · SS-134...137          | 1 |
| N14 | End labels “Untouched.” (for 4/5) and “Solid.” are unclear; “Four in a row at one point.” sounds like a streak.                                                                                           | C, B · 10:57, 10:47 · SS-69       | 2 |
| N15 | 8 uncaught Error: Connection closed. console exceptions.                                                                                                                                                  | 10:35–11:30                       | 8 |
| N16 | No avatar step; username auto-fill mangled by a click during the entrance animation; bad characters stripped silently.                                                                                    | B, C · 10:42, 10:52 · SS-25       | 2 |
| N17 | Suggestion chips “90's Ballywood”, “1990's Cartoons”.                                                                                                                                                     | A · 11:25                         | 1 |
| N18 | Name placeholders “Jane Palay” / “jpalay” (“jpalay” is the owner’s real handle).                                                                                                                          | B · 10:42 · SS-23                 | 2 |
| N19 | The “Second look” item has no progress dot but is read out as “Bonus question”. After viewing the weekly reflection (11:32), Lately still says “Your weekly reflection is ready · SEE IT NOW” at 13:08.   | A · 13:03, 13:08 · SS-154, SS-163 | 1 |
| N20 | “You got a American Auto History question...” (should be “an”).                                                                                                                                           | A recap · 13:04                   | 1 |
| N21 | The floating “+” button covers the “Type DELETE” field on the delete-account confirm at phone width. Deleting lands on the plain login screen with no “account deleted” message.                          | B · 13:04–13:05 · SS-157, SS-159  | 2 |

## 5 · QUESTIONS FOR JOSH

- **Q1 · Unfriending erases shared history.** At 11:03 A unfriended B. B’s home immediately dropped the bonus dots, and B’s recap lost both bonus cards (they had been “from Duo’s knowledge”). For a *block*, scrubbing makes sense. For a plain unfriend it quietly rewrites what B played today. Should an unfriend keep past rounds as they were?
- **Q2 · Mutual-friend suggestions need both people opted in, and the default is OFF.** So “People you may know” never appears unless two people have both found and flipped a setting. If this feature matters for growth, consider ON by default for the person being suggested (like stranger discovery), or needing only the suggested person’s consent.
- **Q3 · “Four in a row at one point.”** This is a within-round note, not a daily streak, but it is the same kind of counting-runs language the no-streaks principle avoids. Worth a softer line?
- **Q4 · Catch-up replays a question you just missed again.** The deliberate-decision list says today’s misses can be replayed right away. It doesn’t cover a question missed *twice* within a minute coming straight back (S5). Is a cool-down intended?
- **Q5 · The blocked person can still see the blocker’s invite card.** Opening A’s invite link as blocked B still shows “Duo Prova invited you... [Accept Duo Prova’s invitation]”, and only the Accept

press fails. B already holds the link, so little leaks, but a generic “invitation unavailable” before pressing would match how the rest of blocking behaves.

## 6 · UNTESTED (AND WHAT WOULD UNBLOCK IT)

- **Expired OTP code.** The bypass code 000000 never expires. Needs a real, non-bypass test number, or a way to backdate an otpCode row in a non-production database.
- **Expired invite link.** Personal invites “rest after Oct 26”. Needs a DB-backdated invitation (a production write, so not done) or a preview environment.
- **B’s new round while blocked (“from ...’s world” bonuses).** B’s round was played before the block, and the next round opens at 1 PM, after the unblock and re-friending. Checked instead: after the block, B’s existing recap and home had no Duo attribution. Needs a block that stays in place across a 1 PM rollover.
- **Real 390×844 viewport and touch.** resize\_window has no effect here; I used a 390×759 iframe with mouse input. Needs a real phone or a working resize.
- **SMS and email sending.** I didn’t opt in (“Not right now” / “I’ll check back on my own”) to avoid sending to test numbers.

## 7 · PRINCIPLE AUDIT

| PRINCIPLE                                       | VERDICT                               | EVIDENCE                                                                                                                                                                                                                                                                                                                           |
|-------------------------------------------------|---------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No streaks, leaderboards, or coercive mechanics | <b>MOSTLY</b>                         | No streak counter, leaderboard or guilt copy seen. The word “streak” from yesterday’s home screen is gone. Copy is gentle: “Some you didn’t land will find their way back to you.”, “See you next Sunday.” Caveats: “Four in a row at one point.” (Q3); the SMS ask again at every login (repeat); the ceremony’s count-up number. |
| Wrong answers feel like connection moments      | <b>PASS</b>                           | “You’ll know this one next time.”, “NOW IT’S IN YOURS TOO”, “Right era, wrong crooner —Armstrong was legendary, but Sinatra owned this one.”, “ARGUE YOUR POINT”, “Half right—he’s got the arm...”. One slip: “That’s the round — 0 of 1.” right after a catch-up miss reads like a score.                                         |
| Color never carries meaning alone               | <b>MIXED</b>                          | Good: answers use ✓/✗ plus words; frequency uses bar icons; toggles move the knob; dots have screen-reader labels. Accepted: right/wrong dots are color-only. Gaps: the Mastery legend swatches are identical (N7), so its colors mean nothing; skipped bonus dots are grey vs unanswered hollow, a subtle difference.             |
| Grading fails toward the player                 | <b>PASS</b> (with accepted exception) | Typo “Ufizzi” ✓, vague “King Charles of France” ✓, synonym “rebadging” ✓, “Queen of Night” ✓, “Uffizi Gallery” ✓, and in A’s old round “Lorenzo de Medici” for Lorenzo di Pierfrancesco ✓. Partly-right multi-part “a withered arm” ✗ is the accepted exception.                                                                   |

## 8 · SUGGESTIONS FOR IMPROVEMENT

- **Make “Skip for now” honest end to end.** Give it its own message (“Skipped — it’ll come back”), keep the answer hidden in the recap until it has come back and been answered, and use the “Resting X” line only for the bag/rest option.
- **Build the tour mock from the real account, or use obviously fictional names.** A friend’s real name next to invented activity is the one place the app says something untrue about a person.

- **Treat feed rows as current state, not a log**, for relationship events: drop or rewrite “is now a friend” / “accepted your request” when the friendship ends.
- **Fold link-joiners into “People you invited”** (“Tre joined via ‘Renaissance Florence & Great Lakes shipwrecks’ · now friends”). It would give the inviter the confirmation that joining by link currently lacks.
- **Add a light confirmation after friendship-making actions** (accept request, accept invite, join via link): a toast like “You and Tre are now friends”.
- **Resend code** on the OTP screen with a cooldown, and `role="alert"` on login errors, scrolled into view.
- **Check “already friends / blocked” when the phone number is entered** in invite-by-phone, not after the ideas step.
- **Taxonomy guardrails**: map geography-type topics (Australian Geography, US State Capitals) to Geography, merge “Musical Theater” into “Theater & Musicals”, and don’t make a single book its own top-level category.
- **Mastery legend**: draw the swatches the way the map draws the levels (size or fill), or drop the legend and keep the section headings.
- **Catch-up**: after a second miss, say something like “We’ll bring this one back another day” and hold it back for a while.

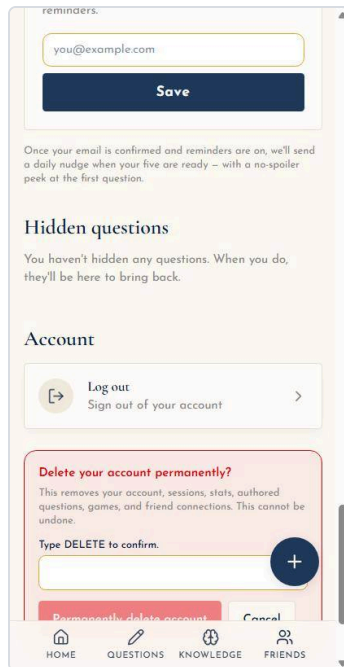

## 9 · CLEANUP

| TIME<br>(ET)    | STEP                                                                                                                                                                                                                                                        | RESULT                                                                                                                                                                                                                                                          |

13:09 Read-only DB check

User rows for B/C: 0 · Friendship: 0 · UserBlock: 0 · ActivityItem: 4 orphan follow\_mutual rows on A's feed pointing at B/C ids, with null actor and null name snapshot (not rendered). There was one older FriendInvitation (2026-09-14, "Terry Tester", accepted) for B's number, from a *previous* run, not this one.

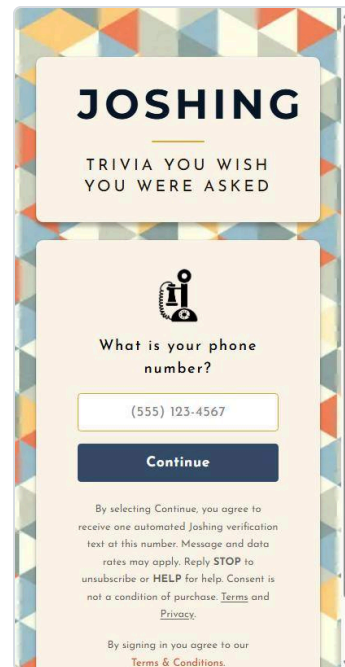

A's other changes, left in place: Link 3 was deleted and recreated with the same topics (new token  $\tau_{JT17}...$ ; the old  $\iota_{iyw}...$  no longer works). "Great Lakes Shipwrecks" added to A's topics. A's weekly reflection viewed. A's catch-up and 1 PM round played.
